# **Our Vision is a clean future for all.**

## **Fisker's Mission is to create the world's most emotional and sustainable vehicles.**

We believe if given the choice of a beautifully designed vehicle, people will embrace their power to create change toward clean mobility.

Design, Sustainability, and Innovation are in the DNA of every vehicle Fisker creates.

## **Design**

There is no formula for great design. As a Fisker driver, you will experience a beautiful EV executed just as master designer Henrik Fisker envisioned. Our EVs attract and inspire; the contours, proportions, and lines flow together in perfect harmony, designed to spark that moment when your heart beats a little faster. Fisker's human-centred design delivers simplicity and control, moving you confidently and beautifully through your world.

## **Sustainability**

For us at Fisker, the future of mobility aligns with nature. For many years, drivers were limited to fossil fuel-burning automobiles with little consideration of environmental effects. With Fisker's all-electric vehicles, our use of low environmental impact materials, and our "start with a clean sheet" approach to building a car company, we balance the desire for mobility with our desire for a clean future for all. We are creating a radical shift towards personal transportation aligned with our environment while simultaneously delivering superior EV acceleration and performance.

## **Innovation**

Fisker innovates by creating advanced technology and building with cutting-edge technology from our partners. We make exciting, safe, and engaging products with fun user experiences that are seamless, precise, and intuitive.

Fisker innovation is about more than systems and software. We create new ways to acquire, deliver, and service our vehicles. Because Fisker innovates to make all our manufacturing cleaner and to make each step of our sales and service experience more efficient, we make vehicles that are sustainable and affordable. Ever-growing numbers of drivers can feel good about using their purchasing power to create positive change.

# Henrik Fisker and Fisker Inc.

An iconic figure in the automotive industry, founder Henrik Fisker is a pioneer in the electric vehicle movement and a world-class designer with a history of creating show-stopping cars drivers fall in love with.

Henrik Fisker believes the electric vehicle is the most fundamental shift in personal transport since the transition from the horse to the gasoline engine. Henrik created a new kind of car company with a transformational vision to do things better, built on his extensive experience at world-leading automotive brands and at his first company, Fisker Automotive. Henrik and Dr. Geeta Gupta-Fisker founded Fisker Inc. in 2016 as a purpose-built company to create the necessary change to a more sustainable way of making and using vehicles.

Our guiding philosophy of combining beauty, functionality, and advanced technology inspires every decision we make at Fisker Inc.

- Design and the designer drive decision-making; Henrik Fisker is CEO and chief designer
- We engineer and innovate, and our world-class manufacturing partners like Magna and Foxconn build our high-quality vehicles for a global market
- Our Fisker Ocean EV is built at a carbon-neutral factory, and our trusted supply partners deliver parts and materials made through eco-friendly processes
- Direct-to-consumer sales and global service partnerships cut the total cost of ownership for consumers, make owning easier, and create lasting connections with drivers
- Digital technology powers exciting user experiences and allows over-the-air (OTA) software upgrades to the latest hardware
- Fisker designs for sustainability through the entire product life cycle. We use less, use better, and use again

Fisker believes the auto industry must take responsibility for its products' lifecycle end-to-end and provide customers with the opportunity to contribute to a more sustainable future.

Fisker is a U.S.-based company with headquarters in Manhattan Beach, CA. We design, engineer, and write code in California.

# Driven by Impact: Our ESG Values

Environmental, social, and governance (ESG) values must be the foundation of any company striving to ensure the future of personal mobility. Fisker is influencing the auto industry by demonstrating innovative and positive change, beginning with the release of the all-electric, five-passenger Fisker Ocean SUV in Q4 2022.

Fisker puts People and Planet First in everything we do. We incorporate sustainability into our systems thinking, where environmental consideration permeates every decision. People and Planet First is not a placard in our lobby but a daily decision-making practice that is a Fisker cultural norm as we strive to fulfil our mission of A Clean Future for All.

This mindset shows from even the most minor actions – we sourced the end bolts of theatre fabric destined for the landfill for our product reveals – to the most visible, such as the large solar roof available on the Fisker Ocean.

In addition, Fisker's "Asset Light" business model radically challenges what it means to be an original equipment manufacturer in the automotive industry.

For decades, vehicle companies worked within the same basic business model, requiring a significant up-front financial commitment to create asset-heavy and environmentally impactful delivery-to-distribution points for the consumer. At Fisker, we shifted this thinking into a more nimble, technology-forward asset light approach.

We have solidified partnerships with leading, like-minded global suppliers who share our sustainability and human rights values and systems philosophy. Our sustainable practices collectively align with our demand for high-quality design, materials, and components, resulting in products offering an engaging driving experience harnessing innovative technology.

We maximize recycled content wherever possible; through tracking and measurement of real data, the Fisker Ocean contains more than 50 kg of recycled and bio-based polymers. Following our commitment to transparency, we will publicly report our material content and overall emissions.

We are laser-focused on sustainability as demonstrated by our annual 2021 ESG Impact Report, published pre-production and available here: [Driven by Impact. 2021 Fisker ESG Impact Report \(fiskerinc.com\)](https://www.fiskerinc.com/2021-ESG-Impact-Report).

For design, sustainability, and innovation, every detail matters.

# The All-Electric Fisker Ocean.

**"It's time for an electric vehicle this beautiful, this sustainable, this innovative, and this functional, at this price."–Henrik Fisker**

The all-electric Fisker Ocean zero-emissions SUV is ready to disrupt the automotive world with its beautiful craftsmanship, ingenious engineering, innovation, affordability, and sustainability. Its emphasis on sleek and modern design shines through its dramatically sculpted exterior and aggressive stance, combining a daring sports car dynamic with a durable and configurable SUV. The super-clean and luxurious interior is loaded with exciting features.

The outstanding range of up to 350 miles \*/391 U.K. miles/630 km \*\* will move you beautifully and cleanly through your world.

## Key Differentiating Features

### Emphasis on Design

Sleek, stylish, modern SUV.

Dramatically sculpted exterior with an aggressive stance, clean lines, sleek surfaces, and ultra-slim lighting, combining a daring sports car dynamic with a durable and configurable SUV.

### Super Clean and Luxurious

An interior loaded with exciting features.

Revolve–Fisker's revolutionary 17.1" rotating central touchscreen (standard on Extreme and One) and an interior made from recycled materials, including carpets and interior materials made from upcycled plastic bottles.

## Outstanding Range

Fisker is going the distance in our mission to create the most sustainable SUV on Earth. We are harnessing the latest, most cutting-edge technology in the world to design and engineer an all-new high-performance SUV that's powerful and incredibly responsive but also allows you to go hundreds of zero emissions miles without ever stopping to recharge.

Extreme and One trim with Hyper Range battery pack	<b>350 U.S. miles *</b>	<b>391 U.K. miles **</b>	<b>630 km **</b>
Ultra trim with Hyper Range battery pack	<b>340 U.S. miles *</b>	<b>379 U.K. miles **</b>	<b>610 km **</b>
Sport trim with Touring Range battery pack	<b>250 U.S. miles *</b>	<b>273 U.K. miles **</b>	<b>440 km **</b>
* Based on Fisker simulations utilizing EPA standards. Actual results vary with conditions such as external environment, wheel size and diameter, and vehicle use. Official EPA ratings forthcoming. ** Based on Fisker simulations utilizing WLTP standards. Actual results vary with conditions such as external environment, wheel size and diameter, and vehicle use. Official WLTP ratings forthcoming.			

## Trim Levels

- Extreme
- Ultra
- Sport
- Fisker Ocean One is the "Launch Edition" equipped at Extreme trim level, plus exclusive features

## Drive Modes

- Earth—standard on all trim levels
- Fun—standard on all trim levels
- Hyper— standard on Ultra, Extreme, and One trim levels

## Special Drive Modes *(Expected activation in early 2024)*

- Off-Road—standard on Extreme and One trim levels
- Snow/Ice—standard on all trim levels

## Battery Packs

- Hyper Range—Nickel Manganese Cobalt (NMC)— standard on Ultra, Extreme, and One trim levels
- Touring Range—Lithium Iron Phosphate (LFP)— standard on Sport trim level

## Standard features on all trims

Seating for 5

App as Key

PowerBank system functionality

PowerShare vehicle-to-vehicle charging

PowerHouse vehicle-to-home capability

External Power Outlet

Over-the-air (OTA) capability to deliver product updates  
Great White with gloss finish exterior  
Black Abyss Interior Trim  
20" F7 AeroStealth alloy wheels with recycled material wheel covers  
Regenerative Braking  
Digital Interior Rear View Mirror  
Tilt & Telescoping Steering–Power  
LED Head Lights and Tail Lights  
See Me Signal –high-mounted rear indicator  
Power Liftgate

Launch Edition

# Fisker Ocean One

## The First One.

**£59,900** (in U.K.)<sup>1</sup>

The exclusive, launch-edition Fisker Ocean One will be the first-ever vehicle launched by Fisker. Limited to the first 5,000 units produced, this uncompromised luxury edition of the Fisker Ocean all-electric SUV is fully loaded and includes rarities standard only on the Fisker Ocean One.

The first 5000 vehicles produced will be launch-edition Fisker Ocean Ones. The all-electric Fisker Ocean SUV starts production on Nov. 17, 2022, at Magna's world-class, carbon-neutral manufacturing facility in Graz, Austria. In July 2022, the Fisker Ocean One sold out in 30 days, each secured by a \$5,000<sup>2</sup> deposit representing \$350 million in potential revenue for Fisker once all the vehicles are delivered.

The Fisker Ocean One comes with all the available high-end features, such as the SolarSky roof, California Mode, Revolve–Fisker's revolutionary 17.1" rotating central touchscreen, Smart Traction, a complete suite of available Fisker Intelligent Pilot features, plus unique standard features only available on the Fisker Ocean One:

---

<sup>1</sup> All prices listed are manufacturer's recommended retail price and include 20% VAT but currently exclude delivery fee and registration fees. Provisional pricing assumes no import tariff is enacted for delivery from EU. The vehicle is in the homologation process and can currently not yet be purchased. Valid information on place of delivery, registration and insurance can therefore not yet be made and will be given as soon as they are available. Pricing is subject to change and will be calculated when you place your order and will further depend upon specifications and options chosen by you when configuring your final vehicle. Prices depend on specifications and options chosen by you when configuring your final vehicle.

