FY 2024 Results

Revenue for 2024 of €11,834 million increased by 6.5% compared to 2023, or 7.6% in constant currency, driven by improvements across all segments, as discussed further below.

As detailed below, 2024 revenue included the benefit of Legal Settlements, while 2023 revenue included the benefit of the Copyright Royalty Board Phonorecords III Accrual. Excluding these items from both years, full year revenue grew 7.7% year-over-year in constant currency.

Cost of revenues, consisting of artist and product costs, increased by 8.7% to €6,746 million in 2024 while Cost of revenues as a percentage of revenues increased to 57.0% in 2024 from 55.9% in 2023. The increase in Cost of revenues as a percentage of revenues related to higher product costs and a greater proportion of Music Publishing and Merchandising and Other revenues, which have higher Cost of revenues compared to Recorded Music. Product costs as a percentage of revenues increased to 10.8% from 9.5% driven primarily by the higher proportion of merchandising sales within total revenue. Artist costs as a percentage of revenues decreased to 46.2% in 2024 from 46.4% in 2023, due to repertoire mix.

EBITDA of €2,332 million increased 29.0% year-over-year, or 31.3% in constant currency, and EBITDA margin was 19.7%, compared to 16.3% in the prior year. EBITDA and EBITDA margin were impacted by non-cash share-based compensation expenses of €329 million during 2024 compared to €561 million during 2023. Excluding these amounts, Adjusted EBITDA was €2,661 million, up 12.3% in 2024, or 13.8% in constant currency, and Adjusted EBITDA margin improved 1.2pp year-over-year to 22.5% driven by the revenue growth, operating leverage and cost savings from the previously announced strategic organizational redesign, partially offset by the higher product costs discussed above.

As detailed below, 2024 EBITDA and Adjusted EBITDA included the benefit of Legal Settlements, while 2023 EBITDA and Adjusted EBITDA included the benefit of the Copyright Royalty Board Phonorecords III Accrual and the negative impact of a Legal Provision. Excluding these items from both years, Adjusted EBITDA grew 12.4% year-over-year in constant currency, and Adjusted EBITDA margin increased 0.8pp year-over-year to 22.3%, compared to 21.5% in 2023.

Operating profit increased by 25.2%, or 28.0% in constant currency, to €1,775 million in 2024 due to the improved revenues and lower non-cash share-based compensation expenses. This was partially offset by the increase in restructuring charges which amounted to €169 million in 2024 compared to €41 million in 2023 as a result of the strategic organizational redesign.

Net profit attributable to equity holders of the parent grew 65.7% to €2,086 million in 2024 compared to €1,259 million in 2023, resulting in Basic EPS of €1.14 in 2024, up 65.2% compared to €0.69 in 2023, and Diluted EPS of €1.13 in 2024, up 66.2% compared to €0.68 in 2023. The increase in Net profit attributable to equity holders of the parent was due in part to the variance in revaluation of investments in listed companies (including Spotify and Tencent Music Entertainment, among others) that resulted in net income in 2024 of €1,163 million compared to net income in 2023 of €425 million. Adjusted net profit, which adjusts for the revaluation of investments, non-cash share-based compensation expense, amortization of catalogues and other items detailed in the Appendix, amounted to €1,782 million in 2024, up 9.6% compared to €1,626 million in 2023, resulting in Adjusted Basic EPS of €0.98 in 2024, up 10.1% compared to €0.89 in 2023 and Adjusted Diluted EPS of €0.96 in 2024, up 9.1% compared to €0.88 in 2023. The increase in Adjusted net profit was driven by the growth in Adjusted EBITDA.

Net debt, defined as total debt minus cash and cash equivalents, at the end of 2024 was €2,098 million compared to €1,689 million at the end of 2023. The net leverage ratio at year-end 2024, defined as Net debt over EBITDA, was 0.9x, consistent with 0.9x at year-end 2023.

Net cash provided by operating activities before income tax paid declined by 7.6% to €2,104 million compared to €2,278 million in 2023, due in part to higher royalty advance payments, net of recoupments, which increased to €186 million in 2024 from €100 million in 2023, due to the timing of major artist renewals. Net cash provided by operating activities was also impacted by an increase in restructuring charges and an increase in cash used to cover employee withholding taxes related to our equity plan.

Cash paid for catalogue acquisitions increased to €266 million in 2024 compared to €178 million in 2023 and included the acquisition of the remaining stake in RS Group in Thailand and the completion of a 2023 catalogue acquisition for which the cash had been previously paid into escrow. In addition, the Company continued to strategically invest in the long-term growth of the business, with investments including Chord Music Partners, NTWRK, Mavin Global and the acquisition of the remaining stake in [PIAS]. As a result, Free cash flow decreased to €523 million in 2024 compared to €1,082 million in 2023.

In accordance with UMG's dividend policy to pay a dividend of 50% of Net Profit (subject to agreed non-cash items and applicable law), UMG has proposed to pay a final dividend of ϵ 12 million, or ϵ 0.28 per share for the year ended December 31, 2024. If approved by shareholders, this would bring UMG's total dividend for 2024 to ϵ 951 million, or ϵ 0.52 per share. This dividend proposal is subject to approval by shareholders at the Annual General Meeting of Shareholders.

EBITDA and Adjusted EBITDA in Q4 2023 were negatively impacted by a provision reflected in relation to a decades-old, ongoing artist estate litigation in Latin America.

