

VISIBILITY INTO INTERNAL WORKFLOWS

Fullstory Workforce

See how your employees use the tools and workflows that shape every customer experience.

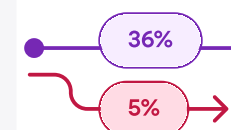

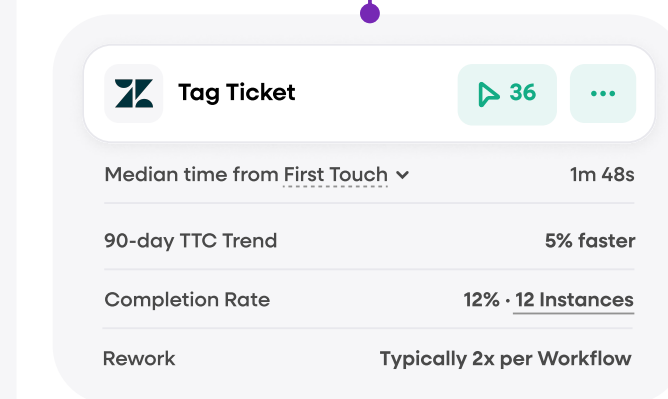

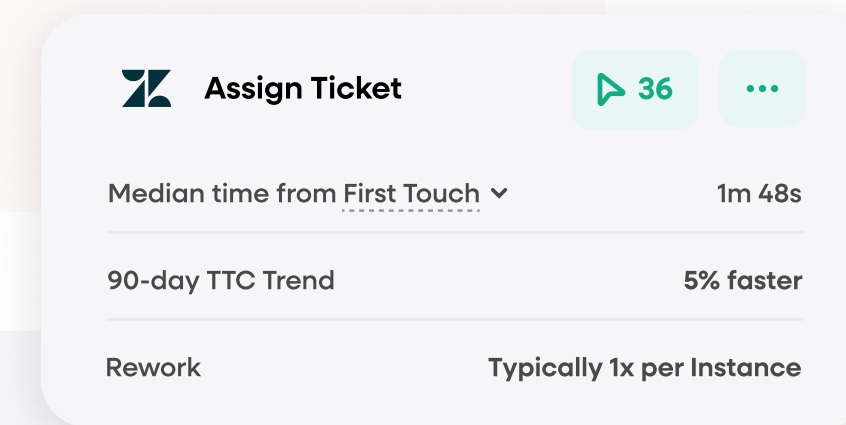

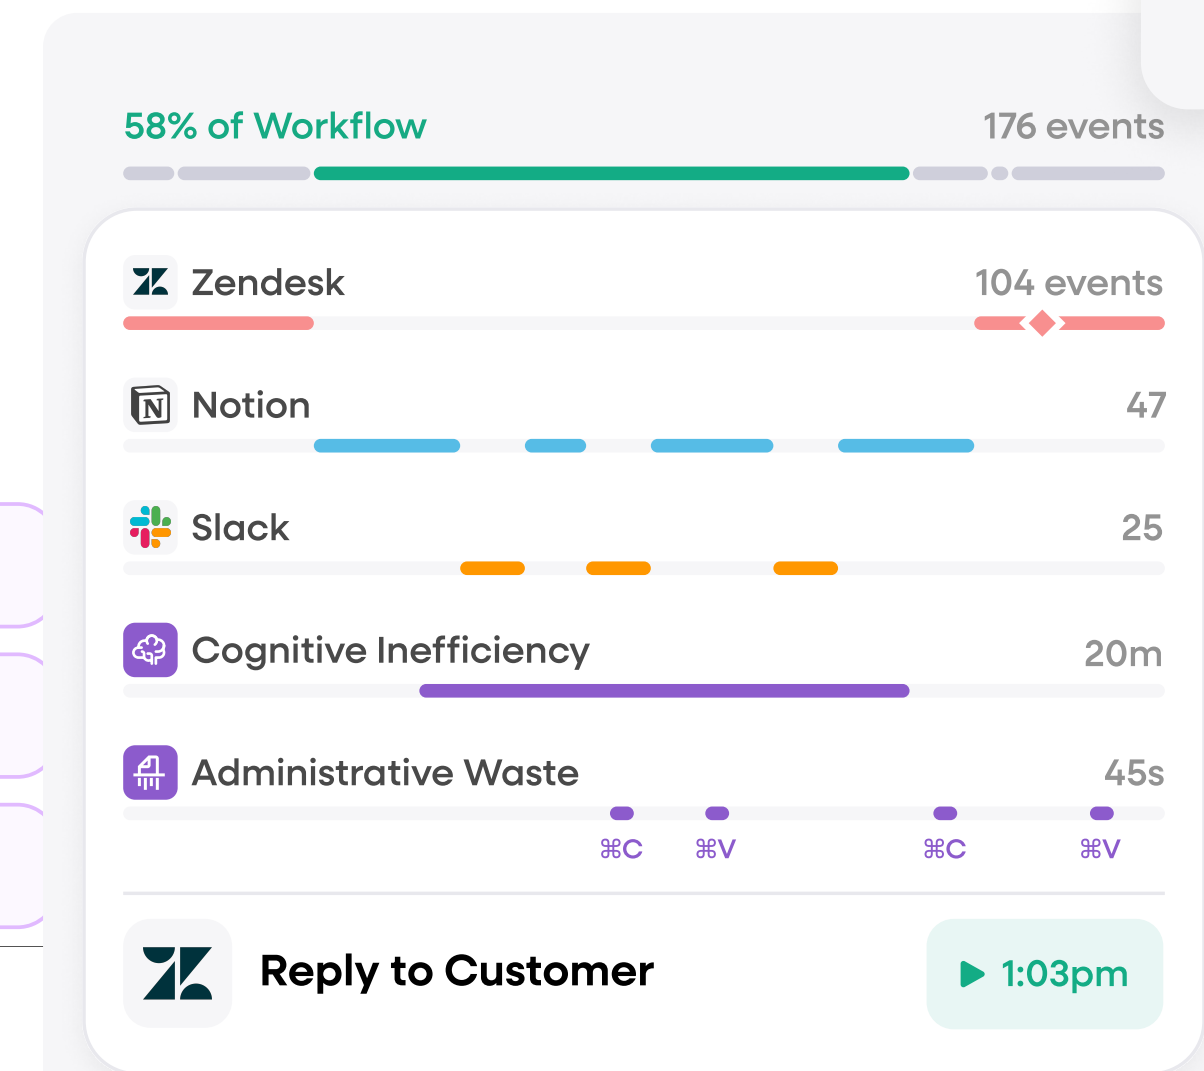

Improve workflows and optimize internal processes

See exactly how employees use their tools. Then fix what's slowing them down.

Key Benefits:

