About Social Thinking

The foundation of our work provides interventionists (teachers, speech-language pathologists, therapists, clinicians, parents) and social learners with frameworks, tools, skills, and a shared language for understanding the social world. Our goal is to help people learn explicitly how to engage in social information processing: how to attend, interpret, problem solve, and respond in any situation—the thinking and doing skills that will promote well-being. The practical nature of our teaching and the concrete way we explain social concepts helps engage people in social learning, not only about themselves but about others.

Who We Help

The Social Thinking® Methodology is designed for individuals ages four through adult with solid language, cognitive, and learning abilities. Our work is for individuals with social emotional learning differences and/or challenges, whether neurotypical or Neurodivergent, and has been adopted into mainstream classrooms and districts around the world.

Who Should Attend?

SLPs, educators, teachers, social workers, counselors, clinical and school psychologists, occupational therapists, behavior specialists, school administrators, parents, and/or caregivers.

The Social Thinking Methodology builds:

- social competencies
- social self-awareness
- perspective taking

- executive functioning
- social skills
- social-emotional understanding
- organizational systems
