MASTER® BUILDERS SOLUTIONS

MasterFlux RMX

Engineered Ready-Mixed Grouts for Large-Scale & Bulk Applications

MasterFlux Ready Mix Grouts deliver strength, reliability, and efficiency where it matters most. Supplied directly in agitators, our ready-mix grout solutions eliminate the need for on-site mixing, reduce labour costs, and ensure consistent, high-quality performance across large-scale applications. Engineered for demanding civil and infrastructure environments, MasterFlux RMX ensures faster installation, safer worksites, and durable long-term results.

Product Benefits:

- Non-shrink stability for long-term performance
- Compressive strengths up to 100 MPa
- Supplied in volumes up to 5m^3 per load
- No on-site mixing, reduced labour and handling
- Lower emissions with zero packaging waste
- QC tested batches for consistent quality
- Fast-setting and low thermal resistivity options
- Suitable for underwater use

Engineered to Perform in Every Application

The MasterFlux RMX range is purpose-built for applications including post-tensioning, structural grouting, void filling, and cable encasement. Locally manufactured and batch-tested, each mix is designed to streamline project delivery while ensuring strength, consistency, and durability.

MasterFlux 5460RMX
Deep-pour, Class C micro-concrete with slow-reacting cements, dual shrinkage compensation, and ultra-low permeability, designed for large pours where thermal control is critical.

MasterFlux 200RMX
Low-heat, shrinkage-compensated grout engineered for controlled placement in bulk pours, ensuring long-term durability and protection of surrounding structures.

MasterFlux 80RMX
Highly fluid, volumetrically stable Class C grout with early and long-term shrinkage compensation, to prevent cracking and settlement in critical structural applications.

MasterFlux EA 55RMX
One-component cable grout additive formulated for deep-pour applications, delivering low-heat, thermally stable performance to protect high-voltage infrastructure and ensure efficient heat dissipation.
