

MERCURY

Banking built for startups

A complete financial stack
to scale your company.

Full stack banking

Scale with FDIC-insured bank accounts,
debit cards, and 3-click payment flows.

Features for hockey sticks

Use our API, virtual cards, and automated cash
management to propel your company.

Designed for busy people

Find your account number where you expect it
to be (and that's just the beginning).

Rooted in Silicon Valley

Access a community of founders &
investors, plus growth-accelerating perks.

Banking services provided by
Evolve Bank & Trust; Member FDIC.

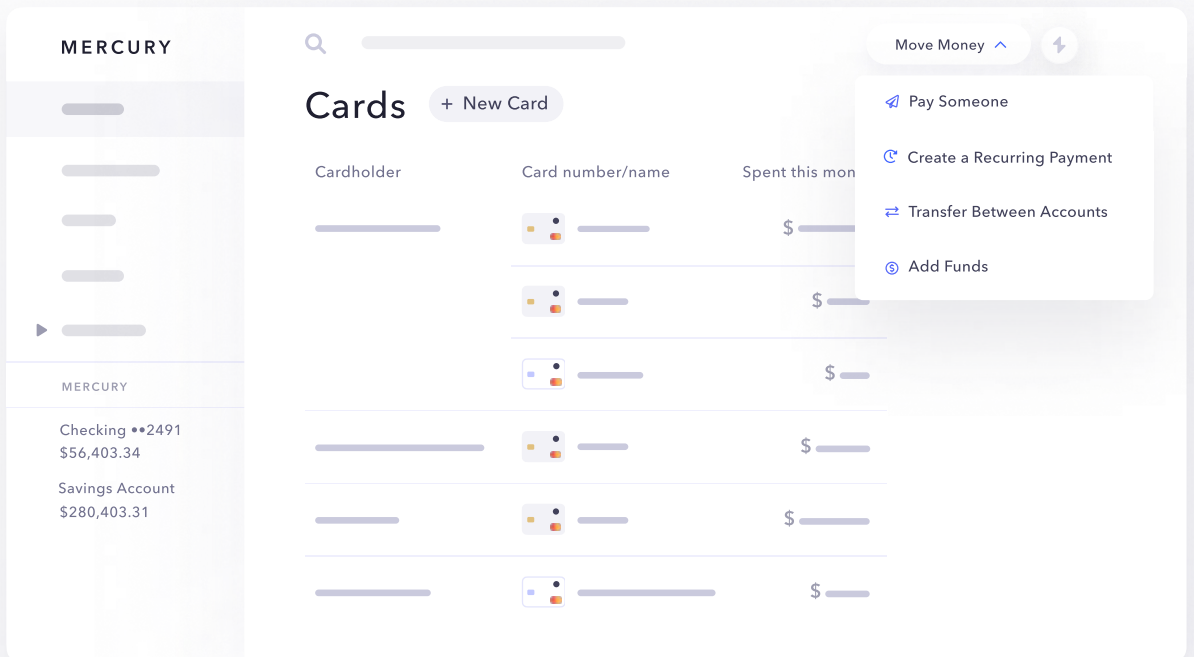

Open your account anywhere in the world in just a few minutes.

A powerful foundation to strengthen your startup

Our core products are built to help you scale.

Issue virtual cards, manage spend limits, and even assign card nicknames right from your dashboard.

Send money quickly through domestic & international wires, checks, and ACH payments.

The screenshot displays the Mercury dashboard interface. On the left sidebar, the Mercury logo is at the top, followed by a hamburger menu icon. Below the menu, there are four account cards: three with placeholder bars and one labeled 'MERCURY' showing 'Checking **2491' with a balance of '\$56,403.34' and 'Savings Account' with a balance of '\$280,403.31'. The main content area features a search bar, a 'Cards' section header with a '+ New Card' button, and a table with columns for 'Cardholder', 'Card number/name', and 'Spent this month'. The table contains five rows of card information, each with a placeholder bar for the cardholder, a card icon and number for the card name, and a dollar sign placeholder for the amount spent. A 'Move Money' dropdown menu is open on the right, showing options: 'Pay Someone', 'Create a Recurring Payment', 'Transfer Between Accounts', and 'Add Funds'.

