

MasterEase[®]

**A New Admixture
Technology for Reducing
Concrete Viscosity**

Master Builders Solutions®

As Master Builders Solutions®, we are a leading global producer of responsible solutions for the construction industry, focussed on delivering our vision: **Inspiring people to build better.**

We provide value-added technology and market-leading R&D capabilities to improve the performance of construction materials and to enable the reduction of CO₂ emissions in the production of concrete. The comprehensive portfolio under the Master Builders Solutions® brand encompasses concrete admixtures, cement additives, and solutions for underground construction.

We collaborate across areas of expertise and regions and draw on the experience gained from countless construction projects worldwide, leveraging global technologies, as well as our in-depth knowledge of local building needs, to develop innovations that help make you more successful and drive sustainable construction.

Founded in 1909, Master Builders Solutions® operates 35 production sites globally, supporting you in mastering your building challenges of today and tomorrow – for a decarbonised future.

Low-Viscosity Concrete: Products and Services

Low-viscosity concrete is an overall concept focusing on the optimization of concrete viscosity and rheology over the entire time of concrete production, delivery, pumping, placing and finishing. It is based on the use of innovative admixtures as well as the provision of technically advanced services performed in the laboratory and on site.

The services:

The technical experts from Master Builders Solutions® are available to support you in carrying out your projects:

- Our R&D centers, local technical centers, and laboratories are equipped with specific tools and equipment dedicated to the study and optimization of concrete rheology (instrumented mixers, rheometers, tribometer, V funnel, etc.)
- We assist you on site with the implementation of the proposed low-viscosity concrete solutions, both during the manufacturing of the concrete at the concrete plant and at its point of application on the construction sites

MasterEase® – best rheology for concrete

High-range water-reducing superplasticizer using a new patented polymer technology providing advanced rheological properties to concrete. MasterEase® brings a significant reduction in the concrete viscosity.

Under demanding temperatures and where an exceptionally long workability time is also required, the admixture MasterSure® can be added without affecting the early strength.

MasterEase® makes rheology easy!

Let's tackle your challenges together!

Concrete viscosity and rheology

Every day, the concrete industry encounters challenges with concrete viscosity, both at the concrete plant (manufacturing) and, in particular, at the point of placing on construction sites:

- Long mixing times, high power consumption
- Additional water required to overcome high viscosity
- Sticky concrete that is difficult to pump, install and finish
- Concrete that is difficult to vibrate, float, and smooth
- Surface deficiencies of hardened concrete
- Subpar compaction reduces the durability of the structure

From a technical perspective

- Rheology defines the flow and intrinsic behavior of fluids, which is analyzed using a rheometer
- Concrete can be defined as a “Bingham” fluid, whose two key parameters are the yield value and the plastic viscosity

Concrete behaves like a Bingham fluid

$$\tau = \tau_0 + \eta \dot{\gamma}$$

Intrinsic characteristics

τ_0 : yield value: minimum stress required to initiate flow

η : plastic viscosity: slope of the curve plotting stress as a function of the speed gradient

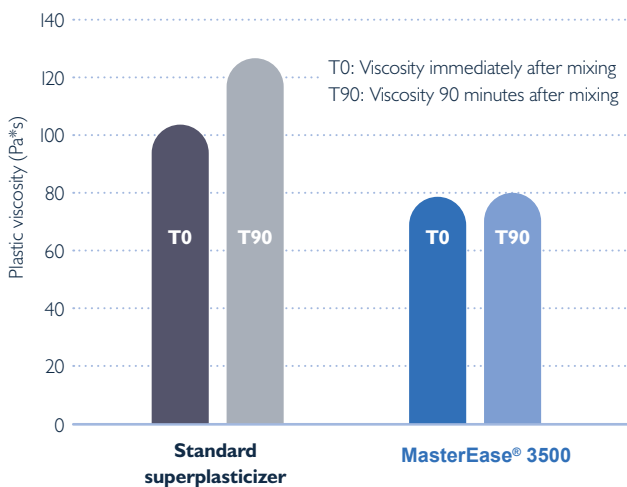

MasterEase®

Improves Concrete Rheology

A new concept focusing on concrete viscosity

Innovation is one of the cornerstones of our company. Our R&D teams have developed an entirely new generation of polymers. These new molecules give fresh concrete exceptional rheological properties, including a significant drop in viscosity. MasterEase® admixtures are designed to deliver exceptional low viscous yet stable concrete mixes. With their new patent protected chemical basis they enable easy to pump, place and finish concrete even with very demanding mix designs.

MasterEase® maintains reduced viscosity over entire processing time

Advantages for the concrete industry:

- Mixing and installation: Improved rheology for day-to-day naturally viscous concretes
- Lower viscosity and improved ease of pumping and placing of concretes with a low water/cement ratio, self-consolidating concrete, high-performance concrete, ultrahigh-performance concrete, pumped concrete, foundation concrete, fiber-reinforced concrete, etc.
- Reduced viscosity of concretes optimized towards a low environmental impact and high durability that employs very low water/cement ratios and a high dosage of mineral additives and supplementary cementitious materials

The possibility of further reducing the water/cement ratio without affecting viscosity brings about:

- An improvement in performance quality and durability
- New scope for technical and economic optimization of the concrete formulas in terms of the dosage and nature of the bonding agent, the choice of aggregates, etc.

Master Builders Solutions® for the Construction Industry

MasterAir®

Complete solutions for air entrained concrete

MasterCast®

Solutions for the manufactured concrete product industry

MasterEase®

Low viscosity for high performance concrete

MasterFinish®

Solutions for formwork treatment and surface improvement

MasterFiber®

Comprehensive solutions for fiber reinforced concrete

MasterGlenium®

Solutions for high performance concrete

MasterLife®

Solutions for enhanced durability

MasterMatrix®

Advanced rheology control for concrete

MasterPel®

Solutions for hydrophobization, anti-efflorescence and surface protection

MasterPolyheed®

Solutions for mid-range concrete

MasterPozzolith®

Solutions for water-reduced concrete

MasterRheobuild®

Solutions for high strength concrete

MasterRoc®

Solutions for underground construction and surface improvement

MasterSet®

Solutions for set control

MasterSure®

Solutions for extraordinary workability retention

Master X-Seed®

Advanced accelerator solutions for concrete

Quantified sustainable benefits. Advanced chemistry by Master Builders Solutions®.

Let the numbers do the talking: We have portrayed some of our most eco-efficient product solutions for concrete and precast production, construction, civil engineering, and flooring.
