# Hoodie - Back
Portrait / 280x340mm

How to set and supply your artwork correctly

1. Select: *Layers Tool:* ◈(F7) **>** Select: *Artwork (place here)* layer.

Create/Add your design to the *Artwork* layer.

2. Once your design is complete, please remove the *Guide* layer.

Failure to remove will result in the guide layer printing over your artwork design.

3. Export to: *Adobe PDF (Print)* (PC: ctrl+ E / Mac: cmd+E).

Please ensure when exporting to a PDF file you select **'pages'**:

Layers panel:
- Guide (delete this layer)
- Artwork (place here)

- **Accepted format:** Adobe PDF (Print). Ideally: PDF/X-4a: 2001 (one file)
- **Colour:** CMYK (RGB and Pantones will be converted)
- **Fonts:** Embedded or converted to outlines
- **Image Resolution:** 300dpi to 450dpi

Please note: Any areas set to 'White' will print. If you require transparent areas (e.g. so that the material shows through) please ensure these are set to 'no fill'.

We position the print area approximately 50mm from the neck line. Please use the 'positioning guide' layer to place your design within the print area.

Finished Size - This is the size of your printed area.

Safe Area - We recommend keeping text and important content out of the grey area.

Bleed - Please extend your artwork into this section. This is to avoid white or unprinted edges when trimmed to finished size.
