#### **Buy-Sell Arrangements**

John Hancock does not guarantee the accuracy of the Buy-Sell Arrangements system or the output. John Hancock will not be liable for any damages arising from the use or misuse of this software or from any errors or omissions in the same. John Hancock assumes no duty to update this software or to provide notice of any errors in the software or applicable changes in the law.

Figures used in this program illustrate various benefit/retirement planning concepts, which are based upon both assumptions and data provided by you, the client. Your furnishing of accurate data will help enhance the value of this analysis. However, all assumed growth rates for assets are based upon information provided and assumed by you and are not a guarantee of the future performance of the life insurance policy. Please review the assumptions page for accuracy of information.

This supplemental illustration assumes that the currently illustrated non-guaranteed elements will continue for all years shown. This is unlikely to occur and actual results may be more or less favorable than those shown. The actual consequences of a particular planning alternative will depend upon many variables, some of which may not be accounted for or fully described in this presentation. Unless otherwise indicated, the income tax and generation-skipping transfer (GST) tax implications of particular transactions are not reflected in the analysis.

Representation of the tax law in this illustration are based on the law existing at the time of publication. John Hancock makes no representation as to future federal or state tax law.

This material does not constitute tax, legal or accounting advice and neither John Hancock nor any of its agents, employees or registered representatives are in the business of offering such advice. It was not intended or written for use and cannot be used by any taxpayer for the purpose of avoiding any IRS penalty. It was written to support the marketing of the transactions or topics it addresses. Anyone interested in these transactions or topics should seek advice based on his or her particular circumstances from independent professional advisors.

John Hancock.

#### THE PROBLEM

Many business owners do not make formal plans to transfer the business in the event of the premature death or disability of a business owner, the lifetime transfer or sale of the business, or the retirement of one of the key business owners. Lack of planning can cause a business to fail because of the significant changes that are brought about due to these triggering events. Although in some cases a buy-sell arrangement is in place dictating how the business is to transfer, often these arrangements remain unfunded.

#### THE SOLUTION

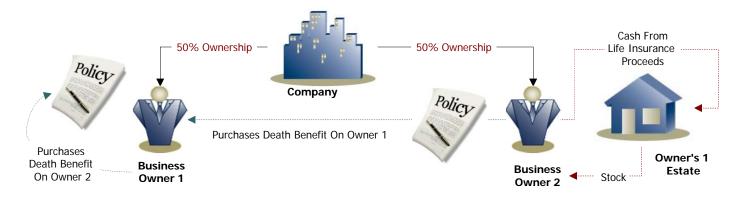

A well drafted and properly funded cross purchase buy-sell arrangement can be established in which the owners of a company agree to buy each other's business interest in the event of death, disability, retirement or other termination event. The buy-sell plan provides clarification as to who will run the business after your death or the death of one of the other owners. The arrangement can be funded with a permanent life insurance policy on each owner to help ensure that the company has the liquidity necessary to transition the business according to a prearranged plan. A permanent life insurance policy provides the flexibility needed to accommodate changing needs over the life span of the business<sup>1</sup>.

#### **HOW IT WORKS**

You and each of your business partners purchase and own a permanent life insurance policy on the lives of each other. You may pay premiums out of personal funds or the corporation may pay bonuses to each of you in the amount of the premium payments annually to minimize the out-of-pocket expense of the plan to each owner. The bonus payments may be tax-deductible to the corporation when paid but the payment made to each owner will be taxable<sup>2</sup>. In some cases the corporation may choose to make a double bonus in which the bonus is equivalent to the premiums due plus the tax you must pay on the bonus.

Upon the death of each shareholder, each of the remaining shareholders will use the proceeds of the policy that they own on the life of the deceased shareholder to carry out their obligation to purchase a pro-rata share of the deceased shareholder's stock. This type of arrangement works particularly well for pass-through entities such as S Corporations, partnerships and Limited Liability Companies (LLCs).

