VERY GOOD SECURITY

The Global Custodian for Customer Data

Very Good Security (VGS) transforms data security from a liability into an asset - enabling organizations to unlock the value of their sensitive and regulated data without the associated risks and costs.

VGS democratizes best-in-class security and compliance, making data protection easier and more affordable for businesses of any size.

Solutions

VGS Zero Data™ Platform offloads liability and risk

VGS Zero Data™ Platform allows companies to collect, protect, and exchange sensitive data by replacing the original information with an aliased version. Companies can operate on their aliased data stored securely in VGS Vaults without coming into contact with the original data.
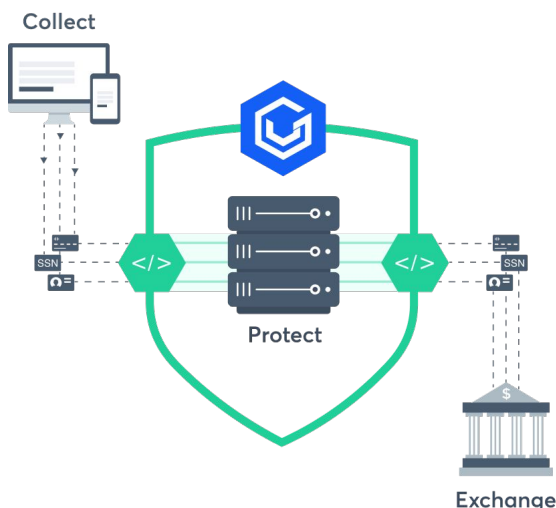

VGS Control simplifies compliance complexity

VGS Control automates compliance workflows and seamlessly integrates with customers' technology stack to start checking security configurations, gathering evidence, and monitoring changes, enabling active compliance postures. With VGS Control, there's no need to figure out how to become compliant with SOC 2, HIPAA, GDPR, CCPA, and other regulations. VGS Control does the work for you.

Collect

Protect

Exchange
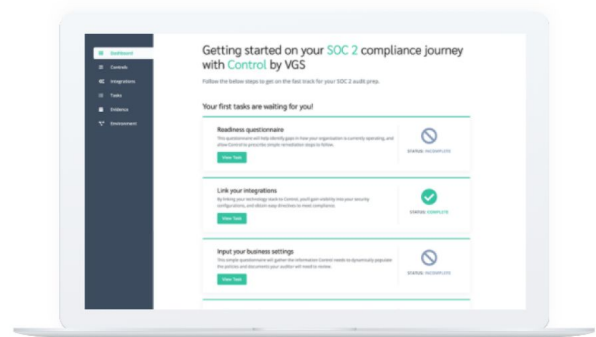

Common Use Cases

Card Issuance /Onboarding (KYC/AML)
Issue cards and onboard clients without seeing PII or PAN.

PCI Compliance
Descope PCI Compliance and achieve compliance up to 16X faster.

Payment Optimization
Avoid Payment Service Provider (PSP) lock-in and reduce transaction fees.

SOC 2 Compliance
Automate and accelerate SOC 2 compliance audit readiness by 70%.

Data Privacy (GDPR, CCPA, HIPAA)
Avoid penalties and fines by offloading the collection, protection, processes, and storage of PII, PHI, and other sensitive information to VGS.

Identity Verification
Upload, verify, and use driver's licenses, social security cards, passports, and other sensitive documents without the data ever touching your systems.

Protecting Credentials
Eliminate the risk of leaking passwords, environment variables, private keys, or other credentials.

"Offloading the bulk of our PCI and security responsibility to VGS has really enabled us to move faster."

Henrique Dubugras
CEO & Co-Founder, Brex

"We're going beyond PCI data soon. Everything related to that near-term expansion of our offerings is being built based on VGS technology."

Ramona Hall
SVP of Commercial Cards, Texas Capital Bank

"We're saving anywhere from $150k to $250k, not including the recurring expenses to stay up to date with compliance."

Bryan Uribe
Yofii Inc, CEO and Founder
