

AirLink® ALEOS Routers Legacy VPN support

OVERVIEW

DATE ISSUED:	15-Dec-2021
ISSUED BY:	Sierra Wireless Product Management
PRODUCTS AFFECTED:	AirLink® ALEOS Products MP70, RV55, RV50, LX60, LX40
FOR DISTRIBUTION TO:	All AirLink® Customers
	<p>ALEOS provides Legacy IPsec (Racoon) VPN configuration options solely for compatibility with previous ALEOS releases. Sierra Wireless does not recommend the continued use of Legacy VPN configurations as this implementation has an out-of-date feature set and limited third-party support. Sierra Wireless recommends that customers using the Legacy VPN option to migrate to the Standard VPN implementation; the Standard VPN contains advanced features and is a fully supported implementation. Sierra Wireless provides customer support for Standard VPN deployments; customers having issues with Legacy VPN configurations will need to migrate to the Standard VPN to receive configuration support.</p> <p>For more information on configuring your Standard VPN, please refer to the VPN Configuration section of ALEOS Software Configuration guide for your AirLink router. ALEOS Software Configuration guides are available on the Source.</p>
