THE MOST COMPLETE ENTERPRISE CAPABILITIES

Purpose-built on a Single Database Platform™, CMiC ERP & Financials delivers a complete set of unified capabilities for your full back office:

Financials

Includes general ledger, accounts receivable and accounts payable, enforces rules and achieves compliance with fiscal best practices and project specifications.

Project Controls

Maximizes the profitability of every job by continuously monitoring—and quickly adjusting—project budgets.

Human Capital Management

Confidently orchestrate the fluid dynamics of a project-based workforce.

Asset Management

Real-time access to inventory, maintenance and repair data, helps you control material costs, speed up the procurement process and enhance operational performance.

Corporate Risk Management

Ensures regulatory compliance at the local, state and national levels.

Enterprise Content Management

Take control of your workflows, content assets and analytics.

Enterprise Planning

Optimize resources, schedules, opportunities and financial forecasts.

CMiC's SINGLE DATABASE PLATFORM

A single source of truth is essential for construction firms to eliminate functional silos and manage their total business, from accounting and budgeting to project delivery and resource management.

NO REKEYING OF DATA

INFINITELY SCALEABLE

MITIGATES INTEGRATION COSTS

CONSISTENT & INTUITIVE USER EXPERIENCE

ONE DATABASE FOR ALL CORPORATE & PROJECT DATA

WORKFLOW ANY BUSINESS PROCESS

TRUST YOUR DATA... AND GROW

A truly strategic enterprise solution won't just enable your team members to work efficiently in the home office and in the field. It will also set the stage for future growth and expansion—at little to no added overhead cost—by leveraging the same platform for financial controls, resource & asset management and project delivery.

The benefits of an enterprise-level, single database platform extend beyond eliminating data conflicts. A system that captures and organizes data from every department in a consistent way allows your leadership team to draw richer insights from all data—in real time.

When your team can successfully perform critical business functions as the number of projects expands, your organization can grow without the traditional burdens of scale. Having more data doesn't slow down your ability to leverage it; it only makes your insights more robust and your analyses more actionable.

DEPLOY IT YOUR WAY

To match a broad spectrum of IT infrastructures, rollout timeframes and budgets, CMiC ERP & Financials can be deployed as an on-premise platform, as a Platform-as-a-Service (PaaS) or as part of a multi-tenant Cloud environment.

CMiC delivers complete and unified ERP and FIELD Solutions for construction and capital projects firms. CMiC's powerful software transforms how firms optimize productivity, minimize risk and drive growth by planning and managing all financials, projects, resources, and content assets—from a Single Database Platform™.
