

# Sustainability Commission

Meeting Minutes Tuesday, 16 April 2024, 14:00-16:00 CET Virtual Meeting

Attending virtually		Unable to attend
Katrina Galas	Ex officio:	Theresa Heinsinger
Gunhild Kvistad	Fabien Saguez	Sari Jormanainen
Marlen Marconi	Tim Farcnik	
Martin Ohlsson	Riikka Rakic	
Jan Skřička	Barbara Rettenbacher	
Klaus Rambach		

	Minutes		
1	<ul><li>Welcome and approval of agenda</li><li>Agenda is approved</li></ul>		
2	<ul> <li>Season Report - Season experiences from everyone</li> <li>Nove Mesto - Jan Skřička <ul> <li>Winter season was tough due to unseasonably warm weather</li> <li>Snow storage was necessary to host the World Championships competitions in February</li> <li>Only a very short window of sub 0° C temperatures</li> <li>Some snow was saved for next season</li> <li>Lessons learned on snow distribution</li> </ul> </li> </ul>		

IBU - International Biathlon UnionTel.: +43 6 62 85 5050

Fax: +43 16 62 85 50 50 8

- Without World Championships, the season would have been much shorter and not economically possible
- In the future, especially for smaller OCs it will be difficult to continue under such circumstances
- Currently the depot has 25.000m3 snow stored for next season

#### DSV – Klaus Rambach

- Snow depots in Oberhof and Ruhpolding are not full
- New snow storage cover pilot project in Oberhof with 3 different materials, to compare which is the best cover material
- In November a new sustainability communication campaign started with positive feedback and will continue next season
- Temporary infrastructure tents were heated with pellets instead of diesel both in Ruhpolding and Oberhof

#### Östersund – Martin Ohlsson

- Impact from climate change is visible but this winter has been really good in Östersund
- It was possible to ski from November until April
- Well prepared with many snow depots but this season a lot of natural snow was available which actually caused some difficulties
- Natural snow was removed from courses and replaced with machine made snow because it was unsure if the natural snow can withstand the whole 3 weeks of competition (in retrospect it would have)

#### Swiss-Ski – Marlen Marconi

- Very different within Switzerland, some parts had no issues (like Lenzerheide), others had difficulties and little to no snow
- Overall it was a good winter for Switzerland from elite sport perspective
- For WC at Lenzerheide, public transport from anywhere in Switzerland was included in the ticket price to travel to the venue however it wont be financially possible to implement the same a the World Championships 2025. Public transport from within a 100km radius from Lenzerheide will be included instead..

#### Slovenia – Tim Farčnik

- Venue preparation started in November
- Overall satisfied with winter
- Multiple competitions took place starting from Junior Cup in December
- Microclimate in Pokljuka contributed to the success of season
- Snow depot is filled with about 18.000 m3 of snow thanks to late season cold weather

#### France - Fabien Saguez

- Really warm winter all over France
- New strategy for Annecy snow depots: Produce the snow on the courses and have 3 depots spread out
- Using HVO for grooming
- Strong winds have contributed to difficulties

# Canmore – Katrina Galas

- Best conditions on tracks
- Weather has good but unpredictable
- Overall positive experiences at the Canmore World Cup

## Norway – Gunhild Kvistad

- Good season, with lot of snow in Norway
- Still a lot of snow had to be produced
- Unlikely that future seasons will be as good as this one
  - Snow depots are currently filled up for next season

## IBU Update

Sustainability Reporting

- Sustainability Report 2023 published in February 2024
- Deadline on reporting on season 2023/2024 for OCs is 31st of May 2024
- Including CO2 for all event hosts, Snow Network for all venues, Sustainability Charter for signatories

# Reporting on Season 2023/2024

- Top Tier Level was good, no races had to be cancelled due to lack of snow
- However, smaller regional races had some difficulties
- IBU will share documents from SIEPPUR Project ACTION ITEM Barbara
- Importance of having a solid snow strategy that is tailored to the venue
- What does proper snow management cost to be efficient?

## IBU Erasmus Projects

3

- SIEPPUR, sustainable snow management, about half way through
- GAMES, decarbonization strategy, about half way through
- BENCHES, Biodiversity in Sport, with Uni Sant'Anna from Pisa, World Athletics , World Sailing, Italian Kayak and Canoe Federation, Benfica Lisbon total duration of 3 years
- Possible new project for next year about hydrogen use in winter sports, if one of the commission members is interested, please feel free to reach out

## HVO reimbursement

- Difficult due to different legislation in countries
- However, if OC has used HVO this season, possibility to cover difference in cost. Will be sent out by Sport department

## Sustainability Award 2024

- Additional category for NF, as well as one for Gender Equality and for Social Media
- Deadline 31st of May
- Will be awarded in Belgrade at the Congress
  - Price 10.000€ for winner in each category for sustainability

<ul> <li>&gt; possibility to create a sustainability workshop</li> <li>Should Commission run a workshop?</li> <li>What can be useful for audience?</li> <li>Tim: at Vienna Presidents Meeting sustainability was an important topic and useful to participants</li> <li>Awareness about sustainability should be kept high -&gt; therefore include it</li> <li>Fabien: permanent approach on sustainability is important</li> <li>Possible Workshop content:         <ul> <li>Martin: story telling about the cases of OCs that had a tough winter is a good way to keep it on everyone's mind</li> <li>Klaus: Solutions and best practice sharing as a possible idea for workshops</li> <li>Martin: Topic of budgeting - allocated funds for making solutions possible</li> <li>Riikka: Keynote presentation/panel discussions is on the Agenda already anyways, but additionally we can offer the workshop so these two different levels can to be catered separately</li> </ul> </li> <li>Consensus on: Both keynote and Workshop to be planned</li> <li>A Commission Working Group to Draft Agenda for Workshop Congress Content: Marlen, Katrina, Gunhild</li> <li>Proposal: Sustainable Procurement for NFs         <ul> <li>Is this a topic for NFs?</li> <li>Would a sharing webinar what the NFs are doing be useful?</li> <li>Switzerland:             <ul> <li>o improve and optimize the lifecycle of every piece of equipment, switch to thre year cycle instead of one-year cycle</li> <li>Witten policy per se does not exist yet</li> <li>Witten policy per se does not exist yet</li> </ul> </li> </ul></li></ul>

Marlen, Katrina, Gunhild  Proposal: Sustainable Procurement for NFs  Is this a topic for NFs? Would a sharing webinar what the NFs are doing be useful? Switzerland:  o improve and optimize the lifecycle of every piece of equipment, switch to three year cycle instead of one-year cycle o Written policy per se does not exist yet Sweden: not a lot of procurement happening anyways, because most of the spending goes to wages, training camps etc.	
<ul> <li>Is this a topic for NFs?</li> <li>Would a sharing webinar what the NFs are doing be useful?</li> <li>Switzerland:         <ul> <li>improve and optimize the lifecycle of every piece of equipment, switch to three year cycle instead of one-year cycle</li> <li>Written policy per se does not exist yet</li> </ul> </li> <li>Sweden: not a lot of procurement happening anyways, because most of the spending goes to wages, training camps etc.</li> </ul>