<sup>2</sup> Or local currency equivalent

- **22" F3 SlipStream, 22" F5 AirGlider, or 22" F6 Vortex wheels** (standard)–These imposing 22" wheels use aluminium alloy and lighter weight, recycled materials to lower carbon footprint. Choose between the 22" F3 SlipStream alloy wheels, 22" F5 AirGlider alloy wheels (both available in either black or silver), or the 22" F6 Vortex in two-tone finish.
- **MaliBlu interior** (standard)– MaliBlu brings the California-inspired "Blue Wave" of Fisker exterior colours to full fruition in a rich, balanced, blue-on-black theme, surrounding occupants with luxurious textures and durable soft-touch materials like Alcantara®. MaliBlu's refined look is polished to perfection with bright metallic accents and black carpet.
- **Commemorative Digital Signature** – Only Fisker Ocean One owners will be greeted with a digital signature and number sequence on the control screen, authenticating their vehicle's place among the first 5,000 electric vehicles made by Fisker.
- **Ocean One Badge** – Settle into the luxury interior, take a look under the Fisker logo on the steering wheel, and see the Ocean One badge. The Launch Edition Fisker Ocean One is the only Fisker Ocean with this exclusive badge, reminding you every time you power up that you're driving the One.

Wheelbase	115 in (2921 mm)		

Trim Level

# Fisker Ocean Sport

**A striking balance of performance, range, and affordability. £34,990** (in U.K.)<sup>3</sup>

The Fisker Ocean Sport trim is your beautiful gateway to electric mobility. This single motor front-wheel drive trim with Touring Range comes nicely equipped with a 17.1" central touchscreen, BigSky panoramic fixed glass roof, Power Liftgate, Digital Interior Rear View Mirror, 20" F7 AeroStealth Wheels, Automatic Emergency Braking–Premium and other advanced features.

## Standard features on Sport trim level

### Powertrain

Touring Range Battery (Lithium Iron Phosphate)  
Single Motor FWD  
Regenerative Braking  
Charge Port: CCS1 (North America), CCS2 (Europe)  
PowerBank System  
*Expected activation of PowerBank throughout 2023 and into 2024:*  
PowerShare vehicle-to-vehicle charging capability  
PowerHouse vehicle-to-home capability  
External Power Outlet: 120V (North America), 230V (Europe)  
Drive Control  
Brake Override System  
Public Charger Cable (Europe only)

### Chassis

Drive Modes: Earth, Fun  
Special Drive Modes: Snow/Ice (*Expected activation in early 2024*)  
Hill Hold Control  
Tilt & Telescoping Steering–Power  
20" F7 AeroStealth wheels  
Optional wheels:  
22" F3 SlipStream, black or silver finish  
22" F5 AirGlider, black or silver finish  
22" F6 Vortex  
Bridgestone Alenza Sport all-season Tyres (North America)  
Bridgestone Potenza Sport summer Tyres (Europe)

### Fisker Intelligent Pilot–Advanced Driver Assistance System (ADAS) features

*Expected activation in early 2023:*  
Automatic Emergency Braking–Premium  
Blind Spot Monitoring  
Lane Keep Assist  
Emergency Lane Departure Avoidance  
Traffic Sign/Light Recognition  
Intelligent Speed Assist  
Driver Drowsiness and Attention Warning  
Parking Assist  
Auto High Beam  
Door Opening Incident Warning

### Body-Exterior

BigSky roof  
Panoramic fixed glass roof with dark see-through tint  
Power Windows, Front and Rear  
Power Liftgate  
Liftgate Window with Privacy Glass  
Rear Quarter Window with Privacy Glass  
See Me Signal  
High mount rear indicator + reflector (North America), indicator (Europe)  
Front Logo / Emblem Lighting (in Park)  
LED Head Lights  
Automatic Headlight Height Adjustment  
LED Daytime Running Lights  
LED Tail Lights  
Rear Fog Light  
Centre High-Mounted Stop Lamp  
Standard Splash Lights  
Acoustic Laminated Glass  
Rear Glass Defogger  
Heated Outside Rear View Mirrors

### Interior

Black Abyss with Black EcoFabric Seat  
Optional interior:  
Black Abyss Plus with Black FeelTek® Seats  
Made with Sustainable Interior Materials and Fabrics  
Taco Tray, Passenger side  
Digital Interior Rear View Mirror  
Dual zone HVAC  
HVAC: front defrosting vents  
Power Driver Seat w/ Easy Entry–6-way  
Power Front Passenger Seat–6-way  
5 Seatbelts  
10 Airbags (Europe), 8 Airbags (North America)  
2nd Row Seat–3-Occupant 40/20/40 Split  
Base Rear Cargo Floor  
Ambient Lighting–Standard  
Premium Air Filtration  
2nd Row Armrest with Cupholder

<sup>3</sup> All prices listed are manufacturer's recommended retail price and include 20% VAT but currently exclude delivery fee and first registration fee. Provisional pricing assumes no import tariff is enacted for delivery from EU. The vehicle is in the homologation process and can currently not yet be purchased. Valid information on place of delivery, registration and insurance can therefore not yet be made and will be given as soon as they are available. Pricing is subject to change and will be calculated when you place your order and will further depend upon specifications and options chosen by you when configuring your final vehicle. Prices depend on specifications and options chosen by you when configuring your final vehicle.

Expected activation in mid-2023:

Front and Side Collision Warning

Expected activation in late 2023:

Rear View Monitor

#### Infotainment

17.1" Central Touchscreen

Fisker Premium Sound

Harman 8 speaker audio system with 3 band equalizer

Wireless Phone Charging-Single Pad

Key Fob

Trim Level

# Fisker Ocean Extreme

**Extreme luxury. Extreme performance. Extreme thrills. £59,900 (in U.K.)<sup>5</sup>**

The Fisker Ocean Extreme lives up to its name. This indulgent trim level comes packed with high-end luxury amenities, delivering a superior driving experience powered by the Hyper Range battery and dual motor all-wheel drive powertrain. A long list of ingenious features includes Smart Traction, Revolve rotating 17.1" central touchscreen with Control Mode (portrait) and Hollywood Mode (landscape), SolarSky roof with solar panels integrated onto a panoramic glass roof with power sliding glass panel, immersive sound system, and a complete suite of Fisker Intelligent Pilot features.

## Standard features on Extreme trim level

### Powertrain

Hyper Range Battery (Nickel Manganese Cobalt)  
Dual Motor AWD with Rear Disconnect  
Smart Traction (*Expected activation in late 2023*)  
Boost Mode  
Regenerative Braking  
Charge Port: CCS1 (North America), CCS2 (Europe)  
PowerBank System  
*Expected activation of PowerBank throughout 2023 and into 2024:*  
PowerShare vehicle-to-vehicle charging capability  
PowerHouse vehicle-to-home capability  
External Power Outlet: 120V (North America), 230V (Europe)  
Drive Control  
Brake Override System  
Heat Pump  
Public Charger Cable (Europe only)

### Chassis

Drive Modes: Earth, Fun, Hyper  
Special Drive Modes: Off-road, Snow/Ice (*Expected activation in early 2024*)  
Hill Hold Control  
Tilt & Telescoping Steering-Power  
Teal Brake Calipers  
20" F7 AeroStealth wheels  
Optional wheels:  
22" F3 SlipStream, black or silver finish  
22" F5 AirGlider, black or silver finish  
22" F6 Vortex  
Bridgestone Alenza Sport all-season Tyres (North America)  
Bridgestone Potenza Sport summer Tyres (Europe)

### Fisker Intelligent Pilot: Advanced Driver Assistance System (ADAS) features

360° surround view with 3D  
*Expected activation in early 2023:*  
Automatic Emergency Braking-Premium  
Blind Spot Monitoring  
Lane Keep Assist

### Body-Exterior

SolarSky roof  
Photovoltaic solar panels integrated onto panoramic glass roof with power sliding glass panel  
California Mode  
All power windows and panoramic glass roof open with one button press  
Power Liftgate  
Power Liftgate Window with Privacy Glass  
Doggie Windows  
rear quarter power windows with Privacy Glass  
See Me Signal  
High mount rear indicator + reflector (North America), indicator (Europe)  
Front Logo / Emblem Lighting (in Park)  
LED Head Lights  
Automatic Headlight Height Adjustment  
LED Daytime Running Lights  
LED Tail Lights  
Rear Fog Light  
Centre High-Mounted Stop Lamp  
Fisker Activate  
Lighting sequence, Proximity Lock, Proximity Unlock, Animated Splash Lights  
Rain-Sensing Wipers  
Acoustic Laminated Glass  
Rear Glass Defogger  
Heated Outside Rear View Mirrors with Auto-dim and Power-fold

### Interior

Black Abyss Plus with Black FeelTek® Seats  
Optional interiors:  
Sea Salt with White Alcantara® Seats  
MaliBlu with Indigo Alcantara® Seats  
Made with Sustainable Interior Materials and Fabrics  
Taco Tray, Driver side  
Taco Tray, Passenger side  
Digital Interior Rear View Mirror

--	--	-----------------------------------	--

## Key Features

# Emotionally Charged Design.

By humans, for humans. The Fisker Ocean wraps a beautiful and timeless Henrik Fisker design around a spacious interior loaded with premium features.

## Modern SUV Design

**The Sleek Shape of Things to Come.** Designed by Henrik Fisker, the all-electric Fisker Ocean is a beautiful new icon of sustainable mobility. While keeping the design language and functionality of an SUV, the Fisker Ocean features a dramatically sculpted exterior with an aggressive stance, clean lines, sleek surfaces, ultra-slim lighting, and modern sculptural shapes.

## Spacious Interior

Powered solely by electricity, the Fisker Ocean's drivetrain and critical systems take up less space than the ones in gas-powered vehicles, freeing us to design without the constraints of traditional SUV packaging. Ingenious configuring maxes out the interior with a spacious cabin, seating for five adults, and flexible storage for surfboards, camping gear, pet carriers, and more.

## California Mode

**Now Streaming: Fresh Air.** Push a button, and eight glass panels open simultaneously to transform a versatile SUV into a coastline-cruising convertible. With our exclusive California Mode, you can drop the front windows, both rear-seat windows, both Doggie Windows, and the Rear Lift Gate Window while opening the SolarSky roof or OpenSky roof at the same time.

