Dear Valued DIPRA Newsletter Subscribers,

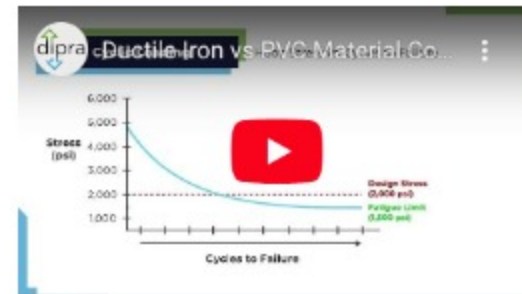

## EMPOWERING CHANGE DEMANDS KNOWLEDGE

Thank you for being part of our community and showing a vested interest in shaping the future of water infrastructure. As leaders in the water industry, your commitment will drive responsible choices and positive change.

### Ductile Iron vs. PVC: Uncover the Truth

We're excited to share a vital opportunity that aligns with our mission. Our **new course - "Ductile Iron Pipe vs. PVC"** - looks closely at two significant pipe materials. Especially at a time when PVC has been under scrutiny, understanding the implications of our choices becomes even more essential.

### New Course Now Available

Immerse yourself in our Knowledge Pipeline – an educational hub delivering insights into the advantages of Ductile iron pipe. Our new "Ductile Iron Pipe vs. PVC Pipe" course will equip you with the information you need to properly design and specify tomorrow's water and wastewater pipeline infrastructure.

### Why This Matters

Amid East Palestine derailments, PVC's hazards can't be ignored. As we champion resilient water systems, exploring sustainable alternatives is imperative.

Explore the course brochure and take the first step towards informed decision-making.

### Embrace Knowledge, Drive Change: Register for The Knowledge Pipelines Courses

1. Learn more about our courses by visiting <https://knowledgepipeline.com/>.
2. Enroll in the new "Ductile Iron Pipe vs. PVC" course to understand the material implications firsthand.
3. Join us in advocating for sustainable and safe water infrastructure choices.

Your dedication is a catalyst for change. We sincerely appreciate your commitment to a more responsible water future.

Best regards,

David Cole  
President, DIPRA
