

## ALEOS 4.9.4.p09 Release Notes

ALEOS 4.9.4.p09 is for AirLink GX450 and ES450 gateways.

---

*Note: After updating the gateway to 4.9.4.p09, the firmware version will appear as 4.9.4.009 on the AirLink® Mobility Manager (AMM) dashboard.*

---

### Upgrade Path

If you are updating a gateway from an older version of ALEOS (prior to 4.5.1), first update the gateway to ALEOS 4.5.1 before updating to 4.9.4.p09.

### Bug Fixes

Corrected an internal timer value that, in timing-sensitive cases, was causing unpredictable operation and unnecessary reboots.
