

ELECTRIC VEHICLE ALERT SYSTEM

Audible Warning Device for Electric Cars and Hybrid Vehicles

Experience the sound of safety with the new Electric Vehicle Alert System (EVAS®) from ECCO. EVAS emits an audible warning for perimeter safety. ECCO's expansive catalogue of tones provides compliant pedestrian protection.

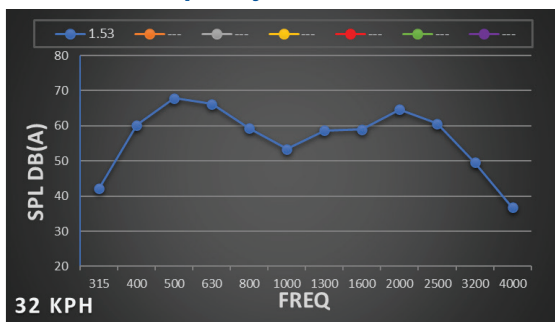

Models

EVS1000-M	Main
EVS1000-S	Secondary

Features and Benefits

- Provides audible perimeter safety for your vehicle
- Multiple frequency profiles available
- Audio engineering capability
- Diverse tone catalogue
- Smooth sound file ramping
- Vehicle action tones available
- Ability to embed custom sounds
- Dynamic firmware updates
- Automotive grade EMI/EMC and voltage transients protection

Standard Frequency Profile

Certifications

- USA : FMVSS 141 : 49 CFR 571.14
- EU : R10, R138
- China : GB/T - 2018
- SAE J994 reversing tone
- IP69K

Specifications

- 12-48V
- Multiple mounting options
- Unlimited Vehicle Harness integration, comes standard with: Main DT06-6S, Secondary: DT06-2S
- J1939 CAN standard protocol
