

WHY USE SAUCE LABS?

Ensure your apps and websites work flawlessly on every browser, OS and device!

Sauce Labs was the first to develop a cloud-based continuous testing platform and leads the industry, with more than 2 billion tests run to date. Offering the world's most comprehensive and trusted continuous testing cloud for web and mobile applications, with 800+ browser/OS combinations, nearly 200 mobile emulators and simulators, and more than 2,000 real devices, only Sauce provides the enterprise-grade security, scalability and reliability required to rapidly deliver a flawless digital experience to your users.

SPEED YOUR DEVELOPMENT

The Sauce Continuous Testing Cloud is optimized so you can test web and mobile apps in parallel and accelerate your testing time by up to 10x or more. Increase developer productivity up to 80% by enabling them to spend less time with test maintenance and debug faster with our videos and screenshots.

THE COMPLETE TESTING PLATFORM

Sauce Labs is the only cloud-based continuous testing platform that enables developers to run their automated tests across desktops, emulators, simulators and real devices, using Selenium, Appium, Espresso or XCUITest. New features like Sauce Headless and Sauce Performance improve developer productivity and ensure a flawless CX.

MOBILE TESTING ON SAUCE

Test native, hybrid and mobile web apps for iOS and Android across emulators, simulators and real devices in both public and private clouds. Debug your apps manually or run tests in parallel to reduce test times. Our deep inventory of 2,000+ mobile devices means you never have to wait for a device.

NO WORRYING ABOUT INFRASTRUCTURE

No more buying or maintaining servers or mobile devices or updating browsers or VM licenses. Easily scale your tests with parallelization to speed up test cycles and boost capacity on our reliable cloud.

TEST SECURELY IN THE CLOUD

Use Sauce Connect™ proxy, built with TLS, to securely run your scripts and access your data and files from behind your firewall. We spin up new single-use VMs for every test and destroy them immediately after so your data is always secure. Real devices are thoroughly cleaned after each test.

INTEGRATE WITH YOUR CI SYSTEM

Our automated testing platform helps you realize the benefits of continuous integration. Sauce integrates with Jenkins, Bamboo, Microsoft VSTS and others so you can test as fast as you develop. And, you can instantly share results via SLACK™ or HipChat™ with our simple plugins.

ENTERPRISE GRADE

Only Sauce offers the speed, security, reliability and scalability demanded by the world's largest development teams. Manage test resources and access control centrally from our console. Our professional services, customer support and training teams help you automate tests quickly.

ANALYZE YOUR RESULTS

Quickly identify issues with videos, screenshots and HTML logs of every run. Take control of your tests with breakpoints to walk through each step. Collaborate with team members with one click sharing of videos and sessions. Understand how your tests are performing and make data-driven decisions with Test Analytics.

CHOOSE THE RIGHT PLAN FOR YOU

Cross-Browser Testing

(includes ~800 desktop browser and OS combinations, as well as ~200 mobile emulators and simulators). All prices based on annual plan.¹

	Concurrent Sessions	Automated <i>Price per month / Automated Minutes</i>	Unlimited Automated <i>Price per month / Unlimited Minutes</i>
LIVE	1	\$19 / 0 min	- -
