КАК ДА ПОЧИСТВАТЕ ВАШЕТО УСТРОЙСТВО

БЪРЗО ПОЧИСТВАНЕ

Лесно и бързо почистване, навсякъде и по всяко време.

1. Отворете горния капак на устройството, като го приплъзнете, уверявайки се, че въртящото се капаче е отворено. Използвайте инструмента за бързо почистване, разположен в долната част на устройството, за да отстраните остатъците от нагревателя и отвора около него, като внимавате да не повредите нагревателя. ЗАБЕЛЕЖКА: Горният капак не се отстранява. Премахването на горния капак ще повреди устройството.

2. След като приключите, премахнете остатъците по инструмента за бързо почистване и го върнете на мястото му. Натиснете горния капак и затворете въртящото се капаче, за да предотвратите навлизането на прах и чужди тела в отвора за стика.

ВНИМАНИЕ

Нагревателят се нагрява по време на употреба, затова трябва да сте внимателни, когато го почиствате след употреба. Винаги проверявайте дали устройството е достатъчно изстигнало преди почистване и използвайте само предназначените PULZE инструменти за почистване.

ОСНОВНО ПОЧИСТВАНЕ

За да сте сигурни, че ще получите максимално добро изживяване с Вашето устройство, препоръчваме да го почиствате основно на всеки 20 сесии, с помощта на PULZE четката за основно почистване. Лесно е!

1. Отворете горния капак на устройството, като го приплъзнете, уверявайки се, че въртящото се капаче е отворено. Използвайте четката за основно почистване, за да отстраните внимателно остатъците от нагревателя. ЗАБЕЛЕЖКА: Горният капак не се отстранява. Премахването на горния капак ще повреди устройството.

2. След това внимателно премахнете остатъците от отвора за стика, като завъртите четката за основно почистване, както е показано.

3. След като приключите, натиснете горния капак и затворете въртящото се капаче, за да предотвратите навлизането на прах и чужди тела в отвора за стика.
