9QH03

Core Competencies

Gardenuity is the leading gardening experience solution designed with your employees, colleagues, and customers in mind. Gardening to improve their workplace engagement, mental and physical health, and the health of the planet. Gardenuity conducts wellness workshops addressing overall health and wellness through container and desktop gardening.

"Existing evidence suggests that horticultural therapy provides physical, cognitive, social and psychological benefits for a variety of populations, including individuals who have mental health issues such as trauma, PTSD, depression, anxiety, schizophrenia, and alcohol and drug abuse. With accumulating evidence for the mental health benefits of horticultural therapy building, efforts to increase its use among the veteran population have expanded in recent years." (Science Direct)
