

WEIRD WOOD

A thought to consider...

Have you ever wondered where the man-made things around you come from?

All of them had to come from somewhere.

Take a moment and look around you. Identify those things that you think may have begun their lives as trees.

Questions to ponder...

What do you think is the WEIRDEST product made from wood? Why?

Could those man-made things still be made without trees? How?

In what ways do people depend on these products? Could we live without them?

INSTRUCTIONS

- 1** Choose a man-made product on the worksheet
- 2** Use the information on the flashcards to help you match that product to the tree it was made from.
- 3** If the shapes at the bottom of the flash cards match, you are right!
- 4** Repeat for each product.

WEIRD WOOD WORKSHEET

NAME: _____

Choose an everyday product. Use the flash cards to help you match that product with the type of tree it was made from. Draw a line connecting the two on your worksheet. If the shapes at the bottom of the flashcard matches, you are right! Repeat for each product.

Good luck!
