

End of Life Announcement: Nav on AMM

OVERVIEW

DATE ISSUED:	Dec 31, 2018
ISSUED BY:	Sierra Wireless Product Management
PRODUCTS AFFECTED:	Nav Application on AirLink Mobility Manager (AMM)
FOR DISTRIBUTION TO:	General Distribution
SUMMARY:	<p>The optional Nav Application is a package on the AMM that also requires installation on a supported oMG device. It works in conjunction with a Garmin PND connected to the gateway to provide vehicle dispatch functionality on the AMM and two-way messaging capabilities between a fleet of vehicles and a control center. When the package is installed, a Nav tab will be available in the AMM.</p> <p>Nav is not currently supported for the AirLink MG90 or ALEOS devices and has not been available for sale since 2017. In addition, there are no longer any supported PNDs available from Garmin, so only legacy oMGs with older PNDs would be supportable.</p> <p>As a result, we are formally publishing the End of Life notification for the optional Nav Application and will remove the feature from the AMM with the release of AMM 2.17 in mid-2019.</p>
