**IMEI SECURITY**  
**COMPLIANCE STATEMENT**

Sagem Communications hereby declare having taken the necessary and sufficient measures to assure the programming safety: passwords techniques have been implemented in order to avoid any non-authorized IMEI change.

Sagem Communications hereby declare having taken the necessary and sufficient measures so that non-authorized person or organization will be able replace, at a low cost, the component in which the IMEI is stored and to equip thus the mobile station with the other IMEI.

Sagem Communications hereby declare having taken the necessary and sufficient measures so that:

- any technical knowledge compulsory to any possible change in IMEI made shall remain entirely under their control,
- the knowledge of the program content shall be strictly restricted to duty authorized persons, according to the needs.