Standard on Ultra, Extreme, and One trim.

## Power Liftgate Window and Doggie Windows

Fisker is adding two great warm-weather, California-inspired features: lower the Power Liftgate Window and our unique Doggie Windows (rear quarter power windows on both sides), and let the breeze in. And since you're driving a zero-emissions EV, neither you, your dog, nor anybody else on the road has to breathe in exhaust.

Standard on Ultra, Extreme, and One trim.

## Premium Wheel Designs

Designed for superior performance, the alloy wheels on the Fisker Ocean are inspired works of art and engineering. Choose from an array of dynamic wheel designs and sizes, including the standard 20" F7 AeroStealth wheels with a cover optimized for aero performance or our optional 22" F3 Slipstream, 22" F5 AirGlider, and 22" F6 Vortex premium wheels, designed for exceptional control and a more imposing presence on the road.

# Sustainable Mobility.

The Fisker Ocean is designed to be sustainably in harmony with nature.

## SolarSky roof

**Ride the Sunshine.** With the Fisker Ocean's revolutionary full-length SolarSky roof, you can harvest the sun's rays to generate free energy to support the vehicle's battery-powered motor. When fully exposed to the sun, the Fisker Ocean Extreme's SolarSky can produce up to 1,500 clean, emissions-free miles per year and, under ideal conditions, may increase to beyond 2,000 miles,\* all powered by pure sunshine.

Standard on Extreme and One trim.

\*Based on Fisker simulations. Ideal conditions assume solar irradiation of 5.4 kWh/m<sup>2</sup>/day and steady commuter driving. Actual results vary with conditions such as external environment and vehicle use.

## Sustainable Materials

**How It's Made Matters.** Designed to be the most sustainable SUV on Earth, the Fisker Ocean features a beautifully crafted interior with recycled and ethically sourced materials throughout. The eco-friendly cabin features fabrics like Alcantara®, Ultrasuede®, FeelTek®, EcoFabric, and recycled carpeting, all made using recycled plastic bottles and other recycled polymers.

Using recycled material wherever possible lowers the carbon footprint of producing these durable and beautiful luxury fabrics. In total, the Fisker Ocean will have more than 50 kg of recycled or bio-based materials.

## PowerBank

**Your Fisker Ocean is a Mobile Power Source.** The Fisker EV movement brings more than clean mobility: the PowerBank system accesses your Fisker Ocean's battery as a multi-function mobile power source.

The PowerHouse function uses the battery as an emergency power source to run your entire home for up to seven days\*. In a time of more frequent weather-related emergencies, this backup power system can keep your home running during power outages.

PowerShare connects your Fisker Ocean's charge port to another EV to give a fellow EV owner an emergency boost.

External Power Outlet lets you power appliances, electronics, and more until long after the sun goes down.

Expected activation of PowerBank features throughout 2023 and into 2024.

\*Based on assumption that home power consumption is 50% normal use during emergency situations. Additional equipment for connection to home is required.

# Future-Forward Features.

Loaded with innovative and futuristic features, driving a Fisker Ocean is simple, intuitive, and delightful.

## Revolve

### **A Screen That's Revolutionary**

Revolve, Fisker's revolutionary 17.1-inch rotating touchscreen, has the power to swivel from Control Mode—a portrait view—to Hollywood Mode—a landscape 16:9 widescreen format—allowing you to enjoy movies and videos, complete with 360° sound, in an immersive cinematic experience. Standard on Extreme and One trim.

## Smart Traction

**A Performance Feature That's Gaining Traction.** With Smart Traction, the Fisker Ocean performs more like a sports car than an SUV. This advanced high-performance feature distributes the right amount of torque to the wheels for optimal traction while handling sharp turns. Smart Traction improves stability and traction on wet and icy roads. Plus, it minimizes energy loss and boosts efficiency, so it's more eco-friendly.

Standard on Extreme and One trim. Expected activation in late 2023.

## Park My Car

**Unparalleled Parking Technology.** Park My Car, Fisker's automatic parking assist system, scans the parking area using ultrasonic sensors and cameras to help you find a correct-sized spot. Then, your Fisker Ocean autonomously parks itself, either parallel to the curb or in an angled spot. Park My Car is an optional feature that also detects obstacles in your path, such as pedestrians, poles, and other cars, and automatically applies the brakes. Park My Car is part of the Fisker Intelligent Pilot system. Standard on Extreme and One trim. Expected activation in late 2023.

## Fisker App Personalisation

**Personal E-mobility Just Got More Personal.** With Fisker App Personalisation, you're always connected to your all-electric Fisker Ocean through your smartphone. Communicate directly with your vehicle through intelligent app features such as Remote Locate Vehicle, Vehicle Monitoring, and Remote Climate Control. You can even use the app as the key to your vehicle.

## Immersive Sound System

**Catch Some Epic Soundwaves.** Experience your favourite music on the premium immersive sound system. With 500 watts of power, 16 speakers, a 20.5L subwoofer, and one of the largest 6-channel dashboard speaker arrays of its kind, the immersive sound system surrounds the driver and passengers in a glorious sea of 360° sound.

Standard on Extreme and One trim.

## Limo Mode

**Give Backseat Drivers the Control They've Always Wanted.** Using Limo Mode, Fisker's second-row digital touchscreen control, backseat passengers can relax comfortably while managing the cabin's environment. This optional feature, usually reserved for high-end luxury vehicles, allows second-row passengers to adjust the temperature, fan speed, and media volume. A second control reclines the rear seat electrically for that ultimate limo feel.

Standard on Extreme and One trim.

## Digital Interior Rear View Mirror

The Digital Interior Rear View Mirror is a conventional mirror reflecting what's behind you. Flip a switch and get a clever second option: a digital display from the wide-angle high-definition camera mounted below the rear spoiler. Protected from the elements, the camera gives a wider field of vision than the standard mirror.

Go ahead and fill the cargo area with suitcases, strollers, doggy crates, and tall objects that block the rear window; you can still see behind you, driving forward or backing up, with an unobstructed rear view. Enjoy better clarity during night driving and eliminate head lights behind you reflecting into your eyes.

# Colours

## Meet the Original "Blue Wave" of Fisker Ocean Exterior Colours.

We're a California company with sustainability at our core. We want drivers to love our cars and to feel that electric joy seeing a beautifully sculpted Fisker Ocean wrapped in a gorgeous colour.

### Big Sur Blue Matte

Metallic Matte

**A matte, mineral blue that shines along the coastline.**

Big Sur isn't just a place; it's a state of mind, especially when you cruise the Pacific Coast Highway with your Fisker Ocean.

As you cross Bixby Creek Bridge and approach Big Sur, prepare yourself for 40 miles of the most beautiful coastline on Earth.

The shades of blue — the ocean, the sky, the air, the mist—inspired our only matte finish, Big Sur Blue.

### Great White

Gloss

**A crisp, clean white that highlights curves in powerful detail.**

Great white sharks are known to cruise coastal waters from Baja California to north of Eureka, keeping wintertime surfers checking between their feet for unwelcome visitors.

These graceful, streamlined creatures glide up and down the California coastline; now it's your turn to do the same in a Great White Fisker Ocean.

### Night Drive

Gloss

**An inky-onyx black that's silky, glossy, and satisfyingly dark.**

Driving on a cloudless summer night through Tioga Pass into Yosemite, the Milky Way shines so brightly you can almost reach up and touch it.

Winding your way through the Hollywood Hills down to Sunset, the city lights below brighten the promise of the evening to come. Or just rolling home from work on an average Tuesday night.

It's these bright, late-night drives that inspired the Fisker Ocean in Night Drive, our gloss black that looks good anywhere, any time.

## Blue Planet

Metallic Gloss

**A brilliant, vibrant blue that glistens like Ocean water.**

Our planet is precious.

The Blue Planet hue was born from the brilliant blues we see on our oceans when viewing photographs of Earth from space.

Thinking about the fragility of our big, blue planet inspires Henrik and our entire team to bring you the world's most sustainable vehicles.

## Silver Lining

Metallic Gloss

**A bright, metallic silver that's strikingly bold (and optimistic).**

We look for the silver lining in all we do at Fisker.

That optimism inspires us to work toward A Clean Future for All. It motivates us to find innovative ways to work. It's why we manufacture our vehicles in a carbon-neutral facility and design every material possible to be upcycled, recycled, or reused.

So, that saying about the Silver Lining? Yes, that's what we see when we look at the clouds. We're here to do our part to make the world cleaner.

## Horizon Gray

Metallic Gloss

**A smooth slate-gray with a wintry, glassy glimmer.**

While driving the Pacific Coast Highway on cool winter mornings, something beautiful can happen as you look out toward the horizon.

The slate-gray of the Pacific Ocean blends perfectly into the silver-white of the distant fog, creating a smooth gradient that seemingly lasts forever.

Now it's your turn to find that perfect flow with your Fisker Ocean in Horizon Gray.

## Mariana

Metallic Gloss

**A deep sea-dark blue with a shimmering metallic glint.**

On the western edge of the Pacific Rim lies the Mariana Trench, the deepest place in any ocean on Earth.

This massive, underwater valley (which is deeper than Mt. Everest is tall) inspired our team to create a deeper, darker blue that gives Mariana its unique sea-dark blue hue.

Seven "Blue Wave" colours are available at launch.

Fisker Ocean comes standard in Great White. All other colours are optional.

# Interiors

## Where Design and Sustainability Shine.

Settle into the cabin of the Fisker Ocean, where Design and Sustainability shine. Super-clean, modern interior design is accented by bold, unbroken dashboard lines and crisp metallic details. The eco-friendly cabin of each trim features materials like Alcantara®, Ultrasuede®, FeelTek®, EcoFabric, and recycled carpeting, all made using recycled plastic bottles and other recycled polymers.

### Black Abyss

**Seats: Black EcoFabric**

Standard on Sport and Ultra.

Black Abyss looks sporty, feels comfortable, and surrounds with sustainability. Three different types of durable woven EcoFabric play in subtle contrast against smooth interior surfaces. Dark metallic accents on the dashboard and doors finish the calm, clean, black-on-black look.

