

Trimble CFXchange

SOFTWARE

Real-time supply chain
data and metrics

Trimble® CFXchange is a collaborative cloud solution designed to provide visibility and timber security in real-time. Access key metrics between the office and the field improving the quality of supply chain data and communication.

Trimble CFXchange

Software

Features and Integrations

Key Technical Features	Data & Reporting Features	Integration Interfaces
Mobile data capture for forestry field operations	Real-time operational dashboards	REST APIs
Offline data collection with automatic synchronization	Field activity and production reporting	Webhooks
Integrated photo capture and geolocation	Export to CSV / Excel	SFTP batch exchange
Field production reporting and activity tracking	API access to captured data	Forestry logistics platforms (WSX, LogForce)
Secure data transmission to enterprise systems	Integration with enterprise reporting platforms	GIS systems (ESRI, GeoJSON, shapefiles)
API integration with forestry logistics and inventory platforms		Enterprise BI tools (Power BI, Tableau)
Configurable workflows for contractors and crews		

Device Specifications

WEB PORTAL SPECIFICATIONS

Supported Browsers	Google Chrome (latest version), Microsoft Edge (Chromium-based), Safari (Mac), and Firefox (latest ESR).
Browser Requirements	Java-Script enabled, TLS 1.2+ secure connection, and a stable internet connection.
Recommended Device Specifications	Quad-core processor (1.2 GHz or higher), Minimum 2 GB RAM (4 GB recommended), 32 GB internal storage, Integrated GPS/location services, 4G LTE or 5G connectivity, Wi-Fi, Camera 8MP or higher, and Bluetooth LE support.
Security & Compliance Specifications	Role-Based Access Control (RBAC), secure authentication & user management, Single Sign-On (SAML 2.0/Azure AD), Multi-Factor Authentication support, Encryption in transit (TLS 1.2+), Encryption at rest (AES-256), and secure cloud hosting environment.
