

BIOGRAPHY

Jeffrey Butters

Jeffrey Butters serves as Regional Engineer, Southwestern States and Hawaii, at the Ductile Iron Pipe Research Association (DIPRA), a trade association providing research, publications, and advisory services to the water industry. He joined DIPRA in 2019, and provides technical services to water and wastewater utility professionals, and their consulting engineers.

Jeffrey helps utility managers, engineers, and operators with system planning and design, installations, and asset management questions related to iron pipe. He provides technical training and presentations, directs access to relevant references and guides, and helps build relationships in the industry. He also provides field services, including investigations of proposed and existing pipelines. Jeffrey is active in section meetings of the American Water Works Association (AWWA) within his area throughout the year.

Jeffrey is a member of AWWA, the American Society of Civil Engineers (ASCE), and the National Association of Corrosion Engineers (NACE). He is a NACE Certified CP1 Cathodic Protection technician. He received his Bachelor of Science degree in Environmental Engineering from Penn State University. Jeffrey's prior experience includes more than eight years in the U.S. Air Force, where he received a Commendation Medal as well as Letters and Certificates of Appreciation. He also has worked for the Pennsylvania Department of Environmental Protection, Golden State Water Company in California, and as an emergency medical technician.