EcoFabric is made from 100% recycled plastic water bottle yarn, and carpeting is made from recycled polyester. Every touch of an EcoFabric surface in Black Abyss is a reminder of Fisker's commitment to use less, use better, and use again.

**How It's Made Matters:** The 100% recycled plastic water bottle yarn in EcoFabric is pigmented in the fibre extrusion process to minimize water usage in dyeing and finishing.

### Black Abyss Plus

**Seats: Black FeelTek®**

Standard on Extreme, available option on Sport and Ultra.  
Available option on Ocean One at no extra cost.

Black Abyss Plus blends supple FeelTek® seats with knit EcoFabric surfacing, creating a sporty interior that surrounds with recycled, ethically sourced, and durable comfort. Subtle dark metallic accents on the dashboard and doors add a classic finish to the calm, clean, black-on-black look.

Our luxurious FeelTek® seating is designed to mimic leather's smoothness and breathability.

**How It's Made Matters:** FeelTek® is made of two layers: an underlayer of 100% recycled plastic bottles and a durable and flexible surface coating made from plant-derived products. The fabric is made using eco-friendly "greener chemistries": using recycled fibres instead of virgin fibres to lower the carbon footprint of fabric manufacturing.

## Sea Salt

### Seats: White Alcantara®

Available option on Ultra and Extreme.  
Available option on Ocean One at no extra cost.

Sea Salt's white-on-black interior is as bright as California sunshine. It surrounds with luxurious textures and durable soft-touch materials like Alcantara®. Sea Salt's elegant, high-contrast look is polished to perfection with bright metallic accents and black carpet.

Alcantara® is a truly cutting-edge material made from unique and exclusive technology and combines style, technology, beauty, and functionality. Its soft touch surface is crafted for elegance, breathability, and high grip. Alcantara® offers high durability, excellent stain resistance, high UV performance to resist fading, and it is warm in the winter and cool in the summer.

The white FeelTek® seats and Ultrasuede® dashboard and centre console accents are laser stitch-detailed, bringing classic craftsmanship and finish through modern technique.

**How It's Made Matters:** Alcantara® is certified Carbon Neutral since 2009 after measuring all CO<sub>2</sub> emissions, including every phase of product life cycle, from raw materials to the production process, up to the use and end of life, putting in place measures for their reduction and offsetting the residual emissions.

## MaliBlu

### Seats: Indigo Alcantara®

Available option on Extreme.  
Standard on Ocean One.

MaliBlu brings the California-inspired "Blue Wave" of Fisker exterior colours to full fruition in a rich, balanced, blue-on-black theme. It surrounds with luxurious textures and durable soft-touch materials like Alcantara®. Available only on the Extreme and Ocean One trims, MaliBlu's refined look is polished to perfection with bright metallic accents and black carpet.

Alcantara® is a truly cutting-edge material made from unique and exclusive technology and combines style, technology, beauty, and functionality. Its soft touch surface is crafted for elegance, breathability, and high grip. Alcantara® offers high durability, excellent stain resistance, high UV performance to resist fading, and is warm in the winter and cool in the summer.

	Indigo FeelTek® on seats is laser stitch-detailed, bringing classic craftsmanship and finish through modern technique. Indigo Ultrasuede® details grace the dashboard, centre console, and door accents.

# Sustainable Materials.

## How It's Made Matters.

Designed to be the most sustainable SUV on Earth, the Fisker Ocean features a beautifully crafted interior with recycled and ethically sourced materials throughout. The eco-friendly cabin of each trim features fabrics like Alcantara®, Ultrasuede®, FeelTek®, EcoFabric, and recycled carpeting, all made using recycled plastic bottles and other recycled polymers.

Using recycled material wherever possible lowers the carbon footprint of producing these durable and beautiful luxury fabrics. In total, the Fisker Ocean has more than 50 kg of recycled or bio-based materials.

### Alcantara® (seats)

Alcantara® is a truly cutting-edge material, resulting from unique and exclusive technology, able to offer extreme customisation combining style and technology, beauty, and functionality.

Its technical and sensorial characteristics are:

- Breathability
- High durability and excellent stain resistance
- High UV performance to resist fading
- Lightness
- High-grip surface
- Warm in winter and cool in summer
- Elegance and soft touch

Alcantara® is certified **Carbon Neutral since 2009**, after measuring all CO<sub>2</sub> emissions including every phase of product life cycle, from raw materials to the production process, up to the use and end of life, putting in place measures for their reduction and offsetting the residual emissions.

### Ultrasuede® (dashboard, headliner, centre console, door accents)

Ultrasuede® is a soft-touch material with a luxurious suede-like texture. It is made using polyester fibres derived from recycled polyester and includes environmentally sustainable plant-based polyester. The non-woven 3-ply construction is designed for:

- High durability and excellent stain resistance
- Touchable, plush feel and soft, smooth texture
- Excellent breathability and airflow
- High UV performance to resist fading

Ultrasuede® is produced via a carbon-neutral and closed-loop manufacturing process. By reusing raw materials, capturing and reusing solvents and other chemicals, and using an energy-efficient dye process, the responsible manufacturing process minimizes environmental impact and lowers carbon footprint.

### FeelTek® (seats)

This luxurious upholstery material, designed to mimic leather's smoothness and breathability, is made using eco-friendly bio-chemistry formulations; using recycled fibres instead of virgin fibres lowers the carbon footprint of fabric manufacturing.

FeelTek® is made of two layers: an underlayer of 100% recycled plastic bottles and a supple surface coating made from corn oil and other plant-derived products. This bi-layer low-VOC fabric is designed for the high durability and longevity required for automotive use.

**EcoFabric (seats, cabin details)**

EcoFabric, our sustainable woven fabric, is made from 100% recycled plastic water bottle yarn. The yarn is pigmented during the fibre extrusion process to minimize water usage during dyeing and finishing.

**Carpeting (floor and seats)**

Carpeting in the Fisker Ocean is made of recycled polyester fabrics derived from “post-industrial waste”, leftover scraps, and trims from fabric manufacturing into carpet fibres. Rear cargo mats are made using recycled nylon.

# Wheels

## Slip Through the Wind.

The sculptural shapes of the Fisker Ocean are designed to slip through the wind. The Ocean sits powerfully atop bold and aerodynamic Fisker wheels—works of art that glide like the breeze and deliver all-electric power to the road.

Standard 20" F7 AeroStealth wheels boast a wheel cover optimized for aero performance, and our optional 22" F3 Slipstream and F5 AirGlider wheels are designed for exceptional control and an imposing presence. Efficient and effortless, each design uses as much recycled material as possible to lower the carbon footprint, helping the air you're slipping through be a little bit cleaner.

**All Wheels:**  
Monochromatic Centre Cap Emblem

### 22" F3a SlipStream

Wheel: Black Gloss  
Cover: Upcycled Marbled Carbon Matte  
Accent Trim: Silver Paint

### 22" F3b SlipStream

Wheel: Black Gloss  
Cover: Upcycled Marbled Carbon Matte  
Accent Trim: Black Matte

## Slippery Smooth Style.

Designed to slip through the air, three spokes pass through the centre of 22" F3 SlipStreams in a powerful design, creating the impression of an even larger wheel. Visible carbon flakes in the centre, with strong accents, give the finish a futuristic, structural look.

Bridgestone Alenza Sport all-season tyres (North America), Potenza Sport summer tyres (Europe).

Standard on Fisker Ocean One. Optional on Extreme, Ultra, and Sport trim.

## 22" F5 AirGlider

Wheel: Two-tone Anthracite + Bright Machined/Diamond Cut  
Coating: Matte Clear

## 22" F5 AirGlider

Wheel: Black Gloss

### Power. Glide.

Inspired works of art and engineering, the 22" F5 AirGlider's multi-layered design is sleek and imposing. Aluminium alloy and lighter-weight recycled materials lower the overall carbon footprint and radiate out in a wind-cheating 7-spoke design.

Bridgestone Alenza Sport all-season tyres (North America), Potenza Sport summer tyres (Europe).

Optional at no cost on Fisker Ocean One. Optional on Extreme, Ultra, and Sport trim.

## 22" F6 Vortex

Wheel: Two-tone Black + Bright Machined/Diamond Cut  
Coating: Tinted Matte Clear

### A Beautiful Whirlwind.

The dramatic 10-spoke design of the 22" F6 Vortex spins heads. Designed for superior performance, these silver-on-black two-toned 22"s whisk through the air and deliver a rotating, charge-ahead look even when standing still.

Bridgestone Alenza Sport all-season tyres (North America), Potenza Sport summer tyres (Europe).

Optional at no cost on Fisker Ocean One. Optional on Extreme, Ultra, and Sport trim.

## 20" F7 AeroStealth

Aero Cover: Molded-in-colour recycled plastic, Black Matte

Aero Cover mounts onto Alloy Wheel: Black Matte

### **The Air Won't Notice Them. Everyone Else Will.**

Standard 20" F7 AeroStealth wheels look sharp and present a ghostly profile to the wind. AeroStealths combine two design-forward elements:

- An aero-optimized wheel cover that knifes through the breeze with barely a shudder
- An all-black aluminium alloy backbone wheel that looks handsome and strong standing alone

Fisker proudly shows the sustainable materials utilized in our EVs. AeroStealth wheel covers are made of recycled plastic in an unpainted dark gray, and the flow lines that ripple through the bare, unpainted finish reveal Fisker's pride in the recycled materials beneath. When you drive your Ocean, feel good about the commitment to use less, use better, and use again.

Bridgestone Alenza Sport all-season tyres (North America), Potenza Sport summer tyres (Europe).

Standard on Extreme, Ultra, and Sport trim.

# Fisker User Experience

## Your Connected Drive.

The Fisker user experience is designed to be simple, intuitive, and delightful. Drivers are welcomed by a clean and innovative user interface custom-made for the Fisker Ocean.

Information, content, and vehicle controls are graphically displayed in both Light Mode and Dark Mode on an industry-leading 17.1" Central Touchscreen and Driver Display. Steering wheel controls and a button bar under the touchscreen work in tandem to deliver 360° access to frequently used features like audio, navigation, climate, and driver controls.

The Driver Display's modern visual design reveals deep levels of vehicle information, indicators, and warnings, providing real-time data and driving feedback. An animated energy ripple displays speed, acceleration, and energy use and recapture.