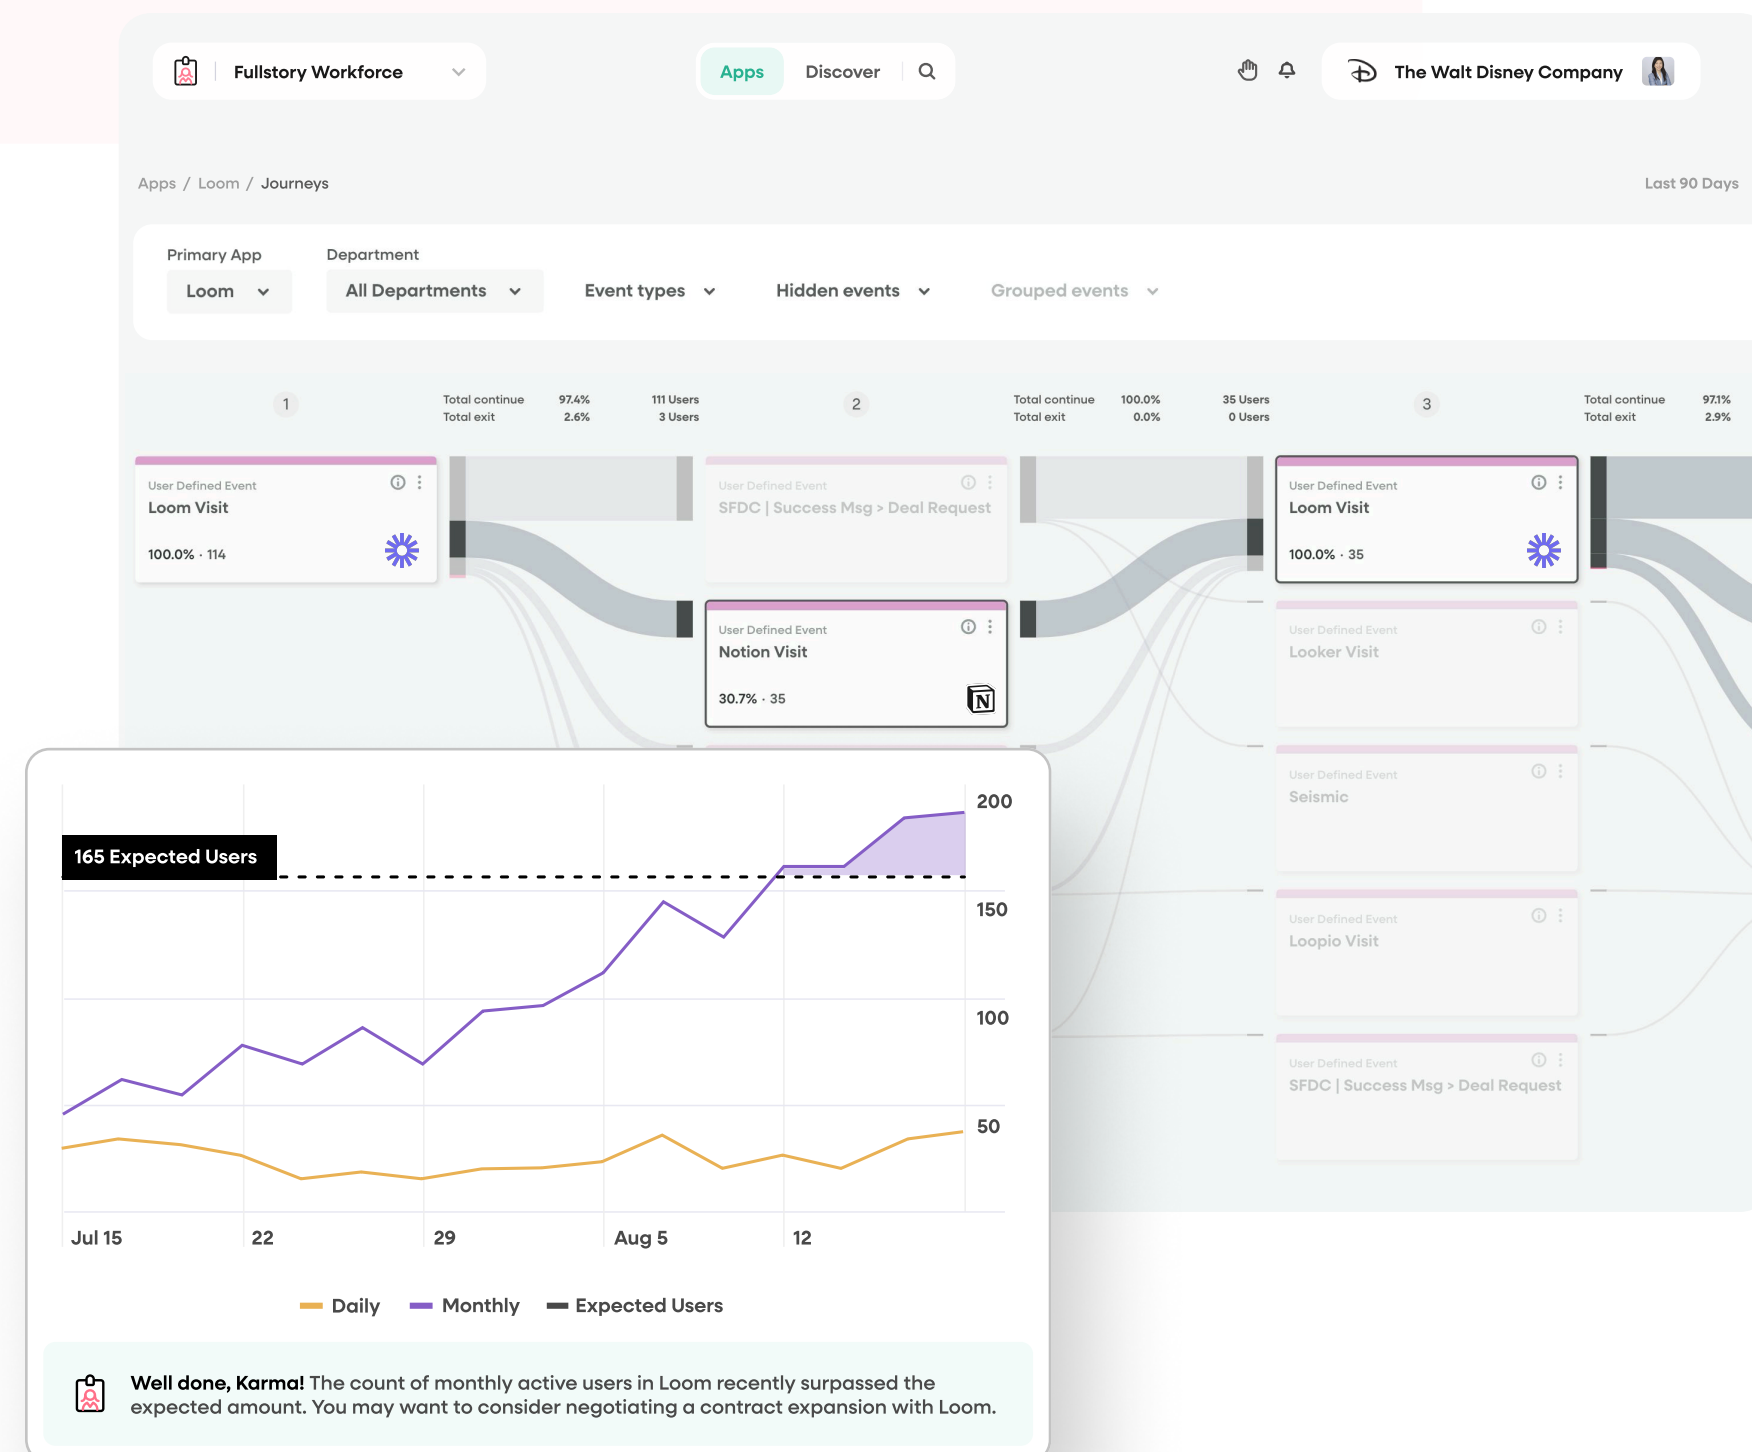

- **See beyond logs**
Understand which tools employees actually use to cut waste and improve efficiency.
- **Easy setup, instant insights**
A simple browser extension provides app inventory and shadow IT detection—no custom coding needed.
- **Frustration-free experiences**
Pinpoint where teams get stuck and smooth out the rough spots.
- **Privacy-first insights**
Get the visibility you need without compromising employee privacy.

Active Time	30m 3s
Inactive Time	1h 15m
Elapsed	3d 17h

Complete visibility into how work *actually* gets done, so you can make processes work for customers and your business.

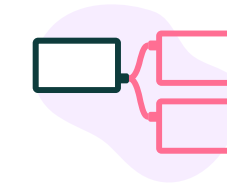

Turn your digital friction into your operational superpower.

Understand employee experiences

Identify exactly where and why employees struggle across internal tools and digital workflows, so you can remove friction and improve how work gets done.

Unlock critical processes

Understand how work moves across teams and systems to understand how processes actually run and where they break down.

Deploy agents confidently

Build and deploy AI agents based on real user behavior, so they reflect how work actually happens and perform more effectively.
