

## EXTERIOR LIGHTING

## MICROPAK SERIES

### SAE Class I Hide-A-Blast

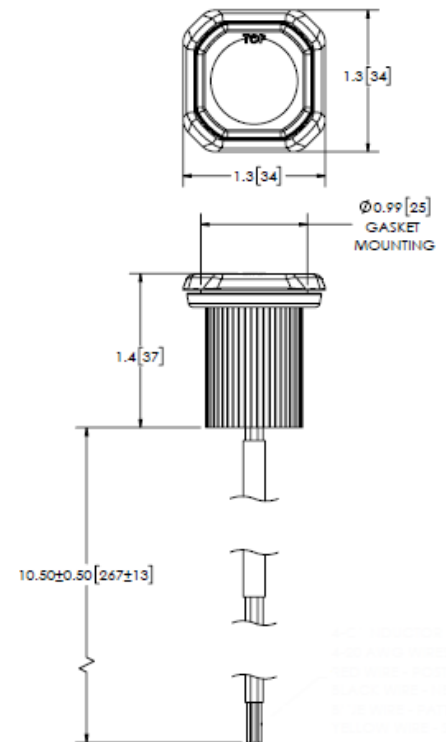

The MICROPAK Hide-A-Blast Series provides the functionality of a warning light in a low profile design, allowing the vehicle's safe arrival to the scene. SAE Class I light output, synchronisation capability and the choice of 69 flash patterns allow the creation of an attention-getting, multi-colour warning system with half the number of lights typically required. The MICROPAK offers flexibility with multiple flush mounting applications on virtually any surface including bumpers and on the sides of any vehicle.

#### Models

PART No.	COLOUR	VDC	AMPS	MOUNT
MICROPAK-DC-RB		12-24	0.6	Surface / Flush (1" hole)

#### Features

- 12-24VDC
- Slim low-profile design with six powerful LEDs for a bright warning light
- All-in-module: all controls imbedded in the headlight, avoiding a LED flash controller
- Optimised lens and optical, maximising light beam
- Discreet flush mount, virtually applicable in any vehicle surface - insertable in a 1" hole with 10" pigtail cable
- Steady burn override for worklight functionality
- Syncable with compatible Code 3 directionals: Chase™, MR6, MegaThin™, XTP and M180™ Series
- Temperature Range: -30°C to +50°C (-22°F to +122°F)
