

BMI Roofscape

Helping you find the perfect roofing solutions

Our market-leading brands cover every roofing technology, so we can recommend the best solution for our customers' needs.

Our team of experienced roofing specialists can help you to identify the best solution for your roofing project, utilising our vast portfolio of solutions and expertise, coupled with a scientific analysis of your current roofing system.

Find out how we can support you with specifications and services in this short video:

A world of support and service

Consultation

We understand that each project is different, so we ensure that we take the time to meet and discuss your specific needs in detail.

Design and Specification

As we provide a full design specification service, we can ensure that specifications, drawings and calculations align with Building Regulations and Codes of Practices. Your solution will also be created to match your specific guarantee needs.

Contractor Selection

Our network of approved roofing contractors offer a guaranteed level of exceptional service, skill and technical expertise. All contractors have an impressive track record in roofing projects of all sizes and are committed to ongoing training.

Legislative Compliance:

We will work to ensure that your specification (and build) adheres to all relevant Building Regulations – whether that is fire and thermal regulations, or Credits towards BREEAM developments.

Project Monitoring and Sign-Off

Continual close monitoring of the project by our site technicians ensures that right through to sign-off, your project is completed accurately, to the specification, on time and to your satisfaction.

System Guarantee

Dependant on your guarantee requirements, we provide the most comprehensive guarantees available. Fully insurance-backed guarantees include: up-to 30 years product performance, contractor insolvency and consequential loss.

Shaping the pitched roofscape

BMI Redland

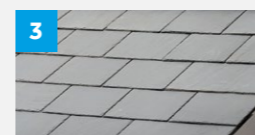

PROFILE TILE SYSTEMS

Our wide choice of profiled tile systems come in an extensive selection of colours and finishes and are suited to almost any pitched roof design.

PLAIN TILE SYSTEMS

Our plain roof tile systems combine an authentic and traditional look with strength and durability you can rely on.

SLATE ROOFING SYSTEMS

Our slate range delivers the simple beauty of a slated roof with precision manufacturing that ensures a durable and weathertight construction.

ACCESSORIES

We manufacture and supply all of the products needed to complete your roof systems from ventilation to valleys, ridges and everything in-between.

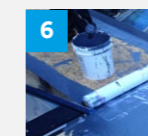

The right solution for your flat roof

BMI Icopal

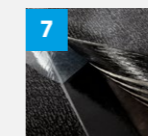

SINGLE-PLY ROOFING

Versatile, flexible and simple to install, our single-ply roofing membranes and accessories deliver a high performance lightweight solution, balancing design potential with performance and cost.

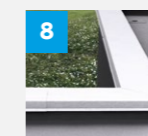

LIQUID APPLIED WATERPROOFING

Our BMI Sealoflex range of liquid applied waterproofing systems delivers complete flexibility, complete coverage and peace of mind, meeting every demand while minimising downtime and disruption to your project.

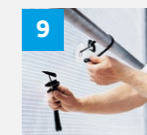

REINFORCED BITUMEN MEMBRANES

This high performance range offers an innovative, energy-efficient, flame retardant solution for flat roofs. A wide selection of systems offering elastomeric properties and hot or cold applications.

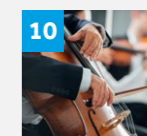

ACTIVE ROOF SOLUTIONS

Our BMI Canopia Blue and Green roofs offer many advantages for building developers, owners and their users. They benefit the wider environment through their positive impact on sustainability, biodiversity and the attenuation of storm water.

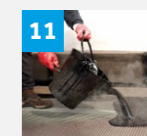

SCAFFOLD SHEETING

High quality and extreme strength with BMI Monarflex scaffold sheeting, tarpaulins and agricultural sheeting. Products with a proven track record for technical performance.

ACOUSTIC SYSTEMS

We are a market leader in high performance acoustic systems, offering a one-stop product, service and technical support and a broad range of traditional and innovative second generation acoustic isolation.

HOT MELT & STRUCTURAL WATERPROOFING

The BMI Icopal Parabit is a hot melt applied, reinforced self healing waterproofing membrane specially developed for use in inverted, green and plaza deck roofing systems. Designed for concrete substrates, Parabit represents the optimum solution for speed of application and cost effectiveness.
