

Saga Logger – Manual Data Upload Process

1. Go to <https://upload.controlant.com>
2. Connect the logger to your computer and open File Explorer/Finder. You may need to wait for the data file to appear.
3. Locate the **Controlant** thumb drive with the **DATA.BIN** file.
4. Drag and drop the file or select **choose file** in the upload box.

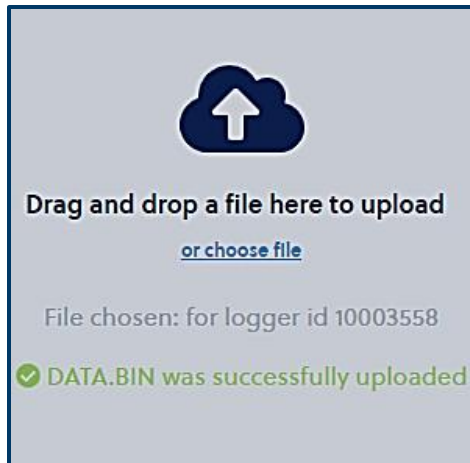

5. If upload is **successful** - eject the logger from your computer. Data will be complete in the SCM platform.

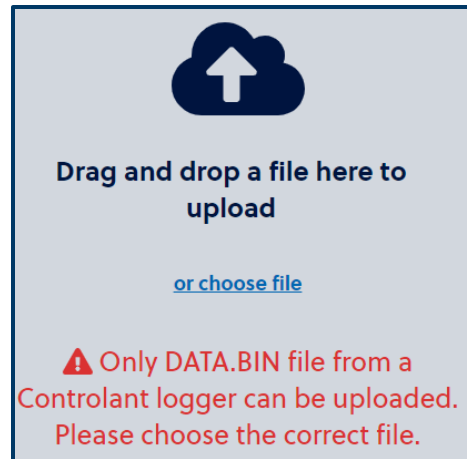

If upload is **unsuccessful** - eject the logger, place it aside and contact Controlant Support.

Saga Logger – Manual Data Upload Process

Successful Upload

Unsuccessful Upload

Note - manual data upload is only required under the following circumstances:

- Logger display shows no connection to the Cloud. ☁️✖️
- Shipment displays missing data warning in the SCM platform.
