Dublin Airport Developments

Preparing for Ireland's future

At Dublin Airport, the growth and development of your business is important.

That's why the airport is constantly evolving, with a new runway in operation, world-class connectivity and U.S. Pre-clearance, Dublin Airport is Ireland's gateway to the world.

SECURITY:

Dublin Airport replaced all traditional baggage x-ray machines with C3 security scanners in 2025 for quicker security checks .

ADDITIONAL RUNWAY:

Dublin Airport opened its new North Runway in 2022, which facilitates larger aircraft and connectivity with long-haul destinations.

BAGGAGE:

An installation of a €200 million integrated baggage handling system was rolled out at Dublin Airport in 2023, future-proofing the system for up to 40 million passengers per annum at Dublin Airport.

NEW & IMPROVED LOUNGES

Dublin Airport has announced the long-awaited re-opening of one of its most popular airside passenger lounges, alongside the opening of a new lounge in Terminal 1.

The enhancements are part of a multi-million euro investment by airport operator daa and represent yet another significant improvement to the passenger experience at Dublin Airport.

The opening of the new 51st & Green and Phoenix lounges completes the full overhaul of Dublin Airport's lounges, complementing the Martello and Liffey lounges, which were re-opened last year following refurbishment and rebranding.

Sustainability at Dublin Airport

A world to connect, a future to protect

Achieved the Smarter Travel Mark for promoting and encouraging sustainable and active commuting.

Achieved the Business Working Responsibly mark for our ESG programme.

Achieved Airport Carbon Accreditation for our efforts in reducing our carbon emissions.

daa is proud to be a participant of the UN Global Compact and support its principles and the UN Sustainable Development Goals.

Across our airports we are converting vehicles to electric and hybrid alternatives. 40% of Dublin Airport's fleet comprises of LEVs.

Recycling rates have been tripled by installing new facilities and delivering new training to support proper waste segregation with our staff.

Since 2010, zero waste from our operations has gone to landfill.

1000m of hedgerows have been planted at our airports providing homes and nature corridors for animals in our eco systems.
