

Cogent Educator Program

Participate with a growing group of educators who want to transform the classroom and prepare students for successful science careers. Utilize the products we have today for free, and help us decide what we develop tomorrow.

The Cogent Educator Program is a partnership with Cogent Education and K-12 teachers, who play an important role in the development and refinement of the Cogent Education Applications. Cogent Education strives to use the best scientific methods to develop the products, but relies on continual feedback from a community of teachers who implement the products on a daily basis.

Cogent Educators are strong supporters of our applications. They are advocates and ambassadors. They provide awareness and understanding of today's science classrooms. They are frequent speakers at educational conferences and tradeshows, and provide recommendations and insight for future products and areas of focus.

Why Be A Cogent Educator?

As a Cogent Educator, you'll have the opportunity to meet twice a year, through paid travel and accommodations, and collaborate with other science teachers from around the U.S. You'll meet teachers with diverse strengths, skills, and interests, and have varied backgrounds in an array of science specialties. You'll receive all the latest tools and technologies Cogent Education has to offer, to stay current on the latest products, and provide the best possible learning environments for your students.

Are you a Cogent Educator?

Requirements:

- A full-time science teacher employee in a public or private school, local education authority, or non-profit agency/organization
- An active user of Cogent Education's applications for teaching and learning
- Interested in being part of a learning community and collaborating with peers in an effort to benefit students
- Believe technology can engage the "digital learner" to transform the science classroom
- Actively share best practices by conducting and publishing research, authoring authentic content and/or delivering professional presentations
- Share the impact of your work with other Cogent Educators through an end-of-year reflection.
- Present at science conferences or local professional development events

If you are interested in learning more about becoming a Cogent Educator, please feel free to contact Tyler Wood at: tyler@cogenteducation.com
