WHY WE BUILT MONEY20/20

In 2012, when fintech conferences were a snooze fest, we crashed the party. The people shaping what's next needed a platform that can keep up. So, we built something different, Money20/20, where power players from the entire financial ecosystem join to supercharge business and shape the industry. Our track record speaks for itself: Airwallex, Stripe, Marqeta, Adyen found their feet on our floors. This is where money does business. This is the platform you don't outgrow. The community you're forever a part of.

WHY ATTEND? MONEY20/20 USA IS WHERE YOU GROW YOUR BUSINESS.

- **ACCELERATE DEALS** - Leverage our global network to generate new leads and get business done at scale.
- **BUILD PARTNERSHIPS** - Use high impact networking for new partnerships & to strengthen existing ones.
- **RAISE YOUR PROFILE** - Enhance your visibility & increase brand awareness with the industry's most senior audience.
- **MAKE BREAKTHROUGHS** - Stay informed about the latest ideas, insights and innovations from the industry's most influential leaders.

WHAT YOU DON'T GET ANYWHERE ELSE

This is the only show where you'll get 1:1 access to the most influential leaders from across the entire money ecosystem all at once. It's your perfect blend of quantity and quality.

2026 CONTENT PILLARS

These are not predictions but a reflection of where the industry is already heading, and the conversations that will define what comes next.

BORDERLESS FINANCIAL ARCHITECTURE

Cross-border modernization, tokenization, and stablecoins for global mobility and commerce.

The US is at the forefront of making finance borderless, with businesses and individuals increasingly relying on systems that connect economies worldwide. The narrative is clear: real-time cross-border payments are a top priority, secure and transparent processes are central to strategy, and tokenization and stablecoins are actively being explored to make transactions faster and more efficient.

KEY DISCUSSION POINTS:

- **Accessible Infrastructure**
- **Tokenization & Stablecoins**
- **Interoperability for Global Commerce**
- **Security as a Priority**

TECHNOLOGY AS THE GREAT EQUALIZER

The democratizing power of agentic AI, autonomous agents, AI predicted fraud and hyper-personalization for innovation and access.

Technology is leveling the playing field, creating opportunities for individuals and businesses. Across the US, AI adoption is now mainstream for improving efficiency, while digital tools are increasingly being used to expand access to financial services.

KEY DISCUSSION POINTS:

- **AI for Accessibility**
- **Digital Identity Solutions**
- **Emerging Tech for Business Efficiency**
- **Building Trust**

These are not predictions but a reflection of where the industry is already heading, and the conversations that will define what comes next.

PARTNERSHIPS AS THE ENGINE TO SCALE

Fintech as a service, embedded finance, collaborating and investing to create capable and secure financial systems.

The financial industry is pivoting toward resilient ecosystems that prioritize collaboration, trust, and adaptability. Partnerships consistently emerged as a foundational theme, with organizations leveraging emerging technologies, regulatory alignment, and new business models and GTM strategies (FaaS) to drive innovation meet evolving customer needs, and create scalable, inclusive solutions that deliver long-term value.

KEY DISCUSSION POINTS:

- **Partnership over Competition**
- **Scalable and Secure Systems**
- **Technology-Driven Integrity**
- **Funding Wave**

BRAVE NEW WORLD: SETTING GUARDRAILS

Addresses regulatory challenges, trust-building, and the need for transparency in a rapidly evolving landscape.

The financial landscape is undergoing a significant transformation, with trust, transparency, and regulatory clarity taking center stage across payments, banking, and emerging technologies. Regulatory uncertainty remains a dominant concern not only in digital assets and stablecoins, but also in the large-scale adoption of AI, data usage, and supervisory frameworks within financial institutions.

KEY DISCUSSION POINTS:

- **Regulatory Frameworks for Scale**
- **Modern Supervision Models**
- **Transparency and Data Access**
- **Cross-Sector Alignment**