FDIC-insured checking and savings accounts to keep your funds safe.

Create custom payment schedules for your rent, Facebook ads, and all those Substack newsletters.

Uncommon features for uncommon growth

Steer your startup with tools built for fast-paced companies.

Custom team permissions

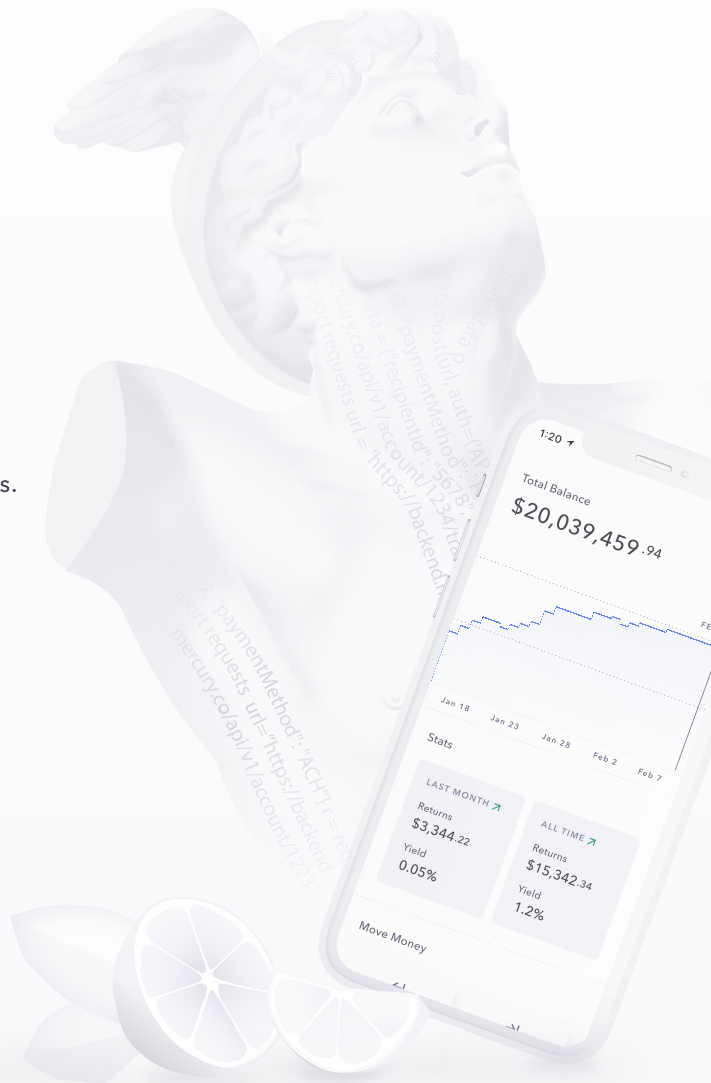

Invite team members as an admin or bookkeeper, or build your own unique role.

Native cash management

Mercury Treasury provides automated cash management to improve yield on your funds.

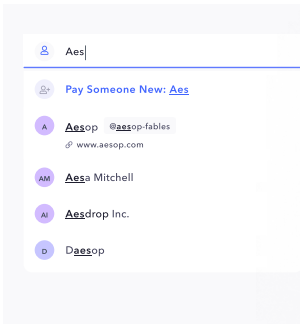

Read & write API access

Use our API to build your own burn tracker, write custom notifications, or even programmatically pay your vendors.

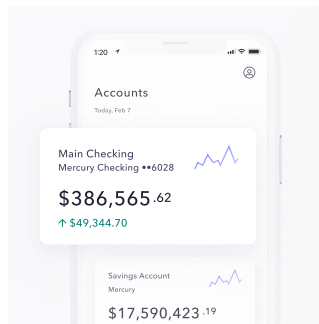

Design that makes fast work

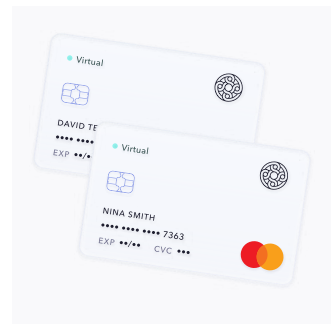

We thought through every element of your UI, right down to the custom date picker.
