

Dear Colleague,

I am delighted to announce that Climate Central has been chosen as one of 10 national finalists in the *Reducing Our Risk* contest sponsored by Solutions Search, for our sea level rise map and impacts analysis — one tool, packed with information for every coastal community in the U.S.

**We need your vote!** With your [vote here](#), we have the opportunity to win the People's Choice Award, which would provide us with \$25,000, meaningful support to advance our work providing critical help to the most vulnerable coastal places nationwide.

### More about the contest

- **Vote early, vote often!** You can vote as much as once a day until voting closes on May 15. It's as easy as clicking the Climate Central button on the Solutions Search site [here](#).
- **Vote on the go!** To vote from your phone, simply text SOLUTIONSEARCH to 22333, then text CLIMATECENTRAL to the same number. Standard text messaging rates apply.
- **Climate Central's work continues.** Stay tuned in 2015 for the launches of the final coastal states in our *Surging Seas Risk Finder* tool — the first-of-its-kind, hyper-local interactive map and analysis illustrating the impact of sea level rise across more than 100 demographic, economic, infrastructure, social vulnerability, and environmental variables.

For more information please contact Dan Rizza at [drizza@climatecentral.org](mailto:drizza@climatecentral.org)

Sincerely,

Ben Strauss

Vice President for Sea Level and Climate Impacts
