

Controlant on track to meet its 2030 science-based target

Renewable energy coverage through our operations. Demonstrating the origin of renewable energy through energy attribute certificates serves as evidence of our commitment to emission reduction for our customers and partners.

Controlant has reduced **Scope 3** emissions in 2023 by 65%

Scope 3 reductions were made possible through to efforts to design out waste and emissions by designing our loggers for durability and re-usability. Allowing us to optimize the use-phase of our devices instead of having to manufacture new ones.
