### What are the risks of investing?

Risk indicator for the Sharesies PIE Save Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years<sup>1</sup>. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this Fund.

### Notes

- As the Sharesies PIE Save Fund is newly established, a combination of actual fund returns and market index returns have been used to determine the risk indicator as the Fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the Fund's future volatility. Market index returns have been used until 25 November 2024 and fund returns thereafter.
- As the Sharesies PIE Save Fund only started accepting investments on 25 November 2024 historical fee information is not available. The fund charges represent our best estimates of the fees and expenses that will be charged to the fund as set out in the PDS for the Fund.
- The Manager may from time to time, at its sole discretion, reduce its fees, including taking no fee at all.