The home screen's beautiful and intuitive interface delivers robust control of Fisker Ocean vehicle functions for both driver and passengers, including:

- A versatile and easy-to-use navigation system
- Interactive range, energy, and charging information
- Cabin climate and comfort controls
- Media, entertainment, and sound system

With its easy-to-navigate menus to access vehicle controls, drivers can adjust and save settings to their profiles to maximize comfort, ease, and convenience in a custom, driver-first system. Pressing the Fisker icon on the button bar returns the driver to the home screen.

For Fisker Ocean One and Extreme drivers, the Revolve Central Touchscreen rotates 90° to enter Hollywood Mode, converting your Fisker EV into an entertainment centre. When safely parked, drivers can access the latest video content from premium streaming sites paired with cinema-quality sound. Vehicle controls are available in Hollywood Mode, allowing occupants to adjust settings, climate, navigation controls, and more while streaming. The touchscreen simply rotates back to vertical when ready to drive.

Starting with the delivery of the first Fisker Ocean One, driver experience features will be added over-the-air (OTA) as they become available. Features and functionality will vary based on trim level selected.

The Fisker Ocean driver experience allows occupants to:

- Adjust the cabin climate for both driver and passengers
- Search, discover, and effortlessly navigate to a destination

- Control Fisker Intelligent Pilot and other safety features
- Listen to the latest music and podcasts from favourite audio streaming apps, including Spotify, iHeartRadio, and TuneIn
- Access movies, TV, and other videos from premium streaming sites
- Sync with smart devices for handsfree calls, SMS messaging, and more
- Save custom driver settings for maximum comfort for multiple drivers
- Schedule and update the car with the latest software and features without disrupting access to the vehicle
- Use Fisker Ocean with Alexa Built-in to control many vehicle functions with voice commands
- Monitor and adjust battery usage with live feedback to help maximize driving habits
- Track SolarSky solar power charging

# Fisker App

## Your Connected Car Experience.

The Fisker App is more than an intuitive way to explore and buy a Fisker EV; it is an evolving personal connection to the simple and delightful Fisker experience. As soon as a Fisker Ocean owner opens the Fisker App, their smartphone connects to their Ocean, creating a seamless, natural extension of the exciting user experience inside their EV. The driver is empowered with connected vehicle features, including cabin climate control, vehicle lock/unlock, passenger entertainment, personalized service, and OTA software upgrades. From the first to the last mile, drivers can customize in-car experiences, stay connected with Fisker, and unlock fun and innovative user modes. The Fisker App will evolve as Fisker technology evolves, becoming a more powerful ownership tool through the vehicle's entire life cycle.

Starting with the delivery of the first Fisker Ocean One, updates to the Fisker App will add features as they become available. Features and functionality will vary based on the trim level selected.

Fisker App features that will become available include:

- Explore Fisker EVs and features
- Reserve Fisker Ocean
- Track Fisker Ocean orders in Virtual Garage
- Configure Fisker Ocean trim level, colour, interior, and other features
- Learn about Fisker's commitment to leadership in design, sustainability, and innovation
- Estimate Fisker Ocean purchase price, including vehicle, packages, accessories, delivery, trade-in, and finance
- Order Fisker Ocean trims as they become available
- Apply for financing through Fisker Finance<sup>SM</sup>
- Finalize purchase of Fisker Ocean trims as they become available
- Use Connected Car features to personalize and remotely control Fisker Ocean
- Download over-the-air (OTA) updates, making the vehicle smarter, safer, and better-performing
- Browse Owner's Guide
- Track vehicle delivery and receive notifications
- Schedule test drives
- Purchase Fisker merchandise
- Purchase vehicle accessories
- Purchase OTA upgrade packages
- Schedule personalized service
- Request roadside assistance
- Select Flexee Lease terms

- Schedule home delivery or pickup
- Find Fisker Lounges, Fisker Centre+ locations, and Fisker Events
- Stay up to date with Fisker communications and rewards

# Packages: Over-the-air (OTA) Upgrades

With over-the-air software upgrades, Fisker EVs become smarter, safer, and perform better.

## Fisker Intelligent Pilot OTA Upgrade

Fisker Intelligent Pilot is our Advanced Driver Assist System, including world's-first Digital Radar System and advanced camera systems and sensors.

Fisker Intelligent Pilot provides a broad range of advanced warning functions, active safety functions, and driver comfort features. Each Fisker Intelligent Pilot feature expands a driver's ability to:

- perceive dangers and react to control the vehicle more safely
- perform the more repetitious parts of driving, enhancing driver safety and comfort.

<b>360° Surround View with 3D</b>	Shows four camera views woven together into one bird's-eye view and adds realistic perspective to Ocean's 360° surround view. Helps driver see areas immediately around perimeter of Ocean during parking.
<b>Evasive Steering Assist (ESA)</b>	If FI Pilot senses a frontal collision threat, ESA alerts driver. If driver steers to avoid a collision threat, ESA monitors for obstacles in the direction the driver steers, guides Ocean away from the threat, and helps steer Ocean back to a straight path. Expected activation in mid-2023.
<b>Park My Car</b>	Automatically scans parking area, finds a spot, then parks Ocean in a straight, angled, or parallel-park spot. While manoeuvring, Park My Car avoids obstacles and automatically brakes when necessary. Expected activation in late 2023.
<b>Integrated Drive Assist</b>	Combines three functions: <ul style="list-style-type: none"><li>• Adaptive Drive Control maintains speed and distance between Ocean and vehicle ahead at highway speeds</li><li>• Traffic Jam Assist is designed for use in stop/start traffic under 40 MPH and automatically follows at a safe distance between Ocean and vehicle ahead</li><li>• Lane Centring Control keeps Ocean in centre of lane</li></ul> Expected activation in late 2023
<b>Lane Change Assist</b>	When a driver signals a lane change with a turn signal, executes lane change for the driver. Expected activation in late 2023.
<b>Rear Cross Traffic Collision Mitigation</b>	While reversing, alerts driver and decelerates, if necessary, when Ocean is in danger of a collision with rear-crossing traffic. Expected activation in mid-2023.

## Performance Package for Fisker Ocean Sport Trim

Adding the Performance Package to your Fisker Ocean Sport enhances performance driving. Each Special Drive Mode optimizes your Ocean Sport's front-wheel-drive powertrain with custom-tuned handling, braking, acceleration, and suspension settings.

<b>Hyper Mode</b>	Optimizes Ocean for highly responsive handling by tuning: <ul style="list-style-type: none"><li>• Quicker response to acceleration demand</li><li>• More active steering assistance</li><li>• More performance-oriented stability control</li></ul>
<b>Boost Mode</b>	Maximizes Ocean's acceleration from a standstill.

## Performance Package for Fisker Ocean Ultra Trim

Adding the Performance Package to your Fisker Ocean Ultra instantly transforms it into several vehicles in one. Each Special Drive Mode optimizes your Fisker Ocean Ultra's all-wheel drive powertrain with handling, braking, acceleration, and suspension settings custom-tuned for performance and off-road driving.

<b>Off-road Mode</b>	Optimizes Ocean's performance and comfort on poor driving surfaces by tuning: <ul style="list-style-type: none"><li>• Medium acceleration response</li><li>• Responsive AWD front-to-rear torque transfer</li><li>• Suspension for a nimble response for bumpy and uneven dirt surfaces.</li></ul> Expected activation in early 2024.
<b>Boost Mode</b>	Maximizes Ocean's acceleration from a standstill.
<b>Smart Traction</b>	Distributes torque between Ocean's front and rear wheels for optimal traction handling sharp turns; when engaged, Ocean performs more like a sports car than an SUV. Improves stability and traction on wet pavement, icy roads, and loose terrain. Expected activation in late 2023.

## Winter Package

For cold-climate drivers and passengers, Winter Package warms up, thaws out, and preps your Fisker Ocean for all-electric driving even in the coldest weather.

<b>Front and Rear Heated Seats</b>	Warms front and rear seats.
<b>Heated Steering Wheel</b>	Warms steering wheel.

<b>Heated Washer Nozzles</b>	Warms windshield washer fluid, improving wipers' effectiveness in icy conditions.
<b>Pre-conditioning</b>	Using Fisker App, lets owner remotely turn on all Winter Mode features and schedule timing to warm cabin. Uses Ocean's battery charge to warm battery pack, warm interior, and warm wipers, while safeguarding Ocean's range by overriding pre-conditioning when charge is low.
<b>Remote Climate Control</b>	Using Fisker App, lets owner set target temperature and schedule time to start warming (or cooling) Ocean interior.
<b>Wiper Defrost</b>	Using heating element in windshield, thaws ice around wiper blades.

## Ultimate Package for Fisker Ocean Ultra and Sport

Maximize your Fisker Ocean Sport or Ultra and make it even easier to control for the driver and more fun and entertaining for passengers. The Ultimate Package offers software upgrades to add comfort and convenience, in-car entertainment, connectivity, and innovative user modes to get the most out of your driving adventures.

The first wave of Ultimate Package for Ultra and Sport includes unlocking Revolve– the 17.1" centre touchscreen's ability, when Ocean is parked, to swivel from Control Mode to Hollywood Mode. Also included are Hollywood Mode Streaming Services, Premium Connectivity, and Valet Mode.

Also included in the package price will be more new connected features that Fisker will add via OTA upgrade as they become available, making your Ultimate Package more valuable over time.

<b>Revolve (Hollywood Mode)</b>	Unlocks the 17.1" centre touchscreen's ability, when Ocean is parked, to swivel from Control Mode's portrait view to Hollywood Mode, a landscape 16:9 widescreen format, allowing you to enjoy movies and videos in an immersive cinematic experience.
<b>Hollywood Mode Streaming Services</b>	Provides passengers access to a variety of premium streaming services through the 17.1" centre touchscreen.
<b>Premium Connectivity</b>	Provides access to higher data rates enabling advanced connectivity features and Hollywood Mode Streaming Services.
<b>Web Surfer</b>	Using cellular connectivity allows passengers to use the 17.1" touchscreen as an Internet browser.
<b>Valet Mode</b>	Gives access with limited functions to guest drivers: <ul style="list-style-type: none"> <li>• Limits speed</li> <li>• Limits access to some features</li> <li>• Automatically locks doors when the guest exits the car and sends an alert to vehicle owner with vehicle location and status.</li> </ul>
<b>Memory Features– Extreme</b>	Linked to customer ID, programs Ocean to remember the personalized position and user settings for each driver.
<b>Rain Sensing Wipers</b>	Automatically activates wipers when the sensor detects rain.

