

MasterKure 127WB

Curing compound for fresh concrete, in aqueous emulsion.

Material description

MasterKure 127WB is a liquid curing compound for fresh concrete, in aqueous emulsion, organic solvent and wax-free. Studied for the curing of all fresh concrete surfaces of any structure, to be used mainly in high temperature weather conditions and relative low humidity.

Features and benefits

- Organic solvent-free.
- Wax-free.
- Odourless in substance.
- No need of safety labels.
- Does not freeze over -4°C.
- Can be eliminated after 4 weeks through washing with water.
- Protects cementitious mixes against rapid water evaporation, particularly in warm, dry and ventilated environments.
- Minimizes the formation of cracks due to plastic shrinkage.

Dosage

With 1 liter MasterKure 127WB a fresh concrete surface of nearly 5-10 m² (200-100 gr/m²) can be treated.

Packaging

MasterKure 127WB is available in 10L cans and 200L drums.

Storage

Store the product at a temperature between -2 and 30°C and in any case not in direct sunlight.
In original sealed container its shelf life is of nine months.

Technical Information	
Form	Liquid, pink
Relative density (g/ml at 20°C)	Approx. 0.93

Method of use

MasterKure 127WB is ready for use and must not be diluted with other products.

MasterKure 127WB can be applied both by roller and brush, even if spraying application is advised, in order to obtain better performance and consumption results.

Safety instruction

For information on the correct and safe use, transport, storage and disposal of the product, consult the most recent Safety Data Sheet.
