

Market update: March 2022

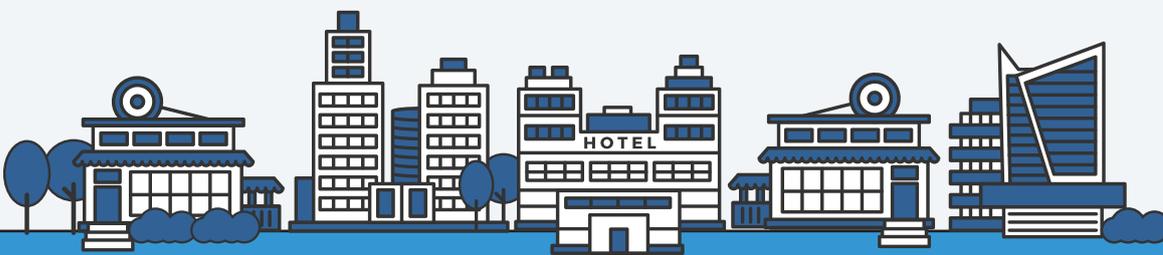

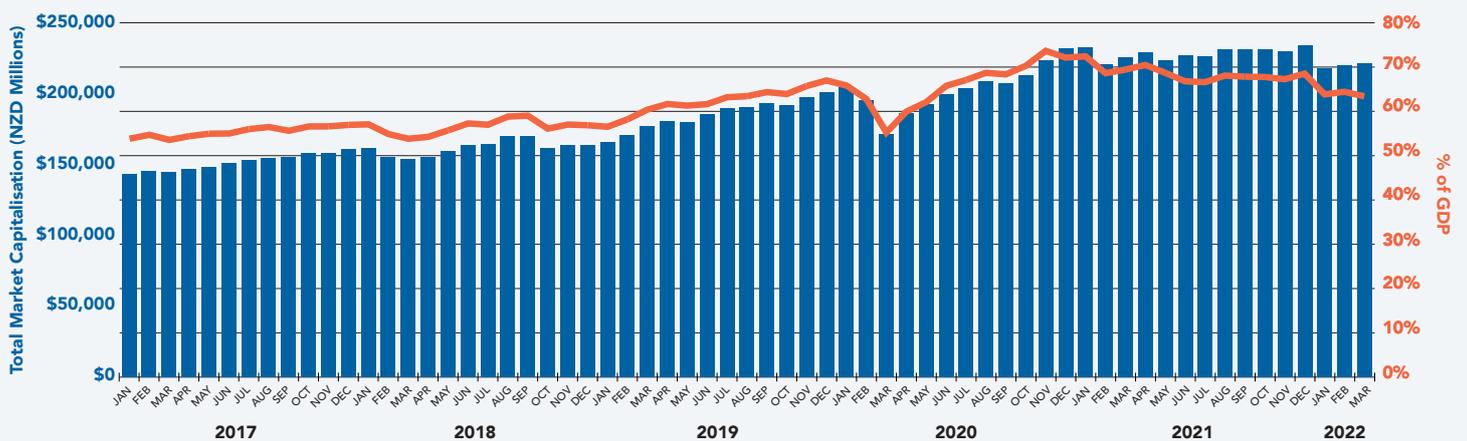

Total Capital Raised

The goal of the NZX is to provide businesses with access to capital to fuel their growth and contribution to the economy. We have seen a steady upward trend in total capital raised on market over the past five years. 2022 has started strongly, with a total of \$1,598m for the first three months.

