

For Immediate Release

Fisker to Partner with Bridgestone for Electric Vehicle Services and Solutions in France and Germany

- **Bridgestone to provide total after-sales services for Fisker customers in France and Germany, consistent with the asset-lite business model being deployed across the Fisker business globally.**
- **Bridgestone to deliver support in France through select locations from their Speedy network at 450+ locations and in Germany at 300+ locations under their Pitstop and Reiff-ABS networks.**
- **In August this year, Fisker announced that Bridgestone had been selected as the exclusive tyre partner for the Fisker Ocean all-electric SUV that will be launched in several European markets during 2022 including France and Germany.**

MUNICH / BRUSSELS (Dec. 21, 2021) — [Fisker Inc.](https://www.fisker.com) (NYSE: FSR) (“Fisker”) – passionate creator of the world’s most sustainable electric vehicles and advanced mobility solutions – today announced it has signed a Memorandum of Understanding (MOU) with [Bridgestone](https://www.bridgestone.com) – a global leader in tyres and rubber providing solutions for safe and sustainable mobility – to provide comprehensive after-sales and related maintenance solutions in France and Germany.

After recently selecting Bridgestone as the exclusive tyre partner for its upcoming Ocean all-

electric SUV, Fisker is extending its collaboration with the global company. As part of this new partnership, and as an industry first, Bridgestone will leverage its EV-ready retail and service network to provide Fisker's customers in France and Germany with extensive after-sales services throughout the Speedy, Pitstop and Reiff-ABS networks, all part of Bridgestone's extended retail network in Europe. Speedy includes over 450 locations throughout France, while in Germany, the combination of Pitstop and Reiff-ABS offers services at more than 300 locations across the country. Fisker will work with Bridgestone to select the most appropriate sites from its extensive service network in France and Germany to address Fisker's customers' needs and specificities.

Collaborating to provide better solutions

"From Nov. 17, 2022, we will start production and deliveries of the Fisker Ocean SUV, with France and Germany among the first European markets to launch," commented Fisker Chairman and Chief Executive Officer, Henrik Fisker. "Our partnership with Bridgestone is being activated across multiple areas of our business and we have been consistently impressed with Bridgestone's investment into the future of clean mobility and focus on innovative products and service solutions for the next generation of electric vehicles. The fact that Bridgestone offers unique end-to-end services and packages – including original equipment fitments, after-sales and mobility solutions to mobility players – is key. The ability to make use of their extensive network to provide our own after-sales servicing will be crucial to Fisker's long-term success."

Driving EV adoption through a fully integrated approach

"As part of our commitment to help shape a sustainable future of mobility, Bridgestone is supporting the adoption of EVs through a fully integrated approach. This includes the development of premium tyres and tyre technologies for EVs, along with dedicated fleet and mobility solutions," said Laurent Dartoux, President and CEO, Bridgestone EMIA. "It also entails the development of an end-to-end EV-ready retail and service network, which includes EV maintenance and tyre services, EV charging and mobile services for EVs all together under one roof."

"Fisker's passion for sustainable innovation and their mission to make sustainable EVs more accessible aligns perfectly with our own goals," adds Dartoux. "Partnering with innovators like Fisker is a key element to our approach and we are proud to put our strong footprint and all the

capabilities of our EV-ready retail network at the disposal of their customers.”

Fisker will commence production of the Fisker Ocean SUV on Nov. 17, 2022, at the carbon-neutral factory of Fisker’s manufacturing partner, Magna-Steyr, in Graz, Austria. The Fisker Ocean, in Sport trim level, is priced (before local incentives) at €41,560 in Germany and €41,900 in France, will have an estimated range of 250 miles (EPA test cycle) / 275 miles or 440 kilometers (WLTP test cycle) and feature a sleek, stylish design, as well as innovative automotive technology and a sustainable interior made from recycled materials. The range-topping Fisker Ocean Extreme will deliver up to an estimated range of 350 miles (EPA) / 390 miles or 630 kilometers (WLTP). Fisker worked extensively with battery supplier CATL, using two different chemistries, to maximize performance and minimize cost for the Fisker Ocean lineup.

Forward-Looking Statements

This press release includes forward-looking statements, which are subject to the "safe harbor" provisions of the US Private Securities Litigation Reform Act of 1995. These statements may be identified by words such as "feel," "believes," "expects," "estimates," "projects," "intends," "should," "is to be," or the negative of such terms, or other comparable terminology and include, among other things, the quotations of our Chief Executive Officer and statements regarding the planned start of production and MSRP of the Ocean, the Company's future performance and other future events that involve risks and uncertainties. Such forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties, which could cause actual results to differ materially from the forward-looking statements contained herein due to many factors, including, but not limited to: Fisker's limited operating history; Fisker's ability to enter into additional manufacturing and other contracts with Magna, or other OEMs or tier-one suppliers in order to execute on its business plan; the risk that OEM and supply partners do not meet agreed upon timelines or experience capacity constraints; Fisker may experience significant delays in the design, manufacture, regulatory approval, launch and financing of its vehicles; Fisker's ability to execute its business model, including market acceptance of its planned products and services; Fisker's inability to retain key personnel and to hire additional personnel; competition in the electric vehicle market; Fisker's inability to develop a sales distribution network; and the ability to protect its intellectual property rights; and those factors discussed in Fisker's Annual Report on Form 10-K, as amended, under the heading "Risk Factors," filed with the Securities and Exchange Commission (the "SEC"), as supplemented by Quarterly Reports on Form 10-Q, and other reports and documents Fisker files from time to time with the SEC. Any forward-looking statements speak only as of the date on which they are made, and Fisker undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date of this press release.
