

Flowable. Choose governed orchestration for AI that works

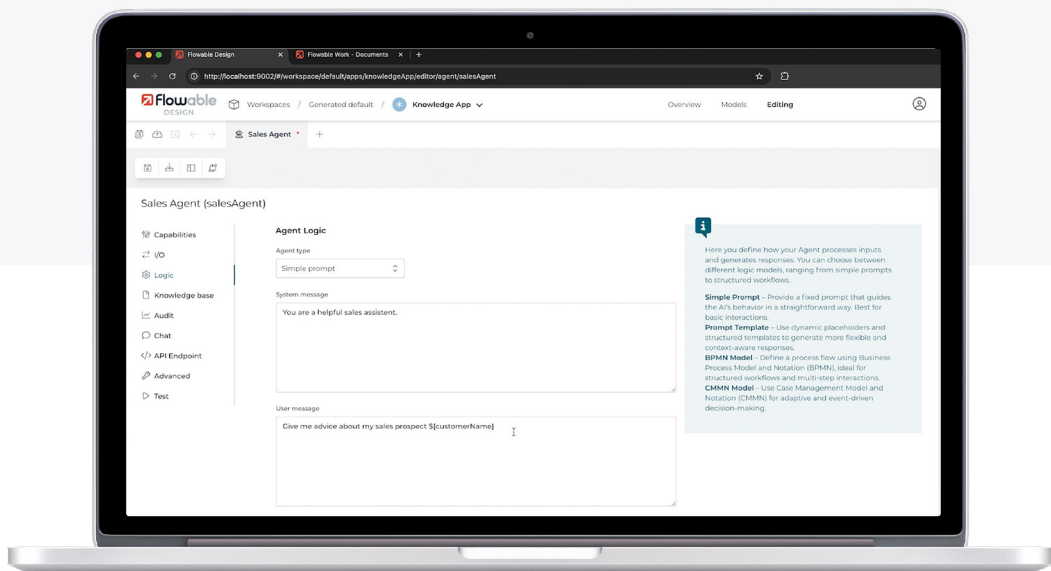

*With Flowable, trust and control are built in from the start
so your AI delivers value responsibly.*

Enterprises need governed orchestration to avoid fragmented, inconsistent processes.

Flowable's adaptive case and process automation platform coordinates people, systems, and AI – keeping every action context-aware, compliant, and transparent.

The result: resilient operations and trusted transformation at scale.

Trusted by industry leaders

Why Flowable?

Case management built with adaptability in mind

Respond to customer context with native case management that adapts to high value work and real world problems.

AI-native orchestration

Drive goal-directed execution with AI agents and decision intelligence.

Built for scalability

Model, execute, and evolve structured and unstructured processes, with user friendly BPMN, CMMN, and DMN automation engines, at scale.

Open Standards, future-ready

Standards-first architecture that integrates effortlessly into your enterprise stack.

Flowable Platform

Enhance productivity and drive greater customer experience.

Ultimate flexibility

Use low-code for speed, pro-code for control. Deploy anywhere: cloud, hybrid, or on-premise.

Enterprise-level compliance

Enterprise-grade security, observability, and auditable AI you can truly trust.

Operational efficiency

Streamline operations, reduce manual tasks, and optimize resources and cost to grow your business, for today and tomorrow.

Become agile

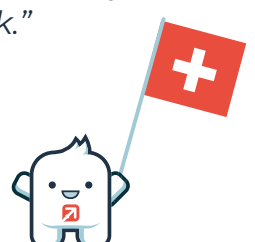

Digitalize business processes to rapidly respond to evolving business needs. Turn changes into opportunities.

Recognized by leading analysts in the Business Process Automation and Orchestration markets.

FORRESTER Gartner

"Flowable gave us the ability to scale AI responsibly across the enterprise without losing control. It fits nicely into our existing tech stack."

CIO, Global Financial Services Company

600+ enterprises choose Flowable

All industries can leverage the Flowable Platform

Financial Services

Government

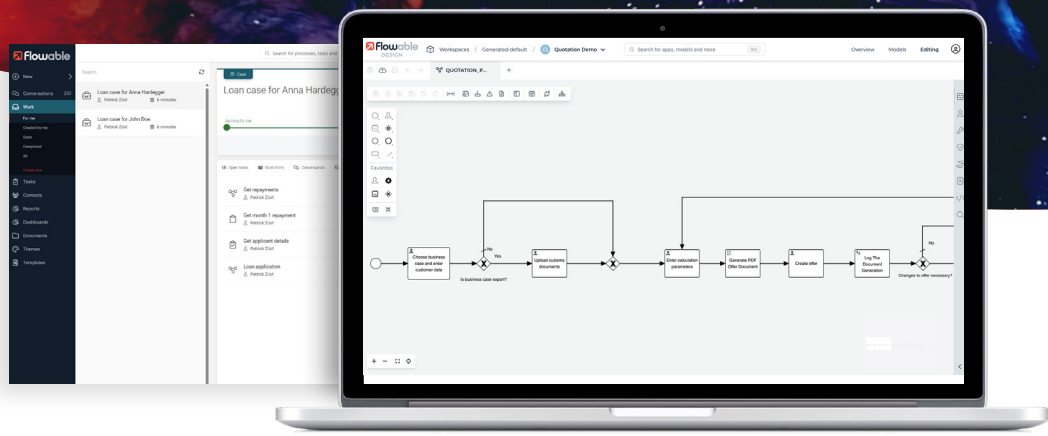

Retail

TV & Media

Technology

Flowable. AI integration with confidence. Governed. Adaptable. Built for business-critical work.

Combine business rules with AI guardrails and keep teams in the loop at every process step.

Focused on intelligence driving impact

Orchestrate AI agents

Deploy goal-based agents that use context to take action and adapt processes in real time.

Keep people in the loop

With built-in approvals and fallback logic, your experts remain in control.

Govern every AI interaction

Our ready-to-deploy platform ensures you can set boundaries, validate outputs, and monitor AI usage from day one.

Build with AI

Tap into reusable capabilities like summarizing, classifying, extracting, or translating into workflows with no code.

Blend rules and reasoning

Combine decision models (DMN), business logic, and AI prompts in a governed, explainable way.

Flexible integration

Integrate with Azure OpenAI, Google Vertex, Hugging Face, open models, or any LLM via API.

Who is Flowable AI Studio for?

Business and operations leaders

Enhance experiences, accelerate results. Drive faster outcomes with AI-powered processes that still play by the rules.

IT and automation architects

Flowable AI Studio ensures observability, security, and standards compliance.

Innovation and transformation teams

Move faster from idea to impact. Build prototypes that you can scale at ease.

Ready to stand out from the crowd with intelligent, governed automation?
