

MasterLife® 300C

Concentrated Crystalline Capillary Waterproofing Admixture

For Contractors

MasterLife 300C admixture imparts waterproofing characteristics to concrete by reducing its permeability and sealing hairline cracks. MasterLife 300C admixture is certified to NSF/ANSI 61 and is therefore suitable for use in concrete structures in contact with potable water. Health Product Declarations (HPD) and Environmental Product Declarations (EPD) are available upon request.

Benefits

- Reduces water penetration
- Seals hairline cracks
- Enhances durability
- Promotes watertight concrete

Typical applications

- Foundations and below-grade structures
- Sewage and water treatment structures
- Underground structures
- Precast components

MasterLife 300C admixture helps seal hairline cracks. It's the contractor's friend post-installation.

Features

- Can be used in air-entrained concrete
- Does not change the color or odor of concrete
- No effect on setting time in normal or warm ambient environments
- Compatible with all Master Builders Solutions admixtures
- Resists positive and negative side hydrostatic pressure

Placement tips

- Easy to pump, place, consolidate and finish
- Conventional placement methods and tools can be used
- Curing is critical – Wet curing preferred