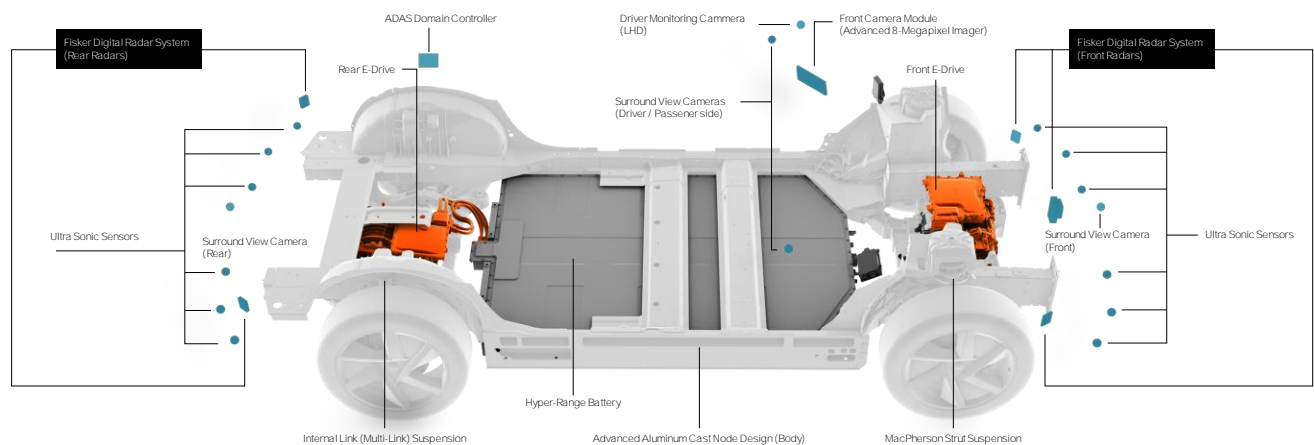

# Fisker Intelligent Pilot

## Fisker's Advanced Driver Assist System

### Perceive. Predict. React.

Fisker Intelligent Pilot is a suite of advanced sensors, including the world's-first Digital Radar System and advanced camera systems and sensors.

Fisker Intelligent Pilot's ability to perceive objects better (see farther, faster, with more precision) and then predict and react enhances driver safety and comfort.

**Fisker Intelligent Pilot integrates four types of sensor hardware** into an advanced driver assistance system. All trims, including Fisker Ocean Sport, are equipped with this ADAS hardware configuration.

### Fisker Digital Radar System

The Fisker Ocean is the world's first vehicle to bring ground-breaking Digital Radar technology to market.

- Five high-definition digital radars on all four corners and front provide 360° coverage
- Detects and tracks obstacles with high levels of precision
  - Detects objects at long range
  - Vehicle detection @ 200m
  - Pedestrian detection @ 80m
  - High resolution radar delivers high level of detail
  - Can locate smaller objects more quickly and precisely
  - Faster scan rate than analogue radar for faster response time

### Digital Cameras

- One Front View Camera Module
  - Highest resolution (8 MP) on market
  - Latest-generation vision system from market leader
  - Powerful Object Detection capability
- Four Surround View cameras (front, back, left, right)
  - Combine to create a 360° surround view

### **Ultrasonic Sensors**

- Array on front and rear bumper
  - For sensing close-proximity objects

### **Driver Monitoring Camera**

- One camera module mounted in-cabin on A-Pillar
  - Monitors driver drowsiness and attention

### **What Makes Digital Radar Better?**

Fisker Digital Radar System senses obstacles with high levels of precision to deliver driver safety in situations better than analogue radar.

- Sees into darkened and contained roadway spaces, like tunnels and bridges
- Improved detection of smaller vehicles in traffic (like a motorcycle between two trucks)
- Improved “separation” of pedestrians from objects behind them
- Better detection of low-lying objects on road

#### **Fisker Intelligent Pilot Key Benefits**

A “cocoon of safety” around the vehicle in highway driving, city traffic, and bad weather. Safe, comfortable, convenient.

Corner-mounted Digital Radar is better at sensing objects crossing your path from sides than analogue radar.

#### **World's First**

In November 2022, the Fisker Ocean will be the world's first vehicle to bring ground-breaking Digital Radar technology to market.

See Fisker Intelligent Pilot video [here: https://www.youtube.com/watch?v=pggJIBnQPVo](https://www.youtube.com/watch?v=pggJIBnQPVo)

### **Fisker Intelligent Pilot –Functions and Features List**

Fisker Intelligent Pilot provides a broad range of advanced warning functions, active safety functions, and driver comfort features.

Each Fisker Intelligent Pilot feature expands a driver's ability to:

- perceive dangers and react to control the vehicle more safely
- perform the more repetitious parts of driving for greater safety and comfort

Trim levels come equipped with different sets of Fisker Intelligent Pilot features. Many FI Pilot features will be activated throughout 2023 as they become available.

## Sport/Ultra

## Extreme, One; all features in Sport/Ultra, plus:

<p><i>Expected activation in early 2023:</i></p> <ul style="list-style-type: none"><li>Automatic Emergency Braking-Premium</li><li>Blind Spot Monitoring</li><li>Lane Keep Assist</li><li>Emergency Lane Departure Avoidance</li><li>Traffic Sign/Light Recognition</li><li>Intelligent Speed Assist</li><li>Driver Drowsiness and Attention Warning</li><li>Parking Assist</li><li>Auto High Beam</li><li>Door Opening Incident Warning</li></ul> <p><i>Expected activation in mid-2023:</i></p> <ul style="list-style-type: none"><li>Front and Side Collision Warning</li></ul> <p><i>Expected activation in late 2023:</i></p> <ul style="list-style-type: none"><li>Rear View Monitor</li></ul>	<ul style="list-style-type: none"><li>+ 360° surround view with 3D</li></ul> <p><i>Expected activation in mid-2023:</i></p> <ul style="list-style-type: none"><li>+ Evasive Steering Assist</li><li>+ Rear Cross Traffic Collision Mitigation</li></ul> <p><i>Expected activation in late 2023:</i></p> <ul style="list-style-type: none"><li>+ Integrated Drive Assist</li><li>Includes:<ul style="list-style-type: none"><li>+ Traffic Jam Assist</li><li>+ Adaptive Drive Control</li><li>+ Lane Centring Control</li></ul></li><li>+ Lane Change Assist</li><li>+ Park My Car<ul style="list-style-type: none"><li>Automatic parking spot finder</li></ul></li></ul>
--	--

## Fisker Intelligent Pilot features in Sport and Ultra trim level

*Features with expected activation in early 2023:*

### **Auto High Beam**

When activated at night, keeps high beam head lights for optimal night-time visibility, then automatically switches to low beam when it detects upcoming traffic or a vehicle in front.

### **Automatic Emergency Braking (AEB)–Premium**

Alerts and, if needed, decelerates in situations when the Ocean is in danger of Front, Front Cross Traffic, Rear, and Turning Across Path collision with another vehicle.

### **Blind Spot Monitoring**

Alerts driver if there is a vehicle in the Ocean's blind spot on either side or fast approaching it.

### **Lane Keep Assist**

Helps driver prevent accidents from unintended lane departures by gently bringing the Ocean back to the lane.

### **Emergency Lane Departure Avoidance**

Helps to prevent accidents from lane departures when potential threat or road edge is present by turning steering wheel to bring the Ocean back into the lane.

### **Traffic Sign/Light Recognition**

Using the Front Camera Module, recognises all kinds of traffic signs and traffic lights.

### **Intelligent Speed Assist**

Helps driver not exceed speed limit identified by Navigation System and Traffic Sign Recognition and alerts driver when speed limit is being exceeded and helps the driver to slow down.

### **Driver Drowsiness and Attention Warning**

Using the Driver Monitoring Camera in the vehicle interior, alerts the driver when the system detects driver's diminished attentiveness and drowsiness.

### **Parking Assist**

Using the Ocean's sonars and cameras helps the driver park into parking spot by visual and acoustic warnings.

### **Door Opening Incident Warning**

An alert feature warns the driver and passengers as they exit the parked vehicle of approaching cars, motorcycles, and bicycles that may pass close by from behind.

*Features with expected activation in mid 2023:*

**Front and Side Collision Warning**

Warning stage of Automatic Emergency Braking: Ocean acts after it detects collision threat with another vehicle by issuing multi-stage visual and audible alerts. At last stage warnings, Ocean pre-conditions brakes to support driver in avoiding collision threat.

*Features with expected activation in late 2023:*

**Rear View Monitor**

Helps drivers see objects directly behind the Ocean while reversing.

## **Fisker Intelligent Pilot Features in Extreme and One: All Fisker Intelligent Pilot features in Sport and Ultra trim levels, plus:**

### **360° surround view with 3D**

Four camera video streams of the Ocean's immediate surroundings are processed and stitched together seamlessly into one single birds-eye, side and/or rear 2D views. This helps the driver see areas they cannot see with the naked eye, enabling safer navigation around static and moving objects. Adds realistic spatial perspective to the Ocean's 360° surround view.

*Features with expected activation in mid-2023:*

### **Rear Cross Traffic Collision Mitigation**

Alerts and, if needed, decelerates in situations when the Ocean is in danger of collision with rear crossing traffic while reversing.

### **Evasive Steering Assist (ESA)**

If system detects frontal collision threat, where braking may not completely avoid the situation, Evasive Driver Assist alerts the driver to take action. If driver steers to the side, Ocean's ESA guides vehicle away from the threat while monitoring for the presence of obstacles in the direction the driver steered and helps straighten the vehicle.

*Features with expected activation in late 2023:*

### **Lane Change Assist**

A "hands-on" feature that changes the Fisker Ocean's lane. When the driver decides to change lanes and activates the turn signal, Lane Change Assist executes the lane change for the driver.