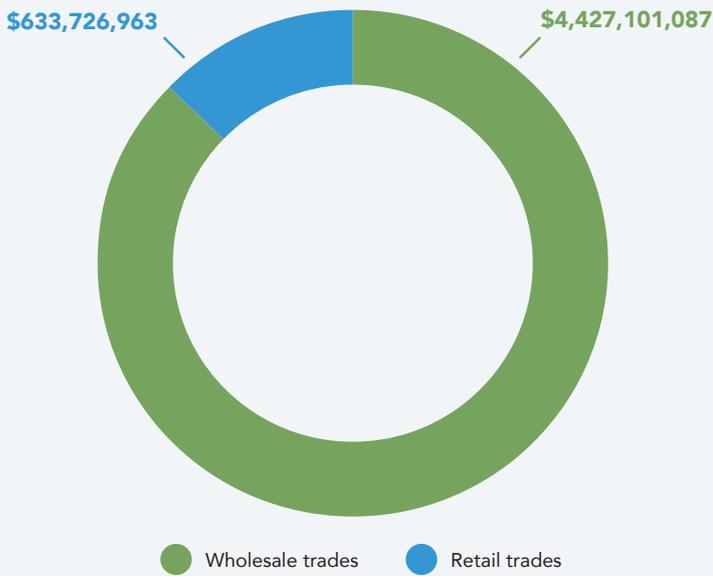

Market Capitalisation as % of GDP

Market capitalisation closely mimics GDP. We have seen a steady increase over time, with strong recovery post the initial covid lockdown shock in 2020.

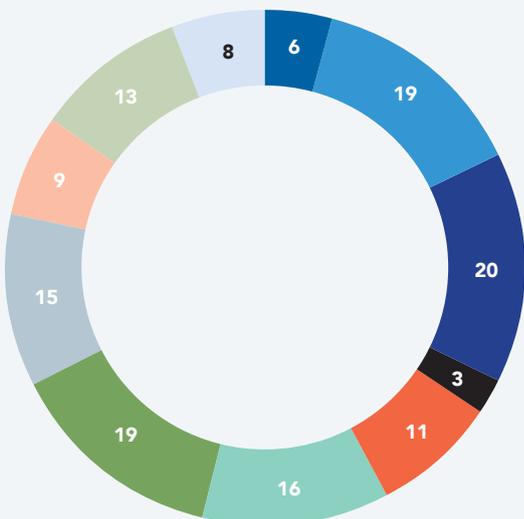

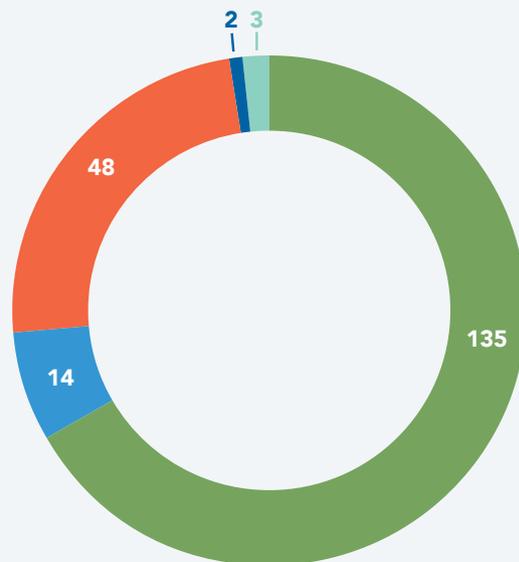

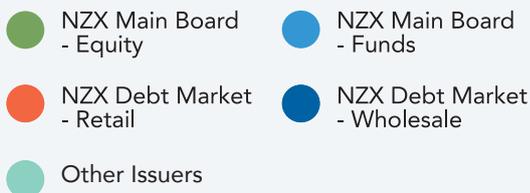

Trading Volumes and Value, March 2022

March has seen strong trading volumes and value on both wholesale and retail markets, despite significant market volatility.

Total Unique Issuers

The number of issuers on the NZX continues to grow, providing investors with both equity and debt investment opportunities. This quarter we welcomed the Booster Innovation Fund and Southland Building Society as new issuers to the Exchange.

Sector Breakdown

The NZX provides opportunities for a wide range of businesses to grow across a broad number of sectors.
