

*Learn how our Material Support & Solutions team solved this customer material issue:*

## ENHANCED VALUE WITH LOWER COST

### THE PROBLEM:

The customer had to adhere to flatness requirements of a part. Tension leveling was used to meet the requirements but the processing cost the customer over \$300,000 annually.

### THE ANALYSIS:

The Materials Support and Solutions team at Worthington examined the material and the end product's specifications. Several suggestions were presented to the customer to achieve the desired outcome while reducing manufacturing costs.

### THE SOLUTION:

The customer chose to utilize the expertise of the Worthington metallurgist in best-practice slitting and rolling procedures. This allowed the material to meet its flatness requirements without extra processing.

### THE ACTION:

*If you are attempting to decrease processing costs on high value parts and improve efficiencies, contact the Materials Support & Solution team at Worthington.*
