

functional and creative textiles

version: August 2020

Wevotex promotional / hair & body

From idea to finished product

Our project-based approach guides you in the realization of custom-made products. This guidance includes the following steps:

- Advice on the correct choice from the various weaving and printing techniques.
- Making the final design and fix details.
- Execution of the order according to plan; if necessary, a digital photo of the first production result can be sent for approval.
- Taking care of the shipment of the goods; if necessary, with hidden sender.

Production

We produce our textile products at a limited number of production companies. We have intensive cooperation with these production companies; they work according to our quality standards and procedures. In order to offer an optimal price-quality ratio, we produce in different regions:

- Production Europe -> top quality: meets the highest requirements in terms of quality and finish; if necessary, can be produced with a lead time of approx. 5 - 8 weeks.
- Production Far East -> standard quality: extremely economical for large numbers and yet uniform quality; production lead time 12 to 14 weeks.

Logistics

We specialize in stocking and distributing to various delivery addresses. Distribution is done from our warehouse in Enschede.
