

## Case Study

### Client

Unit helps tech companies build financial features – cards, accounts, payments, and lending – into their products. They own the heavy lifting of compliance and bank relationships so their customers can build, launch, and grow faster.

### Region

Global

### Industries

FinTech

### Goal

Implement Visa DPS; Issue a new secure card, in both physical and virtual format.

### Challenge

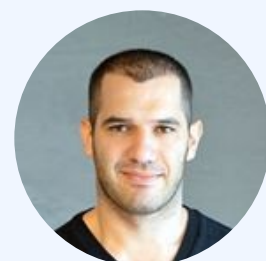

Become PCI compliant and finalize Visa DPS implementation, within 4 months.

### Solution

CI DSS Level 1 Certification, VGS Data Security Platform

### Result

"VGS helped Unit implement Visa DPS 50% faster than standard Visa DPS deployments," Visa

*"We built our PCI infrastructure solution and secured Level 1 compliance for way less than if we'd done it in house – both financially and in engineering resources – and broke a record for getting Visa DPS implemented at the same time."*

*Doron Somech, CTO*