It is necessary to establish the value of the business in order to ascertain the value of each life insurance policy that will be used to fund the buy-sell agreement. Fixing the value of the business can eliminate future disagreements and avoid confusion and additional expenses. The valuation may also be relied upon for estate tax purposes to provide a fixed value for both a lifetime transfer of the business as well as the transfer of the business at death<sup>3</sup>. There are a number

<sup>1</sup> A cross purchase buy-sell plan funded with life insurance works best when there are three or fewer owners of the business given the multiple life insurance policies required.

2 The use of a bonus arrangement creates additional compensation to you and must fall within the reasonable compensation guidelines of the Internal Revenue Code Section 162 in order to be deductible by the corporation.

<sup>3</sup> IRC §2703 provides certain tests the taxpayer must meet to permit the value of the buy-sell agreement to set the value for federal estate tax purpose. First, the buy-sell agreement must reflect a bona fide business arrangement. Second, the buy-sell agreement must not represent a device to transfer the business interest to the decedent's family or the natural objects of the decedent's bounty for less than full and adequate consideration. Third, the terms of the buy-sell agreement must remain comparable to similar arrangements entered into by persons in arms-length transactions.

Page 4 of 15

of valuation methods that can be used including a multiple of book value, qualified business appraisal, or capitalization of earnings method<sup>4</sup>. Therefore, it is important for you to first determine the value of your business with the help of your professional advisors.

Funding a cross purchase plan typically requires multiple life insurance policies. The number of policies can be determined by the formula x=n (n-1), where "x" is the number of policies needed and "n" is the number of owners. For example, if there are three owners, the number of policies required is six (3x2).

The permanent life insurance policy can be cost effective and can be sufficiently flexible to supply liquidity to facilitate the buy-out when needed. Although the primary use of the insurance policy is to fund the purchase of the business interest on the owner's death the policy cash value may be available for a trigerring event during life.

Loans and withdrawals will reduce the death benefit, cash surrender value, and may cause the policy to lapse. Lapse or surrender of a policy with a loan may cause the recognition of taxable income. Policies classified as modified endowment contracts may be subject to tax when a loan or withdrawal is made. A federal tax penalty of 10% may also apply if the loan or withdrawal is taken prior to age 59½. Cash value available for loans and withdrawals may be more or less than originally invested. Withdrawals are available in the 2nd policy year.

#### **BENEFITS**

- The life insurance proceeds should not be subject to income taxes<sup>5</sup>.
- Life insurance used to fund a cross purchase agreement does not increase the value of the business because the company is not required to reflect the value of the policy on its balance sheet.
- The life insurance proceeds used to fund the cross purchase obligation are not treated as dividend distributions.
- Since the business is not a party to the cross purchase agreement, the alternative minimum tax (AMT) and accumulated earnings tax do not apply to the policy proceeds.
- The value of the business may be fixed for estate tax purposes.
- The surviving owners receive a "step-up" in basis in the purchased shares. This tax basis increase is a primary advantage of the Cross-Purchase plan

#### **CONSIDERATIONS**

- The plan may require several life insurance policies and may be cumbersome to administer if there are more than four owners.
- If you or one of the other owners has difficulty making premium payments, the cross purchase plan may not be fully funded at any given time.
- The life insurance premium payments are not tax-deductible.
- Since a cross purchase plan involves more than one owner, the surviving owners must consider the transferfor-value rule. This rule may subject the life insurance proceeds to income tax to the extent the proceeds exceed the purchase price and any subsequent premiums paid. Through proper planning, the transfer-for-value rule can be avoided<sup>6</sup>.
- Representation of the tax law in this illustration are based on the law existing at the time of publication.
- The value that is fixed in the buy-sell agreement may change by the time of a triggering event such as
  death, although the valuation method may remain the same. If the value of the business decreases by the
  time of a triggering event, then the remaining owners may not need to use all of the life insurance funding
  for the buy-sell arrangement.
- If you are considering creating a policy with a long-term care rider where the owner
  is not the insured, there may be adverse consequences both tax and contractual in nature. You should
  review the particulars of your intended ownership arrangement with your legal and tax counsels in light of the
  income, gift, and estate tax provisions of the Internal Revenue Code

