

Explore the DermaLab Combo 4

Fourth edition of the most professional tool for in-depth skin analysis

Maximize your success

The DermaLab Combo is a flexible and professional instrument that allows you to meet every need for skin measurement.

Let the DermaLab Combo support your professional work and maximize your success by providing sturdy precision measurements and data you can rely on.

The concept

Customize your DermaLab Combo by selecting the specific parameters relevant to you. Choose between the 11 probes and combine up to 9 parameters in one device, which is delivered complete with the selected probes, main unit, and software.

This tool combines the perfect mix of measurement parameters in one professional tool.

Benefits of the tool

- Elegant and exclusive design
- Userfriendly probe holder function
- Completely upgraded software
- Intuitive and modern user interface
- Strong objective data
- One instrument for comprehensive skin analysis

Skin analysis powerhouse

All the parameters you need
in one elegant instrument
