

Kitten weight tracker

Use the space below to record your kitten’s weight and note any unusual observations.

Date	Age	Weight (kg)	Milestone / notes
	8 weeks		Eyes fully open, starting to explore
	9 weeks		First vaccinations due soon. Discuss neutering at this appointment.
	10 weeks		
	11 weeks		
	12 weeks		Time for second vaccination
	13 weeks		Teething may begin
	14 weeks		Eating solid food confidently
	15 weeks		
	16 weeks		Consider neutering if not yet done (check with vet)
	17 weeks		
	18 weeks		
	19 weeks		
	20 weeks		
	21 weeks		
	22 weeks		
	23 weeks		
	24 weeks		Consider transition to two meals per day if not already done
	26 weeks (6 months)		Most adult teeth in place; may be 75–80% of adult weight
	7 months		Slower growth begins
	8 months		
	9 months		Growth almost complete for smaller breeds
	10 months		
	11 months		
	12 months		Booster vaccinations due. Time to switch to adult food (check with vet).

Weight gain should be steady in the first six months of a kitten’s life.
If you’re unsure, speak to your vet.