#### **PLANNING OPTIONS**

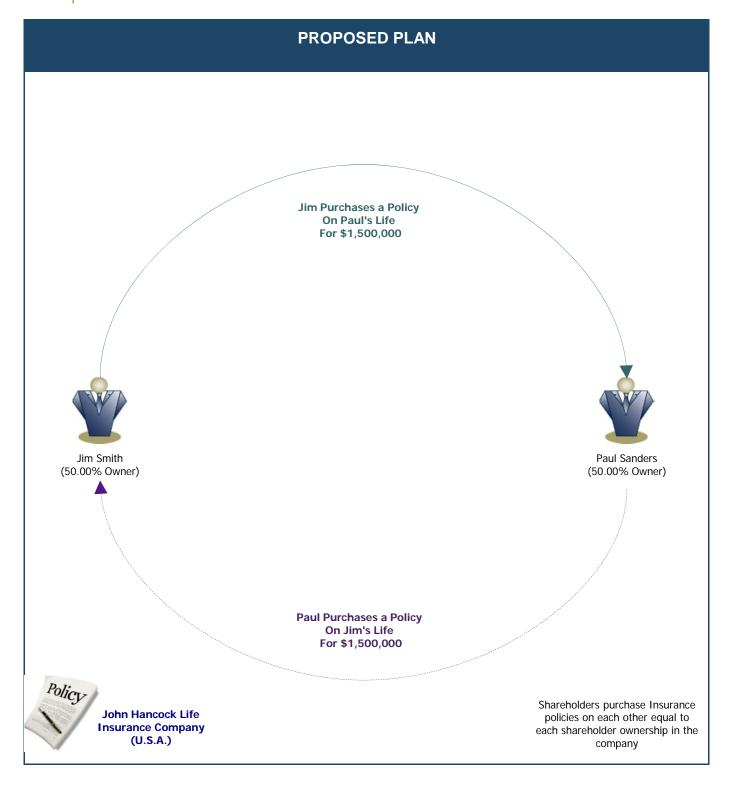

The following flowcharts and ledger pages illustrate the plan mechanics, and the costs and benefits of the cross purchase buy-sell plan to the business and each business owner.

<sup>6</sup> See IRC §101(a)(2). See PLR 200747002 for an example of a Limited Liability Company (LLC) to fund a Buy-Sell Agreement. A PLR is merely an IRS interpretation of law and is only binding upon the taxpayer to whom it is issued. Please consult your tax advisors.

<sup>4</sup> Generally, the business should obtain an independent audit of its books and financial records prior to use of the book value method.

<sup>5</sup> See IRC §101(a)(1) and Regulation Section 1.101-1(a)(1)

#### **GLOSSARY OF LEDGER TERMS - CROSS ENDORSEMENT BUY-SELL PLAN**

Cross-Purchase Buy-Sell Arrangement – This is a type of buy-sell arrangement in which each shareholder owns a life insurance policy on the life of each of the other shareholders. Upon the death of each shareholder, each of the remaining shareholders will use the proceeds of the policy that they own on the life of the deceased shareholder to carry out their obligation to purchase a pro-rata share of the deceased shareholder's stock. This type of arrangement works particularly well for pass-through entities such as S Corporations, partnerships and Limited Liability Companies (LLCs).

**Census Summary** – The Census Summary is a listing of each of the owners of the company, their ages and risk class as well as each owner's current ownership percentage in the company

**Annualized Premium** – This row under the Census Summary shows the premium required on each business owner's policy based on the total death benefit purchased.

**Initial Death Benefit** – This row under the Census Summary shows the amount of the death benefit that each individual owner owns on the other shareholders. The death benefit may be either equal to the insured's ownership percentage or a portion of the insured's ownership percentage, depending on the total number of business owners.
