

## Case Study Summary

### Client

EedenBull is a fintech innovation company specializing in creating and delivering B2B and commercial payment solutions. They work with banks, card schemes, and payment partners on a global basis to enhance and drive innovative business solutions and products to better serve Corporate and SME clients.

*"It was always in our heads to use a third-party that could help us with compliance because it's a nightmare to do yourself."*

*Andrew Veitch, COO*

### Region

Global

### Industries

FinTech

### Goal

Become PCI DSS and SOC 2 compliant to make it easier to sell

### Challenge

Meet a client deadline to become PCI Level 1 and SOC 2 compliant, with limited resources

### Solution

PCI DSS Level 1, VGS Vault, VGS Control for SOC 2

### Result

With help from VGS, EedenBull became both PCI Level 1 and SOC 2 compliant in less than four months, with no additional headcount and at half the time and cost quoted by the Big Four Accounting Firms.
