Kasper Bosmans' Solo Exhibition Opens at Gladstone Gallery in Seoul

Presentation features new and recent mixed-media works reflecting a range of experimental and traditional artmaking techniques

In January 2026, Gladstone will present new and recent works from Brussels-based mixed-media artist Kasper Bosmans (b. 1990, Belgium), marking his inaugural solo exhibition in Seoul. The presentation will feature a selection of paintings, sculptures, and murals that explore themes of identity and expression through a contemporary queer lens. Bosmans' experimental bronze-casting practice and painting style culminate in works that investigate anatomical form and malleability. *Peas, Pod* will be on view January 29 through March 21, 2026.

The expansive vinyl form on the gallery's façade personifies the porous nature of identity through a pictorial bean motif that recurs throughout the presented works. Inspired by Brazilian queer artist José Leonilson's multicolored painting *Untitled* (1985), Bosmans' bean imagery serves as a theoretical metaphor for hope, growth, and regeneration. This neutral vessel reflects the collaging nature of Bosmans' work and the layered experience that lends itself to a unified story and culture, specifically drawing upon personal connections to queer families and romantic relationships. Bosmans describes *Peas, Pod* as a "queer investigation of purpose" and an exploration of his place in art history.

Rooted in tradition, a series of multi-colored paintings subscribe to the time-honored Belgian artistic practice of drawing in silverpoint and applying paint to oak. Bosmans utilizes the style to feature embedded cameos of iconic works by Keith Haring and Jasper Johns, united by the central bean motif and recurring theme of self-expression. Additionally, a selection of legend paintings exploring concepts including folk art and underrepresented voices guide the viewer through the exhibition's multiple levels and various mediums.

Bosmans has honed the technique of hand-patinating bronze over the past ten years, resulting in boundary-pushing works that explore physical gesture and the material's time-sensitive qualities. Among them are multiple bronze sculptures shaped into bridge formations, comprising two wooden pedestals and a patinated bronze piece atop.
