ED5050 Series R65 Directional LED

The ED5050 Directional LED Warning Lamps are bright and versatile warning lamps which are suited to a wide variety of applications. Their shallow profile makes them ideal for installation in vehicle front grilles with minimal modification to the vehicle. This makes them suitable for fitment to cars, vans, trucks and any vehicle with limited forward facing flat surfaces. They feature wide angle optics & multiple flash patterns, including synchronisation with other units for simultaneous or alternating operation. ED5050 single colour models feature 9 LEDs and have 10 flash patterns, the dual-colour modules feature 18 LEDs and have 12 flash patterns.
