Primary unit (top)

The weight of the primary unit with 500 Modules HiLoNC V2 is about 2,4Kg.

Up to 3 primary units can be included into the current loading unit carton (400x400x320mm) which is shipped to our customers.

Primary unit (side)

HiLoNC V2 Module references

In order to answer customer demand we have introduced several references and part numbers.

The modules can include a software with generic parameters or customized parameters.

If the module is manufactured with customized parameters we create specific part numbers (one for the module alone, another for the module packed) and designation (eg. HILONC V2 "customer's name").

For example, the HILONC V2 with software 3.0 and generic parameters is defined by the two part numbers below :

- the part number of the module alone is 253457055 and it can be read on the label of the HiLoNC V2 module
- the part number of the module packed is 253457068 and it can be read on the label of the reel and black carton

Our customers shall indicate the part number of the module packed on their PO,

We also indicate the part number of the module packed on the shipping documents and invoices.
