

Comprehensive cyber risk management for business owners and IT professionals

The current approach to cyber risk management is broken. Costs are going up, but breaches aren't going down. With a data-driven assessment and cyber insurance platform, Trava provides an integrated and dynamic risk-transfer mechanism for small and medium-sized businesses. It's comprehensive security—simplified.

Assess

Automated scanning tools provide the scope and depth of risk assessment you need for your business—all managed from one convenient platform.

Mitigate

Tailored mitigation recommendations highlight strategies to improve your risk posture. Your IT team can do the work, or we can refer you to an expert service provider for help.

Insure

Cyber insurance covers residual risk with another layer of protection. Get a quote in minutes—better risk management can result in lower premiums.