### **Integrated Drive Assist**

Integrated Drive Assist combines three functions into one integrated feature:

#### **Adaptive Drive Control**

Maintains vehicle at a target speed while keeping a safe distance between your Ocean and traffic ahead.

#### **Traffic Jam Assist**

Designed to operate at speeds under 40 miles per hour, Traffic Jam Assist automatically follows the lead vehicle.

#### **Lane Centring Control**

Lane Centring keeps the vehicle in the centre of its lane.

### **Park My Car**

Park My Car, Fisker's automatic parking assist system, scans the parking area using ultrasonic sensors and cameras to help you find a correct-sized spot. Then, your Fisker Ocean autonomously parks itself, either parallel to the curb or in an angled spot. Park My Car is an optional feature that also detects obstacles in your path, such as pedestrians, poles, and other cars, and automatically applies the brakes.

## Pricing

### Fisker Ocean trims and base purchase prices

	<b>Sport</b>	<b>Ultra</b>	<b>Extreme/ONE</b>
U.S.	\$ 37,499 <sup>1</sup>	\$ 49,999 <sup>1</sup>	\$ 68,999 <sup>1</sup>
Canada	\$ 43,999 <sup>2</sup>	\$ 63,999 <sup>2</sup>	\$ 89,999 <sup>2</sup>

<sup>1</sup> Pricing shown is for the continental U.S. and excludes delivery, finance, and government charges. Maintenance is not included. Pricing is subject to change and will be calculated when you place your order and will further depend upon specifications and options chosen by you as you configure your actual vehicle closer to production. Various state and federal incentives and benefits which may be available to you are not included.

<sup>2</sup> Pricing shown for Canada excludes delivery, finance, taxes, and other government charges. Maintenance is not included. Pricing depends upon specifications and options chosen by you as you configure your actual vehicle closer to production. Pricing does not include federal or provincial incentives and benefits which may be available to you.

## Fisker Flexee Lease

Fisker offers two great ways to get into your emissions-free Fisker Ocean: Fisker Flexee subscription and Purchase. Our Flexee Lease option does away with long-term commitments and includes a 30,000-mile annual driving allowance.<sup>3</sup> Fisker Flexee Lease is similar to a subscription model, not a traditional lease. Your new Fisker Ocean is delivered directly to your door or picked up from a Fisker-owned delivery centre. Then, just notify Fisker and return the vehicle when you desire.

Specific timing and terms on Flexee Lease of Fisker Ocean Sport and other Fisker Ocean trim levels will be available at a later date.

<sup>3</sup> Flexee Lease starts at \$379/month with no set term. Monthly payment will vary based upon customer selected packages and equipment. Pricing excludes \$2,999 initiation fee, delivery, government fees, insurance, and \$299 return fee. Flexee Lease is available to qualified customers meeting lender requirements. Not everyone will qualify. 30,000 allowed annual mileage is prorated on a monthly basis and excess mileage charges may apply.

## Availability

The Fisker Ocean will launch in the United States in November 2022 and Canada in late 2023, starting with the Fisker Ocean One launch edition.

## **Fisker Lounges, Fisker Centre+ locations**

Fisker will open our first Fisker Lounge in the U.S. at The Grove in Los Angeles in early 2023. Get updates on plans for additional Fisker Lounges and Fisker Centre+ locations in key U.S. cities by following Fisker on social media, downloading the Fisker App, and visiting [fiskerinc.com](https://fiskerinc.com).

# Europe

## Pricing

### Fisker Ocean Trim Pricing:

	<b>Sport</b>	<b>Ultra</b>	<b>Extreme</b>
Denmark	325,000 DKK <sup>1</sup>	445,000 DKK <sup>1</sup>	595,000 DKK <sup>1</sup>
France	€ 41,900 <sup>1</sup>	€ 57,500 <sup>1</sup>	€ 69,950 <sup>1</sup>
Norway	372,000 NOK <sup>1</sup>	510,000 NOK <sup>1</sup>	625,000 NOK <sup>1</sup>
Sweden	450,000 SEK <sup>1</sup>	615,000 SEK <sup>1</sup>	755,000 SEK <sup>1</sup>
United Kingdom	£ 34,990 <sup>2</sup>	£ 48,900 <sup>2</sup>	£ 59,900 <sup>2</sup>

<sup>1</sup>Prices shown above are according to 2022 tax calculation rules. Prices according to the 2023 tax calculations will be shared soon. Maintenance is not included. Pricing depends upon specifications and options chosen by you as you configure your actual vehicle closer to production. Pricing does not include government incentives that you may be entitled to. Trim levels, equipment, and select features are subject to change and may not be immediately available.

<sup>2</sup>All prices listed are manufacturer's recommended retail price and include 20% VAT but currently exclude delivery fee and first registration fee. Provisional pricing assumes no import tariff is enacted for delivery from EU. The vehicle is in the homologation process and can currently not yet be purchased. Valid information on place of delivery, registration and insurance can therefore not yet be made and will be given as soon as they are available. Pricing is subject to change and will be calculated when you place your order and will further depend upon specifications and options chosen by you when configuring your final vehicle. Prices depend on specifications and options chosen by you when configuring your final vehicle.

## Availability

The Fisker Ocean launches in Europe in November 2022 in Germany, Austria, Denmark, Sweden, and Norway. The Fisker Ocean launches in France in April 2023 and the U.K. in June 2023, followed by Belgium and The Netherlands in September 2023. Switzerland, Spain, Italy, and Portugal will launch in November 2023.

The Fisker Ocean One launch edition will be limited in selected volumes to Germany, Austria, Denmark, Sweden, Norway, France, and the U.K.

*(From Fisker Ocean One pre-order deposit campaign 1 July 2022).*

## Fisker Lounges, Fisker Centre+ locations

In early 2023, Fisker will open the first Fisker Lounge in Munich and the Fisker Centre + locations in Vienna and Copenhagen. Get updates on plans for additional Fisker Lounges and Fisker Centre+ locations in Oslo, Stockholm, Paris, and London by following Fisker on social media, downloading the Fisker App, and visiting [fiskerinc.com](https://www.fiskerinc.com).

# Service, Global

Fisker ownership comes with the convenience and flexibility to drive to all sorts of destinations. After clocking thousands of emissions-free miles, drivers may need service, new tyres, or other maintenance, so Fisker Service will offer a comprehensive collision and repair network, easily accessed through the Fisker App 24/7. Drivers can schedule service, request roadside assistance, and arrange alternate transportation quickly and easily.

Delivering a world-class Fisker customer experience to make vehicle service simple, transparent, and on a customer's terms is the foundation of everything Fisker does. Servicing EVs at a Fisker Authorized location ensures that vehicles receive genuine OEM (Original Equipment Manufacturer) parts and precision care from factory-trained technicians. Fisker will oversee authorized service, maintenance, and collision repair, returning a Fisker Ocean to a driver with a just-off-the-assembly-line feel. Fisker Ocean service scheduling starts November 18<sup>th</sup>, 2022.

Fisker will offer personalized service solutions based on the nature of service a Fisker Ocean needs. Fisker Service facilities, Fisker Mobile Service, and OTA (over-the-air) software updates all deliver prompt resolution to service issues.

Starting in 2023, owners can also schedule individualized Fisker Service guided by the Fisker App to their closest service location.

Fisker Service supports the company's industry-leading basic warranty of six years, 60,000 miles /100,000 kilometres; powertrain warranty of 10 years, 100,000 miles/160,000 kilometres; and battery warranty of 10 years, 100,000 miles/160,000 kilometres (whichever comes first in all cases). The Fisker Ocean warranty also includes corrosion coverage and roadside assistance.

# Delivery Experience, Global

## The Start of Something Beautiful.

Vehicle delivery is the highly anticipated moment when an owner begins to "Live Electric" with their exciting new Fisker Ocean. The Ocean delivery experience is an owner's individualized introduction to their new EV: simple to operate, fun to drive, easy to maintain, and convenient to service.

Before delivery, an owner stays up to date through their Fisker account on the production, delivery sequence, and location of their Fisker Ocean.

Fisker Ocean One owners will begin taking delivery of their EVs by choosing the location option best suited to them.

### **Home Delivery**

Using their Fisker account, a new owner provides Fisker with options for their preferred delivery date. Fisker quickly confirms the appointment, scheduling the new EV to arrive in an owner's driveway within a convenient time window. Owners can track the location of their new EV throughout the delivery process. Delivery options vary depending on country.

### **Fisker Centre+ Locations, Fisker Lounges, and Fisker Regional Delivery Events**

Depending on location and availability, an owner may schedule their delivery appointment through their Fisker account and receive their new EV at their selected location.

At each delivery, Fisker Advisors provide one of three personalized Delivery Experiences based on the new owner's schedule and needs:

- A quick orientation for 5 minutes
- A more thorough get-to-know-your-Ocean for 20 minutes
- A "Tell me everything" deep dive for 40 minutes

Depending on the option chosen, these experiences include vehicle access and operation, Owner's Guide, connectivity, an exterior tour, Fisker Intelligent Pilot, and a familiarisation drive (where available). In addition, Fisker Rådgivers are available for follow-up questions.

Starting in late 2023, Fisker's Digital Delivery, a library of resources and video guides on the Fisker App, will be available for those who prefer a contact-free experience. If an owner needs more guidance with a Fisker Advisor, they can schedule a delivery follow-up appointment at any time.

Fisker's commitment to sustainability, design, and innovation arrives in full force with the delivery of a new EV, starting an exciting, simple, and delightful ownership experience.

## **North America:**

Home deliveries live up to Fisker's commitment to sustainability. If an owner lives within 50 miles of one of a Fisker's Centre+ or a strategically located vehicle processing centre, open air carriers will be used to deliver their Fisker Ocean right to their driveway. Fisker limits carbon footprint by using transports that maximize cargo and that monitor and select the most efficient routes. Whenever possible, Fisker uses

electric transport vehicles. To align with the commitment to sustainability and transparency, Fisker will track and publicly report all CO<sub>2</sub> emitted.

For deliveries of over 50 miles, enclosed carriers ensure the owner receives a clean vehicle at delivery. Delivery options vary depending on country.

