CMiC Financials

As a leader in the construction software space, CMiC recognizes the specific needs of financial professionals in construction as well as contractors. Our accounting software solution, which is designed to deliver on industry-specific functionality and workflows, is architected to flow financial data into both your General Ledger and your job costing simultaneously.

Our construction Payroll module streamlines processes including automating mobile timecards, which assist in managing your employees and crews to closely monitor the performance of all projects they are working on.

Our Opportunity Management application allows your team to optimize resources, easily visualize deal pipelines, prioritize actions to accelerate the sales process and manage relationships effectively.

From an asset management perspective, our equipment and inventory management applications can help your team manage your firm's equipment remotely, minimizing time-loss and job impact. Further, it allows teams to track fleet inspections, monitor equipment hours and stay on top of operating expenses, equipping you to produce accurate work orders and manage maintenance-related costs effectively.

CMiC delivers complete and unified Financials and Project Management solutions for construction and capital projects firms. CMiC's robust software transforms how firms optimize productivity, minimize risk and drive growth by planning and managing all financials, projects, resources, and content assets — from a Single Database Platform™.
