STUDIES CONDUCTED WITHIN THE GENERAL DIRECTORATE OF İSKİ BETWEEN 1994 AND 2002

- The studies aiming at supply of water until the year 2040 to İstanbul province were completed
- % 90 of the wastewater was treated in treatment plants, leading to clean coasts and rivers.
- Haliç (Golden Horn) was rehabilitated and brought to its old blue times, which was awarded as the biggest environmental project of the world.
- 600 plants were taken into operation in 8 years.

STUDIES CONDUCTED WITHIN THE GENERAL DIRECTOR OF DSI (2003-2007) and THE MINISTRY OF ENVIRONMENT AND FORESTRY (2007-2011) AND THE MINISTRY OF FORESTRY AND WATER AFFAIRS (2011-2018)

During his Ministries;

- 9200 water related facilities were taken into operation and 600 of which were dams.
- Over 4 billion saplings were planted across Turkey.
- In 2013, he led the Presidency of UN Forestry Summit.
- In 2015, he was elected as the President of the 12th Conference of the Parties to UN Convention to Combat Desertification for 2 years.
- In 2016, he led the Presidency of OIC Water Council.
Developed by himself, he provided the establishment of urban forests in each city across Turkey with the City Forests Project.
- In terms of Forestry, he developed many new projects and completed giant facilities such as National Parks, Natural Parks and Honey forests in all across Turkey.