DSP Catch-Up Income

Revenue, EBITDA and Adjusted EBITDA in Q4 2024 included income from a DSP that was only able to be recognised in Q4 but related to Q2 and Q3 2024 activity. This revenue impacted comparability for Q4 2024, but not for FY 2024.

Legal Settlements

Revenue, EBITDA and Adjusted EBITDA in 2024 benefitted from 1) the settlement of a copyright infringement lawsuit booked in Q4 2024 and 2) a settlement associated with an exit in Q4 2024 by UMG from a JV partnership.

Definitions

In this press release, UMG presents certain financial measures when discussing UMG's performance that are not measures of financial performance or liquidity under IFRS ("non-IFRS"). These non-IFRS measures (also known as alternative performance indicators) are presented because management considers them important supplemental measures of UMG's performance and believes that they are widely used in the industry in which UMG operates as a means of evaluating a company's operating performance and liquidity. UMG believes that an understanding of its sales performance, profitability, financial strength and funding requirements is enhanced by reporting the following non-IFRS measures. All non-IFRS measures should be considered in addition to, and not as a substitute for, other IFRS measures of operating and financial performance as presented in UMG's Consolidated Financial Statements and the related Notes, or as described in this press release. In addition, it should be noted that other companies may have definitions and calculations for these non-IFRS measures that differ from those used by UMG, thereby affecting comparability.

EBITDA and EBITDA margin

UMG considers EBITDA and EBITDA margin, non-IFRS measures, to be relevant measures to assess its operating performance and the performance of its operating segments as reported in the segment data. It enables UMG to compare the operating performance of operating segments regardless of whether their performance is driven by the operating segment's organic growth or by acquisitions. It excludes restructuring expenses, which may impact period-to-period comparability. EBITDA margin is EBITDA divided by revenue.

To calculate EBITDA, the accounting impact of the following items is excluded from the Operating Profit:

- i. amortization of intangible assets:
- ii. impairment on goodwill and other intangibles;
- iii. depreciation of tangible assets including right of use assets;
- iv. (gains)/losses on the sale of tangible assets, including right of use assets and intangible assets; and
- v. restructuring expenses.

Adjusted EBITDA and Adjusted EBITDA margin

The difference between EBITDA and Adjusted EBITDA consists of non-cash share-based compensation expenses and certain one-time items when applicable, that are deemed by management to be significant and incidental to normal business activity. Adjusted EBITDA margin is Adjusted EBITDA divided by revenue.

UMG considers Adjusted EBITDA and Adjusted EBITDA margin, non-IFRS measures, to be relevant measures to assess performance of its operating activities excluding items that may be incidental to normal business activity and excluding non-cash share based compensation which may impact period-to-period comparability.

Adjusted Net Profit/Adjusted Net Profit per share

UMG's use of Adjusted net profit is appropriate as UMG uses it as the basis for the Adjusted net profit per share (in EUR) – diluted, both of which are non-IFRS measures. Adjusted net profit may be subject to limitations as an analytical tool for investors, as it excludes certain items and therefore does not reflect the expense associated with such items, which may be significant and have a significant effect on UMG's net profit. During 2024, UMG updated the definition of Adjusted net profit to exclude restructuring expenses which may impact period-to-period comparability.

The accounting impact of the following items are excluded from Net profit attributable to equity holders of the parent:

- i. amortisation of catalogues;
- ii. impairment losses on goodwill and intangible assets;
- iii. financial income and expenses, excluding interest and income from investments;
- iv. restructuring expenses;
- v. earnings from discontinued operations;
- vi. non-cash share-based compensation expense;
- vii. certain one-time items that are deemed by management to be significant and incidental to normal business activity;
- viii. income tax impact on the above adjustments;
- ix. non-recurring tax items; and
- x. adjustments attributable to non-controlling interests.

Financial Net Debt

UMG considers Financial Net Debt, a non-IFRS measure, to be a relevant indicator of its liquidity and capital resources. UMG management uses this indicator for reporting, management and planning purposes. Financial Net Debt is calculated as the sum of:

- i. cash and cash equivalents, as reported in the Consolidated Statement of Financial Position, including
 (i) cash in banks and deposits, whether or not compensated, corresponding to cash, and (ii) money market funds;
- ii. cash management financial assets, included in the Consolidated Statement of Financial Position under "financial assets", relating to financial investments, which do not satisfy the criteria for classification as cash equivalents set forth in IAS 7; and
- iii. derivative financial instruments, net (assets and liabilities) where the underlying instruments are Financial Net Debt items, as well as cash deposits securing borrowings included in the Consolidated Statement of Financial Position under "financial assets";

less:

i. the value of borrowings at amortized cost as reported in the Consolidated Statement of Financial Position

Free Cash Flow

UMG defines Free Cash Flow as net cash provided by/(used for) operating activities plus net cash provided by/(used for) investing activities, less repayment of lease liabilities, interest paid, net and other cash items related to financing activities. UMG considers Free Cash Flow, a non-IFRS measure, to be a relevant indicator of its cash flow generated to fund dividend payments and repayment of debt. Free Cash Flow is not a measure of performance calculated in accordance with IFRS and therefore it should not be considered in isolation of, or as a substitute for cash flow provided by operating activities as a measure of liquidity. Free Cash Flow, as we calculate it, may not be comparable to similarly titled measures employed by other companies. In addition, Free Cash Flow does not necessarily represent funds available for discretionary use and is not necessarily a measure of our ability to fund our cash needs.