### **Europe:**

Home deliveries live up to Fisker's commitment to sustainability. When possible, Fisker will drive the new EV directly to the new owner's home, eliminating emissions from delivery vehicles. When transports are required to deliver the new EV directly to the customer, Fisker limits carbon footprint by maximizing cargo and selecting the most efficient routes from strategically located vehicle processing centres. To align with the commitment to sustainability and transparency, Fisker will track and publicly report all CO<sub>2</sub> emitted.

Delivery options vary depending on country.

## **Test Drive, Global**

### **Meet Your All-Electric Future.**

Prospective Fisker Ocean owners can schedule a test drive at one of our Fisker Centre+ locations, pop-up test drive events, and selected Fisker Lounges, all by booking an appointment through their Fisker account.

Test drive participants receive:

- An introduction to a dedicated Fisker Advisor
- A walk-around of the Fisker Ocean
- A pre-drive "features and functions" demo
- A customized test drive based on a test driver's commute, driving preferences, and specific personal questions about Fisker EVs.

Throughout the assessment, drivers will experience the excellent driving dynamics, emissions-free all-electric power, in-cabin comfort, and sustainable luxury Fisker offers in each trim level of the Fisker Ocean. Trim level availability for a test drive depends on the test drive location.

# Home Charging Solutions, Global

## Wallbox

**Fisker has named Wallbox, a leading provider of electric vehicle and energy management solutions worldwide, as Fisker's global partner for home EV charging solutions.**

Fisker and Wallbox are partnering to offer Fisker EV owners Wallbox home EV chargers for purchase through the Fisker website in the U.S., Canada, and European launch markets. The Pulsar Plus, Wallbox's best-selling charger worldwide and one of the smallest smart universal EV chargers, will be available to the North American market through Fisker.

In Europe, Fisker will be the first OEM to offer Wallbox's Pulsar Max charger, providing localized charging solutions to drivers in seven European countries. Like Pulsar Plus, Pulsar Max delivers top charging speeds and offers the full Wallbox energy management suite, including solar charging, so users can enjoy their EVs to the fullest.

Both chargers display customized Fisker and Wallbox logos and can be installed in homes, offices, and multi-unit dwellings to provide straightforward and efficient charging.

Fisker and Wallbox also plan to offer home installation services provided by Wallbox in Europe. In the U.S. and Canada, installation services will be provided by COIL, a recent Wallbox acquisition.

Wallbox Pulsar Plus smart chargers will be available to Fisker Ocean reservation holders starting November 2022 in the U.S. and Canada. Wallbox Pulsar Max smart chargers will be available to Fisker Ocean reservation holders beginning November 2022 in our European launch markets:

Austria, Denmark, France, Germany, Norway, Sweden, and The United Kingdom. Pricing to be announced.

*(from Wallbox Press Release 9/20/22)*

- The Fisker Wallbox chargers will charge the Fisker Ocean up to 5 times faster than a standard household electrical outlet.
- The Fisker Wallbox home charger will add an estimated 20-30 miles / 32-48 km of range per hour, depending on your battery and country. This is enough to fully charge overnight for most owners.
- Pulsar Plus chargers are safe for installation and use indoors and outdoors. Pulsar Plus chargers are NEMA Type 4 rated for water and dust resistance.
- Pulsar Max chargers are safe for installation and use indoors and outdoors. The Pulsar Max offers an improved IK 10 protection rating.

*(from fiskerinc.com/faq 20 September 2022)*

## Public Charging Solutions

**Fisker Ocean enables public charging in the U.S., Canada, and Europe by utilizing the popular CCS charging standards.**

### **North America:**

More information on Fisker public charging partnerships in North America is coming soon.

### **Europe:**

In Europe, Fisker is collaborating with Allego, a leading pan-European public charging network with over 34,000 charging ports, which spans regular, fast, and ultra-fast charging solutions. Fleet and private customers buying a Fisker Ocean between 1 January 2023, and 31 March 2024, will benefit from one year of free charging on the Allego network in 11 countries throughout the region.

More information on Fisker public charging partnerships in Europe is coming soon.

# Fisker Finance<sup>SM</sup>

**Fisker Finance<sup>SM</sup> is a digital financing platform offering seamless and convenient loan purchase options\* to Fisker customers.**

Starting with buyers of the Fisker Ocean One, the Fisker Finance<sup>SM</sup> direct-to-consumer digital platform will enable customers to apply for vehicle financing\*, receiving competitive, personalized decisions, plus the ability to finance vehicle accessories such as home charging equipment and factory-installed accessories.

Customers will be able to navigate the digital loan process at their own pace. Starting with the credit application on fiskerinc.com or Fisker's app, applicants can select a retail financing structure that best fits their needs. Customers will be able to review their financing details and electronically sign documents online. Following vehicle delivery, Fisker owners can digitally access their account, make payments, and obtain personalized customer support.

Fisker has nominated Chase\*\* in the U.S. and Santander Consumer Finance\*\*\* in Europe as retail financing partners, as noted in its February 2022 earnings release, with more announcements to come.

Fisker Finance<sup>SM</sup> plans to begin offering financing in the fourth quarter of 2022. Fisker expects to nominate financing partners in additional regions, with more announcements to come.

\* Subject to approval. Terms and conditions apply. This is not a commitment to lend. Program, rates, terms, and conditions are subject to change without notice.

\*\* JPMorgan Chase Bank, NA will decide, originate, and service loans for Fisker customers in the US under the licensed program name, Fisker Finance<sup>SM</sup>.  
(from Fisker press release 7 July 2022)

\*\*\* Santander will decide, originate, and service loans for Fisker customers in Europe under the licensed program name, Fisker Finance<sup>SM</sup>.

# Fisker Ocean Warranty

The Fisker Ocean Limited Warranty supports our commitment to provide dependable vehicles of high quality and reliability. Every part of the Fisker warranty and service experience is designed for convenience and trust in the Fisker brand.

Category	Terms	Years / Mileage	Years / Kilometres
Basic Warranty	years/miles or kms	6 / 60,000 miles	6 / 100,000 km
Powertrain Warranty	years/miles or kms	10 / 100,000 miles	10 / 160,000 km
Battery Warranty	years/miles or kms / % state of health	10 / 100,000 miles / 75%	10 / 160,000 km / 75%
Corrosion	years/miles or kms	12 / Unlimited mileage	12 / Unlimited km
Roadside	years/miles or kms	6 / 60,000 miles	6 / 100,00 km

Fisker's New Vehicle Limited Warranty is included with every Fisker Ocean purchased from Fisker.

## **Comprehensive**

The cost of all parts and labour necessary for any defective materials are covered for 6 years or 60,000 miles / 6 years or 100,000 kilometres, whichever comes first

## **Powertrain**

Coverage includes the drivetrain and components for 10 years or 100,000 miles / 10 years or 160,000 kilometres, whichever comes first

## **Battery Pack**

Coverage includes all components inside the high-voltage battery and 75% or more of the battery capacity for 10 years or 100,000 miles / 10 years or 160,000 kilometres, whichever comes first

## **Corrosion** (Perforation)

Undamaged body panels that are perforated by corrosion will be covered for 12 years with unlimited miles

## **Roadside Assistance**

Included with your vehicle for repairs that are covered under the New Vehicle Limited Warranty — 6 years or 60,000 miles / 6 years or 100,000 kilometres, whichever comes first. Roadside Assistance for non-warranty repairs is also available at the vehicle owner's expense.

A full list of warranty coverage will be in the digital Warranty Guide prior to production vehicles being available for purchase.

# Fisker Partnerships

## **Magna (Magna International Inc.)**

### **Manufacturing–Fisker Ocean**

Fisker and Magna International confirmed production of the all-electric Fisker Ocean SUV starts on Nov. 17, 2022, at Magna's world-class manufacturing carbon-neutral facility in Graz, Austria, where they have produced more than 3.7 million cars and SUVs, including EVs, for several global luxury automakers.

Fisker Ocean production will begin in Graz, Austria, in November 2022 through collaboration with Magna in a carbon-neutral facility powered by 100% renewable energy including on-site solar and hydroelectric power. Magna places primary focus on reducing its consumption of raw materials and energy and minimizing the release of waste materials.

Magna's alignment with Fisker's commitment to sustainable manufacturing is foundational to the Fisker / Magna partnership.

## **CATL**

### **Battery Supplier**

Fisker and CATL teams have been in close collaboration since 2020 to develop class leading Fisker battery solutions optimized for vehicle structure, crashworthiness, and very high levels of energy density.

CATL will supply two different battery solutions for the Fisker Ocean SUV. The primary high-capacity pack, to be used in the Hyper Range battery packs in the Fisker Ocean One, Extreme, and Ultra trims, uses a Nickel Manganese Cobalt (NMC) cell chemistry.

A second high value pack offering CATL's latest cells based on Lithium Iron Phosphate (LFP) chemistry will power the Fisker Ocean Sport trim.

## **Bridgestone**

### **Tyres**

Automotive innovator Fisker has selected Bridgestone as the exclusive tire partner for its all-electric Fisker Ocean, which will start production in 2022. Environmentally-focused Fisker identified Bridgestone as a partner with a strong focus on sustainability across its entire value chain, from R&D and product development to manufacturing and retail.

The tyres on the Fisker Ocean are engineered with Bridgestone's "ENLITEN" technology, which both minimizes rolling resistance by up to 30% and reduces weight by up to 20%. Lower rolling resistance means the tire has less friction as it glides over the road, all without compromising traction and improving range. Also, the tyres are made with fewer raw material resources, carrying both an environmental benefit and an end-of-life stage management.

## **Wallbox**

### **Home Charging Solutions**

Fisker has named Wallbox, a leading provider of electric vehicle and energy management solutions worldwide, as Fisker's global partner for home EV charging solutions.

Fisker and Wallbox are partnering to offer Fisker EV owners Wallbox home EV chargers for purchase through the Fisker website in the U.S., Canada, and European launch markets. The Pulsar Plus, Wallbox's best-selling charger worldwide and one of the smallest smart universal EV chargers, will be available to the North American market through Fisker. Wallbox solutions enable integration of renewable energy if the homeowner chooses that as a power source.

In Europe, Fisker will be the first OEM to offer Wallbox's Pulsar Max charger, providing localized charging solutions to drivers in seven European countries.

## **Merchandise**

All Fisker merchandise is sourced in the USA and sustainably made from either recycled materials or organic cotton. Shop for Fisker gear at <https://store.fiskerinc.com>.
